

Preface

“But for life the universe were nothing; and all that has life requires nourishment.”

With the progress of knowledge the needs of the human body have not been forgotten. During the last decade much time has been given by scientists to the study of foods and their dietetic value, and it is a subject which rightfully should demand much consideration from all. I certainly feel that the time is not far distant when a knowledge of the principles of diet will be an essential part of one's education. Then mankind will eat to live, will be able to do better mental and physical work, and disease will be less frequent.

At the earnest solicitation of educators, pupils, and friends, I have been urged to prepare this book, and I trust it may be a help to many who need its aid. It is my wish that it may not only be looked upon as a compilation of tried and tested recipes, but that it may awaken an interest through its condensed scientific knowledge which will lead to deeper thought and broader study of what to eat.

Food

Food is anything which nourishes the body. From fifteen to twenty elements enter into the composition of the body, of which the following thirteen are considered: oxygen, 62 1/2%; carbon, 21 1/2%; hydrogen, 10%; nitrogen, 3%; calcium, phosphorus, potassium, sulphur, chlorine, sodium, magnesium, iron, and fluorine the remaining 3%.

Food is necessary for growth, repair, and energy; therefore the elements composing the body must be found in the food. The thirteen elements named are formed into chemical compounds by the vegetable and animal kingdoms to support the highest order of being, man. All food must undergo chemical change after being taken into the body, before it can be utilized by the body; this is the office of the digestive system.

Food is classified as follows:—

1. Protein (nitrogenous or albuminous) I. ORGANIC 2. Carbohydrates (sugar and starch) 3. Fats and oils

II. INORGANIC 1. Mineral matter 2. Water

The chief office of proteins is to build and repair tissues. They furnish energy, but at greater cost than carbohydrates, fats, and oils. They contain nitrogen, carbon, oxygen, hydrogen, and sulphur or phosphorus, and include all forms of animal foods (excepting fats and glycogen) and some vegetable foods. Examples: milk, cheese, eggs, meat, fish, cereals, peas, beans, and lentils. The principal constituent of protein food is albumen. Albumen as found in food takes different names, but has the same chemical composition; as, *albumen* in eggs, *fibrin* in meat, *casein* in milk and cheese, *vegetable casein* or *legumen* in peas, beans, and lentils; and *gluten* in wheat. To this same class belongs gelatin.

The chief office of the carbohydrates is to furnish energy and maintain heat. They contain carbon, hydrogen, and oxygen, and include foods containing starch and sugar. Examples: vegetables, fruits, cereals, sugars, and gums.

The chief office of fats and oils is to store energy and heat to be used as needed, and constitute the adipose tissues of the body. Examples: butter, cream, fat of meat, fish, cereals, nuts, and the berry of the olive-tree.

The chief office of mineral matter is to furnish the necessary salts which are found in all animal and vegetable foods. Examples: sodium chloride (common salt); carbonates, sulphates and phosphates of sodium, potassium, and magnesium; besides calcium phosphates and iron.

Water constitutes about two-thirds the weight of the body, and is in all tissues and fluids; therefore its abundant use is necessary. One of the greatest errors in diet is neglect to take enough water; while it is found in all animal and vegetable food, the amount is insufficient.

Correct Proportions Of Food

Age, sex, occupation, climate, and season must determine the diet of a person in normal condition.

Liquid food (milk or milk in preparation with the various prepared foods on the market) should constitute the diet of a child for the first eighteen months. After the teeth appear, by which time ferments have been developed for the digestion of starchy foods, entire wheat bread, baked potatoes, cereals, meat broths, and occasionally boiled eggs may be given. If mothers would use Dr. Johnson's

Educators in place of the various sweet crackers, children would be as well pleased and better nourished; with a glass of milk they form a supper suited to the needs of little ones, and experience has shown that children seldom tire of them. The diet should be gradually increased by the addition of cooked fruits, vegetables, and simple desserts; the third or fourth year fish and meat may be introduced, if given sparingly. Always avoid salted meats, coarse vegetables (beets, carrots, and turnips), cheese, fried food, pastry, rich desserts, confections, condiments, tea, coffee, and iced water. For school children the diet should be varied and abundant, constantly bearing in mind that this is a period of great mental and physical growth. Where children have broken down, supposedly from over-work, the cause has often been traced to impoverished diet. It must not be forgotten that digestive processes go on so rapidly that the stomach is soon emptied. Thanks to the institutor of the school luncheon-counter!

The daily average ration of an adult requires

4 1/2 oz. protein 2 oz. fat 18 oz. starch 5 pints water

About one-third of the water is taken in our food, the remainder as a beverage. To keep in health and do the best mental and physical work, authorities agree that a mixed diet is suited for temperate climates, although sound arguments appear from the vegetarian. Women, even though they do the same amount of work as men, as a rule require less food. Brain workers should take their protein in a form easily digested. In consideration of this fact, fish and eggs form desirable substitutes for meat. The working man needs quantity as well as quality, that the stomach may have something to act upon. Corned beef, cabbage, brown-bread, and pastry, will not overtax his digestion. In old age the digestive organs lessen in activity, and the diet should be almost as simple as that of a child, increasing the amount of carbohydrates and decreasing the amount of proteins and fat. Many diseases which occur after middle life are due to eating and drinking such foods as were indulged in during vigorous manhood.

Water (H₂O)

Water is a transparent, odorless, tasteless liquid. It is derived from five sources,—rains, rivers, surface-water or shallow wells, deep wells, and springs. Water is never found pure in nature; it is nearly pure when gathered in an open field, after a heavy rainfall, or from springs. For town and city supply, surface-water is furnished by some adjacent pond or lake. Samples of such water are carefully and frequently analyzed, to make sure that it is not polluted with disease germs.

The hardness of water depends upon the amount of salts of lime and magnesia which it contains. Soft water is free from objectionable salts, and is preferable for household purposes. Hard water may be softened by boiling, or by the addition of a small amount of bicarbonate of soda (NaHCO₃).

Water freezes at a temperature of 32deg F., boils at 212deg F.; when bubbles appear on the surface and burst, the boiling-point is reached. In high altitudes water boils at a lower temperature. From 32deg to 65deg F. water is termed cold; from 65deg to 92deg F., tepid; 92deg to 100deg F., warm; over that temperature, hot. Boiled water is freed from all organic impurities, and salts of lime are precipitated: it does not ferment, and is a valuable antiseptic. Hot water is more stimulating than cold, and is of use taken on an empty stomach, while at a temperature of from 60deg to 95deg F. it is used as an emetic; 90deg F. being the most favorable temperature.

Distilled water is chemically pure and is always used for medicinal purposes. It is flat and insipid to the taste, having been deprived of its atmospheric gases.

There are many charged, carbonated, and mineral spring waters bottled and put on the market; many of these are used as agreeable table beverages. Examples: Soda Water, Apollinaris, Poland, Seltzer, and Vichy. Some contain minerals of medicinal value. Examples: Lithia, saline, and sulphur

waters.

Salts

Of all salts found in the body, the most abundant and valuable is sodium chloride (NaCl), common salt; it exists in all tissues, secretions, and fluids of the body, with the exception of enamel of the teeth. The amount found in food is not always sufficient; therefore salt is used as a condiment. It assists digestion, inasmuch as it furnishes chlorine for hydrochloric acid found in gastric juice.

Common salt is obtained from evaporation of spring and sea-water, also from mines. Our supply of salt obtained by evaporation comes chiefly from Michigan and New York; mined salt from Louisiana and Kansas.

Salt is a great preservative; advantage is taken of this in salting meat and fish.

Other salts—lime, phosphorus, magnesia, potash, sulphur, and iron—are obtained in sufficient quantity from food we eat and water we drink. In young children, perfect formation of bones and teeth depends upon phosphorus and lime taken into the system; these are found in meat and fish, but abound in cereals.

Starch (C₆H₁₀O₅)

Starch is a white, glistening powder; it is largely distributed throughout the vegetable kingdom, being found most abundantly in cereals and potatoes. Being a force-producer and heat-giver it forms one of the most important foods. Alone it cannot sustain life, but must be taken in combination with foods which build and repair tissues.

Test for Starch. A weak solution of iodine added to cold cooked starch gives an intense blue color.

Starch is insoluble in cold water, and soluble to but a small extent in boiling water. Cold water separates starch-grains, boiling water causes them to swell and burst, thus forming a paste.

Starch subjected to dry heat is changed to *dextrine* (C₆H₁₀O₅), British gum. Dextrine subjected to heat plus an acid or a ferment is changed to *dextrose* (C₆H₁₂O₆). Dextrose occurs in ripe fruit, honey, sweet wine, and as a manufactured product. When grain is allowed to germinate for malting purposes, starch is changed to dextrine and dextrose. In fermentation, dextrose is changed to alcohol (C₂H₅HO) and carbon dioxide (CO₂). Examples: bread making, vinegar, and distilled liquors.

Glycogen, animal starch, is found in many animal tissues and in some fungi. Examples: in liver of meat and oysters.

Raw starch is not digestible; consequently all foods containing starch should be subjected to boiling water or dry heat, and thoroughly cooked. Starch is manufactured from wheat, corn, and potatoes. **Corn-starch** is manufactured from Indian corn. **Arrowroot**, the purest form of starch, is obtained from two or three species of the Maranta plant, which grows in the West Indies and other tropical countries. Bermuda arrowroot is most highly esteemed. **Tapioca** is starch obtained from tuberous roots of the bitter cassava, native of South America. **Sago** is starch obtained from sago palms, native of India.

Sugar (C₁₂H₂₂O₁₁)

Sugar is a crystalline substance, differing from starch by its sweet taste and solubility in cold water. As food, its uses are the same as starch; all starch must be converted into sugar before it can be

assimilated.

The principal kinds of sugar are: cane sugar or *sucrose*, grape sugar or *glucose* ($C_6H_{12}O_6$), milk sugar or *lactose* ($C_{12}H_{22}O_{11}$), and fruit sugar or *levulose* ($C_6H_{12}O_6$).

Cane sugar is obtained from sugar cane, beets, and the palm and sugar-maple trees. Sugar cane is a grass supposed to be native to Southern Asia, but now grown throughout the tropics, a large amount coming from Cuba and Louisiana; it is the commonest of all, and in all cases the manufacture is essentially the same. The products of manufacture are: molasses, syrup, brown sugar, loaf, cut, granulated, powdered, and confectioners' sugar. Brown sugar is cheapest, but is not so pure or sweet as white grades; powdered and confectioners' sugars are fine grades, pulverized, and, although seeming less sweet to the taste, are equally pure. Confectioners' sugar when applied to the tongue will dissolve at once; powdered sugar is a little granular.

Cane sugar when added to fruits, and allowed to cook for some time, changes to grape sugar, losing one-third of its sweetness; therefore the reason for adding it when fruit is nearly cooked. Cane sugar is of great preservative value, hence its use in preserving fruits and milk; also, for the preparation of syrups.

Three changes take place in the cooking of sugar: first, barley sugar; second, caramel; third, carbon.

Grape sugar is found in honey and all sweet fruits. It appears on the outside of dried fruits, such as raisins, dates, etc., and is only two-thirds as sweet as cane sugar. As a manufactured product it is obtained from the starch of corn.

Milk sugar is obtained from the milk of mammalia, but unlike cane sugar does not ferment.

Fruit sugar is obtained from sweet fruits, and is sold as *diabetin*, is sweeter than cane sugar, and is principally used by diabetic patients.

Gum, Pectose, And Cellulose

These compounds found in food are closely allied to the carbohydrates, but are neither starchy, saccharine, nor oily. Gum exists in the juices of almost all plants, coming from the stems, branches, and fruits. Examples: gum arabic, gum tragacanth, and mucilage. Pectose exists in the fleshy pulp of unripe fruit; during the process of ripening it changes to pectin; by cooking, pectin is changed to pectosic acid, and by longer cooking to pectic acid. Pectosic acid is jelly-like when cold; pectic acid is jelly-like when hot or cold. Cellulose constitutes the cell-walls of vegetable life; in very young vegetables it is possible that it can be acted upon by the digestive ferments; in older vegetables it becomes woody and completely indigestible.

Fats And Oils

Fats and oils are found in both the animal and vegetable kingdom. Fats are solid; oils are liquid; they may be converted into a liquid state by application of heat; they contain three substances,—*stearin* (solid), *olein* (liquid), *palmitin* (semi-solid). Suet is an example where stearin is found in excess; lard, where olein is in excess; and butter, where palmitin is in excess. Margarin is a mixture of stearin and palmitin. The fatty acids are formed of stearin, olein, and palmitin, with glycerine as the base. Examples: stearic, palmitic, and oleic acid. Butyric acid is acid found in butter. These are not sour to the taste, but are called acids on account of their chemical composition.

Among animal fats cream and butter are of first importance as foods, on account of their easy assimilation. Other examples are: the fat of meats, bone-marrow, suet (the best found around the loin and kidneys of the beef creature), lard, cottolene, coto suet, cocoanut butter, butterine, and

oleomargarine. The principal animal oils are cod liver oil and oil found in the yolk of egg; principal vegetable oils are olive, cottonseed, poppy, and cocoanut oils, and oils obtained from various nuts.

Oils are divided into two classes, *essential* and *fixed*. Essential oils are volatile and soluble in alcohol. Examples: clove, rose, nutmeg, and violet. Fixed oils are non-volatile and soluble in ether, oil, or turpentine. Examples: oil of nuts, corn meal, and mustard.

Fats may be heated to a high temperature, as considered in cookery they have no boiling-point. When appearing to boil, it is evident water has been added, and the temperature lowered to that of boiling water, 212deg F.

The value of milk as a food is obvious from the fact that it constitutes the natural food of all young mammalia during the period of their most rapid growth. There is some danger, however, of overestimating its value in the dietary of adults, as solid food is essential, and liquid taken should act as a stimulant and a solvent rather than as a nutrient. One obtains the greatest benefit from milk when taken alone at regular intervals between meals, or before retiring, and sipped, rather than drunk. Hot milk is often given to produce sleep.

When milk is allowed to stand for a few hours, the globules of fat, which have been held in suspension throughout the liquid, rise to the top in the form of *cream*; this is due to their lower specific gravity.

The difference in quality of milk depends chiefly on the quantity of fat therein: casein, lactose, and mineral matter being nearly constant, water varying but little unless milk is adulterated.

Why Milk Sours. A germ found floating in the air attacks a portion of the lactose in the milk, converting it into lactic acid; this, in turn, acts upon the casein (protein) and precipitates it, producing what is known as *curd* and *whey*. Whey contains water, salts, and some sugar.

Milk is preserved by sterilization, pasteurization, and evaporation. *Fresh condensed milk*, a form of evaporized milk, is sold in bulk, and is preferred by many to serve with coffee. Various brands of condensed milk and cream are on the market in tin cans, hermetically sealed. Examples: Nestle's Swiss Condensed Milk, Eagle Condensed Milk, Daisy Condensed Milk, Highland Evaporated Cream, Borden's Peerless Evaporated Cream. *Malted milk*—evaporized milk in combination with extracts of malted barley and wheat—is used to a considerable extent; it is sold in the form of powder.

Thin, or strawberry, and thick cream may be obtained from almost all creameries. Devonshire, or clotted cream, is cream which has been removed from milk allowed to heat slowly to a temperature of about 150deg F.

In feeding infants with milk, sterilization or pasteurization is sometimes recommended to avoid danger of infectious germs. By this process milk can be kept for many days, and transported if necessary. To prevent acidity of the stomach, add from one to two teaspoonfuls of lime water to each half-pint of milk. Lime water may be bought at any druggist's, or easily prepared at home.

Lime Water. Pour two quarts boiling water over an inch cube unslacked lime; stir thoroughly and stand over night; in the morning pour off the liquid that is clear, and bottle for use. Keep in a cool place.

Butter

Butter of commerce is made from cream of cow's milk. The quality depends upon the breed of cow, manner of, and care in, feeding. Milk from Jersey and Guernsey cows yields the largest amount of butter.

Butter should be kept in a cool place and well covered, otherwise it is liable to become rancid; this is due to the albuminous constituents of the milk, acting as a ferment, setting free the fatty acids. First-quality butter should be used; this does not include pat butter or fancy grades. Poor butter has not been as thoroughly worked during manufacture, consequently more casein remains; therefore it is more apt to become rancid. Fresh butter spoils quickly; salt acts as a preservative. Butter which has become rancid by too long keeping may be greatly improved by melting, heating, and quickly chilling with ice-water. The butter will rise to the top, and may be easily removed.

Where butter cannot be afforded, there are several products on the market which have the same chemical composition as butter, and are equally wholesome. Examples: butterine and oleomargarine.

Buttermilk is liquid remaining after butter "has come." When taken fresh, it makes a wholesome beverage.

Cheese

Composition	
Protein	31.23%
Fat	34.39%
Water	30.17%
Mineral matter	4.31%

Cheese is the solid part of sweet milk obtained by heating milk and coagulating it by means of rennet or an acid. Rennet is an infusion made from prepared inner membrane of the fourth stomach of the calf. The curd is salted and subjected to pressure. Cheese is made from skim milk, milk plus cream, or cream. Cheese is kept for a longer or shorter time, according to the kind, that fermentation or decomposition may take place. This is called ripening. Some cream cheeses are not allowed to ripen. Milk from Jersey and Guernsey cows yields the largest amount of cheese.

Cheese is very valuable food; being rich in protein, it may be used as a substitute for meat. A pound of cheese is equal in protein to two pounds of beef. Cheese in the raw state is difficult of

digestion. This is somewhat overcome by cooking and adding a small amount of bicarbonate of soda. A small piece of rich cheese is often eaten to assist digestion.

The various brands of cheese take their names from the places where made. Many foreign ones are now well imitated in this country. The favorite kinds of skim-milk cheese are: Edam, Gruyère, and Parmesan. Parmesan is very hard and used principally for grating. The holes in Gruyère are due to aeration.

The favorite kinds of milk cheese are: Gloucester, Cheshire, Cheddar, and Gorgonzola; Milk and Cream cheese: Stilton and Double Gloucester; Cream cheese: Brie, Neufchâtel, and Camembert.

Fruits

The varieties of fruits consumed are numerous, and their uses important. They are chiefly valuable for their sugar, acids, and salts, and are cooling, refreshing, and stimulating. They act as a tonic, and assist in purifying the blood. Many contain a jelly-like substance, called pectin, and several contain starch, which during the ripening process is converted into glucose. Bananas, dates, figs, prunes, and grapes, owing to their large amount of sugar, are the most nutritious. Melons, oranges, lemons, and grapes contain the largest amount of water. Apples, lemons, and oranges are valuable for their potash salts, and oranges and lemons especially valuable for their citric acid. It is of importance to those who are obliged to exclude much sugar from their dietary, to know that plums, peaches, apricots, and raspberries have less sugar than other fruits; apples, sweet cherries, grapes, and pears contain the largest amount. Apples are obtainable nearly all the year, and on account of their variety, cheapness, and abundance, are termed queen of fruits.

Thoroughly ripe fruits should be freely indulged in, and to many are more acceptable than desserts prepared in the kitchen. If possible, fruits should always appear on the breakfast-table. In cases where uncooked fruit cannot be freely eaten, many kinds may be cooked and prove valuable. Never eat unripe fruit, or that which is beginning to decay. Fruits should be wiped or rinsed before serving.

Vegetable Acids, And Where Found

The principal vegetable acids are:

- I. Acetic ($\text{HC}_2\text{H}_3\text{O}_2$), found in wine and vinegar.
- II. Tartaric ($\text{H}_2\text{C}_4\text{H}_4\text{O}_6$), found in grapes, pineapples, and tamarinds.
- III. Malic, much like tartaric, found in apples, pears, peaches, apricots, gooseberries, and currants.
- IV. Citric ($\text{H}_3\text{C}_6\text{H}_5\text{O}_7$), found in lemons, oranges, limes, and citron.
- V. Oxalic ($\text{H}_2\text{C}_2\text{O}_4$), found in rhubarb and sorrel.

To these may be added tannic acid, obtained from gall nuts. Some fruits contain two or more acids. Malic and citric are found in strawberries, raspberries, gooseberries, and cherries; malic, citric, and oxalic in cranberries.

Condiments

Condiments are not classed among foods, but are known as food adjuncts. They are used to stimulate the appetite by adding flavor to food. Among the most important are salt, spices, and various flavorings. Salt, according to some authorities, is called a food, being necessary to life.

Black pepper is ground peppercorns. Peppercorns are the dried berries of *Piper nigrum*, grown in the West Indies, Sumatra, and other eastern countries.

White pepper is made from the same berry, the outer husk being removed before grinding. It is less irritating than black pepper to the coating of the stomach.

Cayenne pepper is the powdered pod of *Capsicum* grown on the eastern coast of Africa and in Zanzibar.

Mustard is the ground seed of two species of the Brassica. *Brassica alba* yields white mustard seeds; *Brassica nigra*, black mustard seeds. Both species are grown in Europe and America.

Ginger is the pulverized dried root of *Zanzibar officinale*, grown in Jamaica, China, and India. Commercially speaking, there are three grades,—Jamaica, best and strongest; Cochin, and African.

Cinnamon is the ground inner bark of *Cinnamomum zeylanicum*, principally grown in Ceylon. The cinnamon of commerce (cassia) is the powdered bark of different species of the same shrub, which is principally grown in China, and called Chinese cinnamon. It is cheaper than true cinnamon.

Clove is the ground flower buds of *Caryophyllus aromaticus*, native to the Moluccas or Spice Islands, but now grown principally in Zanzibar, Pemba, and the West Indies.

Pimento (commonly called allspice) is the ground fruit of *Eugenia pimenta*, grown in Jamaica and the West Indies.

Nutmeg is the kernel of the fruit of the *Myristica fragans*, grown in Banda Islands.

Mace. The fibrous network which envelops the nutmeg seed constitutes the mace of commerce.

Vinegar is made from apple cider, malt, and wine, and is the product of fermentation. It is a great preservative; hence its use in the making of pickles, sauces, and other condiments. The amount of acetic acid in vinegar varies from two to seven per cent.

Capers are flower buds of *Capparis spinosa*, grown in countries bordering the Mediterranean. They are preserved in vinegar, and bottled for importation.

Horseradish is the root of *Cochliaria armoracia*,—a plant native to Europe, but now grown in our own country. It is generally grated, mixed with vinegar, and bottled.

Flavoring Extracts

Many flavoring extracts are on the market. Examples: almond, vanilla, lemon, orange, peach, and rose. These are made from the flower, fruit, or seed from which they are named. Strawberry, pineapple, and banana extracts are manufactured from chemicals.

Cookery

Cookery is the art of preparing food for the nourishment of the body.

Prehistoric man may have lived on uncooked foods, but there are no savage races to-day who do not practise cookery in some way, however crude. Progress in civilization has been accompanied by progress in cookery.

Much time has been given in the last few years to the study of foods, their necessary proportions, and manner of cooking them. Educators have been shown by scientists that this knowledge should be disseminated; as a result, "Cookery" is found in the curriculum of public schools of many of our towns and cities.

Food is cooked to develop new flavors, to make it more palatable and digestible, and to destroy micro-organisms. For cooking there are three essentials (besides the material to be cooked),—heat, air, and moisture.

Heat is molecular motion, and is produced by combustion. Heat used for cookery is obtained by the combustion of inflammable substances—wood, coal, charcoal, coke, gas, gasoline, kerosene, and alcohol—called fuels. Heat for cookery is applied by radiation, conduction, and convection.

Air is composed of oxygen, nitrogen, and argon, and surrounds everything. Combustion cannot take place without it, the oxygen of the air being the only supporter of combustion.

Moisture, in the form of water, either found in the food or added to it.

The combined effect of heat and moisture swells and bursts starch-grains; hardens albumen in eggs, fish, and meat; softens fibrous portions of meat, and cellulose of vegetables.

Among fuels, kerosene oil is the cheapest; gas gives the greatest amount of heat in the shortest time. *Soft wood*, like pine, on account of its coarse fibre, burns quickly; therefore makes the best kindling. *Hard wood*, like oak and ash, having the fibres closely packed, burns slowly, and is used in addition to pine wood for kindling coal. Where only wood is used as a fuel, it is principally hard wood.

Charcoal for fuel is produced by the smothered combustion of wood. It gives an intense, even heat, therefore makes a good broiling fire. Its use for kindling is not infrequent.

There are two kinds of coal: *Anthracite*, or *hard coal*. Examples: Hard and free-burning White Ash, Shamokin, and Franklin. Nut is any kind of hard coal obtained from screenings. *Bituminous*, or *soft coal*. Example: cannel coal.

Coke is the solid product of carbonized coal, and bears the same relation to coal that charcoal bears to wood.

Alcohol is employed as fuel when the chafing-dish is used.

Fire

Fire for cookery is confined in a stove or range, so that heat may be utilized and regulated. Flame-heat is obtained from kerosene, gas, or alcohol, as used in oil-stoves, gas-stoves or gas-ranges, and chafing-dishes.

A **cooking-stove** is a large iron box set on legs. It has a fire-box in the front, the sides of which are lined with fireproof material similar to that of which bricks are made. The bottom is furnished

with a movable iron grate. Underneath the fire-box is a space which extends from the grate to a pan for receiving ashes. At the back of fire-box is a compartment called the oven, accessible on each side of the stove by a door. Between the oven and the top of the stove is a space for the circulation of air.

Stoves are connected with chimney-flues by means of a stovepipe, and have dampers to regulate the supply of air and heat, and as an outlet for smoke and gases.

The damper below the fire-box is known as the *front damper*, by means of which the air supply is regulated, thus regulating the heat.

The oven is heated by a circulation of hot air. This is accomplished by closing the *oven-damper*, which is situated near the oven. When this damper is left open, the hot air rushes up the chimney. The damper near the chimney is known as the *chimney-damper*. When open it gives a free outlet for the escape of smoke and gas. When partially closed, as is usually the case in most ranges, except when the fire is started, it serves as a saver of heat. There is also a *check*, which, when open, cools the fire and saves heat, but should always be closed except when used for this purpose.

Stoves are but seldom used, portable ranges having taken their places.

A portable range is a cooking-stove with one oven door; it often has an under oven, of use for warming dishes and keeping food hot.

A set range is built in a fireplace. It usually has two ovens, one on each side of the fire-box, or two above it at the back. Set ranges, as they consume so large an amount of fuel, are being replaced by portable ones.

How To Build A Fire

Before starting to build a fire, free the grate from ashes. To do this, put on covers, close front and back dampers, and open oven-damper; turn grate, and ashes will fall into the ash receiver. If these rules are not followed, ashes will fly over the room. Turn grate back into place, remove the covers over fire-box, and cover grate with pieces of paper (twisted in centre and left loose at the ends). Cover paper with small sticks, or pieces of pine wood, being sure that the wood reaches the ends of fire-box, and so arranged that it will admit air. Over pine wood arrange hard wood; then sprinkle with two shovelfuls of coal. Put on covers, open closed dampers, strike a match,—sufficient friction is formed to burn the phosphorus, this in turn lights the sulphur, and the sulphur the wood,—then apply the lighted match under the grate, and you have a fire.

Now blacken the stove. Begin at front of range, and work towards the back; as the iron heats, a good polish may be obtained. When the wood is thoroughly kindled, add more coal. A blue flame will soon appear, which is the gas (CO) in the coal burning to carbon dioxide (CO₂), when the blue flame changes to a white flame; then the oven-damper should be closed. In a few moments the front damper may be nearly closed, leaving space to admit sufficient oxygen to feed the fire. It is sometimes forgotten that oxygen is necessary to keep a fire burning. As soon as the coal is well ignited, half close the chimney-damper, unless the draft be very poor.

Never allow the fire-box to be more than three-fourths filled. When full, the draft is checked, a larger amount of fuel is consumed, and much heat is lost. This is a point that should be impressed on the mind of the cook.

Ashes must be removed and sifted daily; pick over and save good coals,—which are known as cinders,—throwing out useless pieces, known as clinkers.

If a fire is used constantly during the day, replenish coal frequently, but in small quantities. If for any length of time the fire is not needed, open check, the dampers being closed; when again wanted for use, close check, open front damper, and with a poker rake out ashes from under fire, and wait for fire to burn brightly before adding new coal.

Coal when red hot has parted with most of its heat. Some refuse to believe this, and insist upon keeping dampers open until most of the heat has escaped into the chimney.

To keep a fire over night, remove the ashes from under the fire, put on enough coal to fill the box, close the dampers, and lift the back covers enough to admit air. This is better than lifting the covers over the fire-box and prevents poisonous gases entering the room.

Ways Of Cooking

The principal ways of cooking are boiling, broiling, stewing, roasting, baking, frying, sautéing, braising, and fricasseeing.

Boiling is cooking in boiling water. Solid food so cooked is called boiled food, though literally this expression is incorrect. Examples: boiled eggs, potatoes, mutton, etc.

Water boils at 212deg F. (sea level), and simmers at 185deg F. Slowly boiling water has the same temperature as rapidly boiling water, consequently is able to do the same work,—a fact often forgotten by the cook, who is too apt “to wood” the fire that water may boil vigorously.

Watery vapor and steam pass off from boiling water. Steam is invisible; watery vapor is visible, and is often miscalled steam. Cooking utensils commonly used admit the escape of watery vapor and steam; thereby much heat is lost if food is cooked in rapidly boiling water.

Water is boiled for two purposes: first, cooking of itself to destroy organic impurities; second, for cooking foods. Boiling water toughens and hardens albumen in eggs; toughens fibrin and dissolves tissues in meat; bursts starch-grains and softens cellulose in cereals and vegetables. Milk should never be allowed to boil. At boiling temperature (214deg F.) the casein is slightly hardened, and the fat is rendered more difficult of digestion. Milk heated over boiling water, as in a double boiler, is called *scalded milk*, and reaches a temperature of 196deg F. When foods are cooked over hot water the process is called steaming.

Stewing is cooking in a small amount of hot water for a long time at low temperature; it is the most economical way of cooking meats, as all nutriment is retained, and the ordinary way of cooking cheaper cuts. Thus fibre and connective tissues are softened, and the whole is made tender and palatable.

Broiling is cooking over or in front of a clear fire. The food to be cooked is usually placed in a greased broiler or on a gridiron held near the coals, turned often at first to sear the outside,—thus preventing escape of inner juices,—afterwards turned occasionally. Tender meats and fish may be cooked in this way. The flavor obtained by broiling is particularly fine; there is, however, a greater loss of weight in this than in any other way of cooking, as the food thus cooked is exposed to free circulation of air. When coal is not used, or a fire is not in condition for broiling, a plan for *pan broiling* has been adopted. This is done by placing food to be cooked in a hissing hot frying-pan, turning often as in broiling.

Roasting is cooking before a clear fire, with a reflector to concentrate the heat. Heat is applied in the same way as for broiling, the difference being that the meat for roasting is placed on a spit and allowed to revolve, thicker pieces alway being employed. Tin-kitchens are now but seldom used. Meats cooked in a range oven, though really baked, are said to be roasted. Meats so cooked are pleasing to the sight and agreeable to the palate, although, according to Edward Atkinson, not so easily digested as when cooked at a lower temperature in the Aladdin oven.

Baking is cooking in a range oven.

Frying is cooking by means of immersion in deep fat raised to a temperature of 350deg to 400deg F. For frying purposes olive oil, lard, beef drippings, cottolene, coto suet, and cocoanut butter are used. A combination of two-thirds lard and one-third beef suet (tried out and clarified) is better

than lard alone. Cottolene, coto suet, and cocoanut butter are economical, inasmuch as they may be heated to a high temperature without discoloring, therefore may be used for a larger number of fryings. Cod fat obtained from beef is often used by *chefs* for frying.

Great care should be taken in frying that fat is of the right temperature; otherwise food so cooked will absorb fat.

Nearly all foods which do not contain eggs are dipped in flour or crumbs, egg, and crumbs, before frying. The intense heat of fat hardens the albumen, thus forming a coating which prevents food from "soaking fat."

When meat or fish is to be fried, it should be kept in a warm room for some time previous to cooking, and wiped as dry as possible. If cold, it decreases the temperature of the fat to such extent that a coating is not formed quickly enough to prevent fat from penetrating the food. The ebullition of fat is due to water found in food to be cooked.

Great care must be taken that too much is not put into the fat at one time, not only because it lowers the temperature of the fat, but because it causes it to bubble and go over the sides of the kettle. It is not fat that boils, but water which fat has received from food.

All fried food on removal from fat should be drained on brown paper.

Rules for Testing Fat for Frying. 1. When the fat begins to smoke, drop in an inch cube of bread from soft part of loaf, and if in forty seconds it is golden brown, the fat is then of right temperature for frying any cooked mixture.

2. Use same test for uncooked mixtures, allowing one minute for bread to brown.

Many kinds of food may be fried in the same fat; new fat should be used for batter and dough mixtures, potatoes, and fishballs; after these, fish, meat, and croquettes. Fat should be frequently clarified.

To Clarify Fat. Melt fat, add raw potato cut in quarter-inch slices, and allow fat to heat gradually; when fat ceases to bubble and potatoes are well browned, strain through double cheese-cloth, placed over wire strainer, into a pan. The potato absorbs any odors or gases, and collects to itself some of the sediment, remainder settling to bottom of kettle.

When small amount of fat is to be clarified, add to cold fat boiling water, stir vigorously, and set aside to cool; the fat will form a cake on top, which may be easily removed; on bottom of the cake will be found sediment, which may be readily scraped off with a knife.

Remnants of fat, either cooked or uncooked, should be saved and tried out, and when necessary clarified.

Fat from beef, poultry, chicken, and pork, may be used for shortening or frying purposes; fat from mutton and smoked meats may be used for making hard and soft soap; fat removed from soup stock, the water in which corned beef has been cooked, and drippings from roast beef, may be tried out, clarified, and used for shortening or frying purposes.

To Try out Fat. Cut in small pieces and melt in top of a double boiler; in this way it will require less watching than if placed in kettle on the back of range. Leaf lard is tried out in the same way; in cutting the leaf, remove membrane. After straining lard, that which remains may be salted, pressed, and eaten as a relish, and is called scraps.

Sautéing is frying in a small quantity of fat. Food so cooked is much more difficult of digestion than when fried in deep fat; it is impossible to cook in this way without the food absorbing fat. A frying-pan or griddle is used; the food is cooked on one side, then turned, and cooked on the other.

Braising is stewing and baking (meat). Meat to be braised is frequently first sautéed to prevent escape of much juice in the gravy. The meat is placed in a pan with a small quantity of stock or water, vegetables (carrot, turnip, celery, and onion) cut in pieces, salt, pepper, and sweet herbs. The pan should have a tight-fitting cover. Meat so prepared should be cooked in an oven at low uniform

temperature for a long time. This is an economical way of cooking, and the only way besides stewing or boiling of making a large piece of tough meat palatable and digestible.

Fricasseeing is sautéing and serving with a sauce. Tender meat is fricasseed without previous cooking; less tender meat requires cooking in hot water before fricasseeing. Although veal is obtained from a young creature, it requires long cooking; it is usually sautéed, and then cooked in a sauce at low temperature for a long time.

Various Ways Of Preparing Food For Cooking

Egging and Crumbing. Use for crumbing dried bread crumbs which have been rolled and sifted, or soft stale bread broken in pieces and forced through a colander. An ingenious machine on the market, “The Bread Cramer,” does this work. Egg used for crumbing should be broken into a shallow plate and beaten with a silver fork to blend yolk and white; dilute each egg with two tablespoons water. The crumbs should be taken on a board; food to be fried should be first rolled in crumbs (care being taken that all parts are covered with crumbs), then dipped in egg mixture (equal care being taken to cover all parts), then rolled in crumbs again; after the last crumbing remove food to a place on the board where there are no crumbs, and shake off some of the outer ones which make coating too thick. A broad-bladed knife with short handle—the Teller knife—is the most convenient utensil for lifting food to be crumbed from egg mixture. Small scallops, oysters, and crabs are more easily crumbed by putting crumbs and fish in paper and shaking paper until the fish is covered with crumbs. The object of first crumbing is to dry the surface that egg may cling to it; and where a thin coating is desired flour is often used in place of crumbs.

Larding is introducing small pieces of fat salt pork or bacon through the surface of uncooked meat. The flavor of lean and dry meat is much improved by larding; tenderloin of beef (fillet), grouse, partridge, pigeon, and liver are often prepared in this way. Pig pork being firm, is best for larding. Pork should be kept in a cold place that it may be well chilled. Remove rind and use the part of pork which lies between rind and vein. With sharp knife (which is sure to make a clean cut) remove slices a little less than one-fourth inch thick; cut the slices into strips a little less than one-fourth inch wide; these strips should be two and one-fourth inches long, and are called *lardoons*. Lardoons for small birds—quail, for example—should be cut smaller and not quite so long. To lard, insert one end of lardoon into larding-needle, hold needle firmly, and with pointed end take up a stitch one-third inch deep and three-fourths inch wide; draw needle through, care being taken that lardoon is left in meat and its ends project to equal lengths. Arrange lardoons in parallel rows, one inch apart, stitches in the alternate rows being directly underneath each other. Lard the upper surface of cuts of meat with the grain, never across it. In birds, insert lardoons at right angles to breastbone on either side. When large lardoons are forced through meat from surface to surface, the process is called daubing. Example: Beef à la mode. Thin slices of fat salt pork placed over meat may be substituted for larding, but flavor is not the same as when pork is drawn through flesh, and the dish is far less sightly.

Boning is removing bones from meat or fish, leaving the flesh nearly in its original shape. For boning, a small sharp knife with pointed blade is essential. Legs of mutton and veal and loins of beef may be ordered boned at market, no extra charge being made.

Whoever wishes to learn how to bone should first be taught boning of a small bird; when this is accomplished, larger birds, chickens, and turkeys may easily be done, the processes varying but little. In large birds tendons are drawn from legs, and the wings are left on and boned.

How to Bone a Bird

In buying birds for boning, select those which have been fresh killed, dry picked, and not drawn. Singe, remove pinfeathers, head, and feet, and cut off wings close to body. Lay bird on a board, breast down.

Begin at neck and with sharp knife cut through the skin the entire length of body. Scrape the flesh from backbone until end of one shoulder-blade is found; scrape flesh from shoulder-blade and continue around wing joint, cutting through tendinous portions which are encountered; then bone other side. Scrape skin from backbone the entire length of body, working across the ribs. Free wishbone and collar-bones, at same time removing crop and windpipe; continue down breastbone, particular care being taken not to break the skin as it lies very near bone, or to cut the delicate membranes which enclose entrails. Scrape flesh from second joints and drumsticks, laying it back and drawing off as a glove may be drawn from the hand. Withdraw carcass and put flesh back in its original shape. In large birds where wings are boned, scrape flesh to middle joint, where bone should be broken, leaving bone at tip end to assist in preserving shape.

How to Measure

Correct measurements are absolutely necessary to insure the best results. Good judgment, with experience, has taught some to measure by sight; but the majority need definite guides.

Tin, granite-ware, and glass measuring cups, divided in quarters or thirds, holding one half-pint, and tea and table spoons of regulation sizes,—which may be bought at any store where kitchen furnishings are sold,—and a case knife, are essentials for correct measurement. Mixing-spoons, which are little larger than tablespoons, should not be confounded with the latter.

Measuring Ingredients. Flour, meal, powdered and confectioners' sugar, and soda should be sifted before measuring. Mustard and baking-powder, from standing in boxes, settle, therefore should be stirred to lighten; salt frequently lumps, and these lumps should be broken. A *cupful* is measured level. To measure a cupful, put in the ingredient by spoonfuls or from a scoop, round slightly, and level with a case knife, care being taken not to shake the cup. _A tablespoonful is measured level. A teaspoonful is measured level._

To measure tea or table spoonfuls, dip the spoon in the ingredient, fill, lift, and level with a knife, the sharp edge of knife being toward tip of spoon. Divide with knife lengthwise of spoon, for a half-spoonful; divide halves crosswise for quarters, and quarters crosswise for eighths. Less than one-eighth of a teaspoonful is considered a few grains.

Measuring Liquids. A cupful of liquid is all the cup will hold.

A tea or table spoonful is all the spoon will hold.

Measuring Butter, Lard, etc. To measure butter, lard, and other solid fats, pack solidly into cup or spoon, and level with a knife.

When dry ingredients, liquids, and fats are called for in the same recipe, measure in the order given, thereby using but one cup.

How to Combine Ingredients

Next to measuring comes care in combining,—a fact not always recognized by the inexperienced. Three ways are considered,—stirring, beating, and cutting and folding.

To stir, mix by using circular motion, widening the circles until all is blended. Stirring is the motion ordinarily employed in all cookery, alone or in combination with beating.

To beat, turn ingredient or ingredients over and over, continually bringing the under part to the surface, thus allowing the utensil used for beating to be constantly brought in contact with bottom of the dish and throughout the mixture.

To cut and fold, introduce one ingredient into another ingredient or mixture by two motions: with a spoon, a repeated vertical downward motion, known as cutting; and a turning over and over of mixture, allowing bowl of spoon each time to come in contact with bottom of dish, is called folding. These repeated motions are alternated until thorough blending is accomplished.

By stirring, ingredients are mixed; *by beating*, a large amount of air is enclosed; *by cutting and folding*, air already introduced is prevented from escaping.

Ways of Preserving

1. **By Freezing.** Foods which spoil readily are frozen for transportation, and must be kept packed in ice until used. Examples: Fish and poultry.

2. **By Refrigeration.** Foods so preserved are kept in cold storage. The cooling is accomplished by means of ice, or by a machine where compressed gas is cooled and then permitted to expand. Examples: meat, milk, butter, eggs, etc.

3. **By Canning.** Which is preserving in air-tight glass jars, or tin cans hermetically sealed. When fruit is canned, sugar is usually added.

4. **By Sugar.** Examples: fruit juices and condensed milk.

5. **By Exclusion of Air.** Foods are preserved by exclusion of air in other ways than canning. Examples: grapes in bran, eggs in lime water, etc.

6. **By Drying.** Drying consists in evaporation of nearly all moisture, and is generally combined with salting, except in vegetables and fruits.

7. **By Evaporation.** There are examples where considerable moisture remains, though much is driven off. Example: beef extract.

8. **By Salting.** There are two kinds of salting,—dry, and corning or salting in brine. Examples: salt codfish, beef, pork, tripe, etc.

9. **By Smoking.** Some foods, after being salted, are hung in a closed room for several hours, where hickory wood is allowed to smother. Examples: ham, beef, and fish.

10. **By Pickling.** Vinegar, to which salt is added, and sometimes sugar and spices, is scalded; and cucumbers, onions, and various kinds of fruit are allowed to remain in it.

11. **By Oil.** Examples: sardines, anchovies, etc.

12. **By Antiseptics.** The least wholesome way is by the use of antiseptics. Borax and salicylic acid, when employed, should be used sparingly.

Beverages

A beverage is any drink. Water is the beverage provided for man by Nature. Water is an essential to life. All beverages contain a large percentage of water, therefore their uses should be considered:—

- I. To quench thirst.
- II. To introduce water into the circulatory system.
- III. To regulate body temperature.
- IV. To assist in carrying off waste.
- V. To nourish.
- VI. To stimulate the nervous system and various organs.
- VII. For medicinal purposes.

Freshly boiled water should be used for making hot beverages; freshly drawn water for making cold beverages.

Tea

Tea is used by more than one-half the human race; and, although the United States is not a tea-drinking country, one and one-half pounds are consumed per capita per annum.

All tea is grown from one species of shrub, *Thea*, the leaves of which constitute the tea of commerce. Climate, elevation, soil, cultivation, and care in picking and curing all go to make up the differences. First-quality tea is made from young, whole leaves. Two kinds of tea are considered:—

Black tea, made from leaves which have been allowed to ferment before curing.

Green tea, made from unfermented leaves artificially colored.

The best black tea comes from India and Ceylon. Some familiar brands are Oolong, Formosa, English Breakfast, Orange Pekoe, and Flowery Pekoe. The last two named, often employed at the “five o’clock tea,” command high prices; they are made from the youngest leaves. Orange Pekoe is scented with orange leaves. The best green tea comes from Japan. Some familiar brands are Hyson, Japan, and Gunpowder.

From analysis, it has been found that tea is rich in protein, but taken as an infusion acts as a stimulant rather than as a nutrient. The nutriment is gained from sugar and milk served with it. The stimulating property of tea is due to the alkaloid, *theine*, together with an essential oil; it contains an astringent, tannin. Black tea contains less theine, essential oil, and tannin than green tea. The tannic acid, developed from the tannin by infusion, injures the coating of the stomach.

Although tea is not a substitute for food, it appears so for a considerable period of time, as its stimulating effect is immediate. It is certain that less food is required where much tea is taken, for by its use there is less wear of the tissues, consequently need of repair. When taken to excess, it so acts on the nervous system as to produce sleeplessness or insomnia, and finally makes a complete wreck of its victim. Taken in moderation, it acts as a mild stimulant, and ingests a considerable amount of water into the system; it heats the body in winter, and cools the body in summer. Children should never be allowed to drink tea, and it had better be avoided by the young, while it may be indulged in by the aged, as it proves a valuable stimulant as the functional activities of the stomach become weakened.

Freshly boiled water should be used for making tea. Boiled, because below the boiling-point the stimulating property, theine, would not be extracted. Freshly boiled, because long cooking renders it flat and insipid to taste on account of escape of its atmospheric gases. Tea should always be infused, never boiled. Long steeping destroys the delicate flavor by developing a larger amount of tannic acid.

How to Make Tea

- 3 teaspoons tea
- 2 cups boiling water

Scald an earthen or china teapot.

Put in tea, and pour on boiling water. Let stand on back of range or in a warm place five minutes. Strain and serve immediately, with or without sugar and milk. Avoid second steeping of leaves with addition of a few fresh ones. If this is done, so large an amount of tannin is extracted that various ills are apt to follow.

Five o’Clock Tea

When tea is made in dining or drawing-room, a “Five o’Clock Tea-kettle” (Samovar), and tea-ball or teapot are used.

Russian Tea

Follow recipe for making tea. Russian Tea may be served hot or cold, but always without milk. A thin slice of lemon, from which seeds have been removed, or a few drops of lemon juice, is allowed for each cup. Sugar is added according to taste. In Russia a preserved strawberry to each cup is considered an improvement. We imitate our Russian friends by garnishing with a candied cherry.

De John’s Tea

Follow recipe for making tea and serve hot, allowing three whole cloves to each cup. Sugar is added according to taste.

Iced Tea

- 4 teaspoons tea
- 2 cups boiling water

Follow recipe for making tea. Strain into glasses one-third full of cracked ice. Sweeten to taste, and allow one slice lemon to each glass tea. The flavor is much finer by chilling the infusion quickly.

Wellesley Tea

Make same as Iced Tea, having three crushed mint leaves in each glass into which the hot infusion is strained.

Coffee

The coffee-tree is native to Abyssinia, but is now grown in all tropical countries. It belongs to the genus *Coffea*, of which there are about twenty-two species. The seeds of berries of coffee-trees constitute the coffee of commerce. Each berry contains two seeds, with exception of maleberry, which is a single round seed. In their natural state they are almost tasteless; therefore color, shape, and size determine value. Formerly, coffee was cured by exposure to the sun; but on account of warm climate and sudden rainfalls, coffee was often injured. By the new method coffee is washed, and then dried by steam heat.

In coffee plantations, trees are planted in parallel rows, from six to eight feet apart, and are pruned so as never to exceed six feet in height. Banana-trees are often grown in coffee plantations, advantage being taken of their outspreading leaves, which protect coffee-trees from direct rays of the sun. Brazil produces about two-thirds the coffee used. Central America, Java, and Arabia are also coffee centres.

Tea comes to us ready for use; coffee needs roasting. In process of roasting the seeds increase in size, but lose fifteen per cent in weight. Roasting is necessary to develop the delightful aroma and flavor. Java coffee is considered finest. Mocha commands a higher price, owing to certain acidity and sparkle, which alone is not desirable; but when combined with Java, in proportion of two parts Java to one part Mocha, the coffee best suited to average taste is made. Some people prefer Maleberry Java; so especial care is taken to have maleberries separated, that they may be sold for higher price. Old Government Java has deservedly gained a good reputation, as it is carefully inspected, and its sale controlled by Dutch government. Strange as it may seem to the consumer, all coffee sold as Java does not come from the island of Java. Any coffee, wherever grown, having same characteristics and flavor, is sold as Java. The same is true of other kinds of coffee.

The stimulating property of coffee is due to the alkaloid *caffeine*, together with an essential oil. Like tea, it contains an astringent. Coffee is more stimulating than tea, although, weight for weight, tea contains about twice as much *theine* as coffee contains *caffeine*. The smaller proportion of tea used accounts for the difference. A cup of coffee with breakfast, and a cup of tea with supper, serve as a mild stimulant for an adult, and form a valuable food adjunct, but should never be found in the dietary of a child or dyspeptic. Coffee taken in moderation quickens action of the heart, acts directly upon the nervous system, and assists gastric digestion. Fatigue of body and mind are much lessened by moderate use of coffee; severe exposure to cold can be better endured by the coffee drinker. In times of war, coffee has proved more valuable than alcoholic stimulants to keep up the enduring power of soldiers. Coffee acts as an antidote for opium and alcoholic poisoning. Tea and coffee are much more readily absorbed when taken on an empty stomach; therefore this should be avoided except when used for medicinal purposes. Coffee must be taken in moderation; its excessive use means palpitation of the heart, tremor, insomnia, and nervous prostration.

Coffee is often adulterated with chiccory, beans, peas, and various cereals, which are colored, roasted, and ground. By many, a small amount of chiccory is considered an improvement, owing to the bitter principle and volatile oil which it contains. Chiccory is void of *caffeine*. The addition of chiccory may be detected by adding cold water to supposed coffee; if chiccory is present, the liquid will be quickly discolored, and chiccory will sink; pure coffee will float.

Buying of Coffee. Coffee should be bought for family use in small quantities, freshly roasted and ground; or, if one has a coffee-mill, it may be ground at home as needed. After being ground, unless kept air tight, it quickly deteriorates. If not bought in air-tight cans, with tight-fitting cover, or glass jar, it should be emptied into canister as soon as brought from grocer's.

Coffee may be served as filtered coffee, infusion of coffee, or decoction of coffee. Commonly

speaking, boiled coffee is preferred, and is more economical for the consumer. Coffee is ground fine, coarse, and medium; and the grinding depends on the way in which it is to be made. For filtered coffee have it finely ground; for boiled, coarse or medium.

Filtered Coffee

(French or Percolated)

- 1 cup coffee (finely ground)
- 6 cups boiling water

Various kinds of coffee pots are on the market for making filtered coffee. They all contain a strainer to hold coffee without allowing grounds to mix with infusion. Some have additional vessel to hold boiling water, upon which coffee-pot may rest.

Place coffee in strainer, strainer in coffee-pot, and pot on the range. Add gradually boiling water, and allow it to filter. Cover between additions of water. If desired stronger, re-filter. Serve at once with cut sugar and cream.

Put sugar and cream in cup before hot coffee. There will be perceptible difference if cream is added last. If cream is not obtainable, scalded milk may be substituted, or part milk and part cream may be used, if a diluted cup of coffee is desired.

Boiled Coffee

- 1 cup coffee
- 1 egg
- 1 cup cold water
- 6 cups boiling water

Scald *granite-ware* coffee-pot. Wash egg, break, and beat slightly. Dilute with one-half the cold water, add crushed shell, and mix with coffee. Turn into coffee-pot, pour on boiling water, and stir thoroughly. Place on front of range, and boil three minutes. If not boiled, coffee is cloudy; if boiled too long, too much tannic acid is developed. The spout of pot should be covered or stuffed with soft paper to prevent escape of fragrant aroma. Stir and pour some in a cup to be sure that spout is free from grounds. Return to coffee-pot and repeat. Add remaining cold water, which perfects clearing. Cold water being heavier than hot water sinks to the bottom, carrying grounds with it. Place on back of range for ten minutes, where coffee will not boil. Serve at once. If any is left over, drain from grounds, and reserve for making of jelly or other dessert.

Egg-shells may be saved and used for clearing coffee. Three egg-shells are sufficient to effect clearing where one cup of ground coffee is used. The shell performs no office in clearing except for the albumen which clings to it. Burnett's Crystal Coffee Settler, or salt fish-skin, washed, dried, and cut in inch pieces, is used for same purpose.

Coffee made with an egg has a rich flavor which egg alone can give. Where strict economy is necessary, if great care is taken, egg may be omitted. Coffee so made should be served from range, as much motion causes it to become roiled.

Tin is an undesirable material for a coffee-pot, as tannic acid acts on such metal and is apt to form a poisonous compound.

When coffee and scalded milk are served in equal proportions, it is called *Café au lait*. Coffee served with whipped cream is called *Vienna Coffee*.

To Make a Small Pot of Coffee. Mix one cup ground coffee with one egg, slightly beaten, and crushed shell. To one-third of this amount add one-third cup cold water. Turn into a scalded coffee-pot, add one pint boiling water, and boil three minutes. Let stand on back of range ten minutes; serve. Keep remaining coffee and egg closely covered, in a cool place, to use two successive mornings.

To Make Coffee for One. Allow two tablespoons ground coffee to one cup cold water. Add coffee to cold water, cover closely, and let stand over night. In the morning bring to a boiling-point. If carefully poured, a clear cup of coffee may be served.

After-Dinner Coffee

(*Black Coffee, or Café Noir*)

For after-dinner coffee use twice the quantity of coffee, or half the amount of liquid, given in previous recipes. Filtered coffee is often preferred where milk or cream is not used, as is always the case with black coffee. Serve in after-dinner coffee cups, with or without cut sugar.

Coffee retards gastric digestion; but where the stomach has been overtaxed by a hearty meal, café noir may prove beneficial, so great are its stimulating effects.

Kola

The preparations on the market made from the kola-nut have much the same effect upon the system as coffee and chocolate, inasmuch as they contain caffeine and theobromine; they are also valuable for their diastase and a milk-digesting ferment.

Cocoa And Chocolate

The cacao-tree (*Theobroma cacao*) is native to Mexico. Although successfully cultivated between the twentieth parallels of latitude, its industry is chiefly confined to Mexico, South America, and the West Indies. Cocoa and chocolate are both prepared from seeds of the cocoa bean. The bean pod is from seven to ten inches long, and three to four and one-half inches in diameter. Each pod contains from twenty to forty seeds, imbedded in mucilaginous material. Cocoa beans are dried previous to importation. Like coffee, they need roasting to develop flavor. After roasting, outer covering of bean is removed; this covering makes what is known as *cocoa shells*, which have little nutritive value. The beans are broken and sold as *cocoa nibs*.

The various preparations of cocoa on the market are made from the ground cocoa nibs, from which, by means of hydraulic pressure, a large amount of fat is expressed, leaving a solid cake. This in turn is pulverized and mixed with sugar, and frequently a small amount of corn-starch or arrowroot. To some preparations cinnamon or vanilla is added. Broma contains both arrowroot and cinnamon.

Chocolate is made from cocoa nibs, but contains a much larger proportion of fat than cocoa preparations. Bitter, sweet, or flavored chocolate is always sold in cakes.

The fat obtained from cocoa bean is *cocoa butter*, which gives cocoa its principal nutrient.

Cocoa and chocolate differ from tea and coffee inasmuch as they contain nutriment as well as stimulant. *Theobromine*, the active principle, is almost identical with theine and caffeine in its composition and effects.

Many people who abstain from the use of tea and coffee find cocoa indispensable. Not only is it valuable for its own nutriment, but for the large amount of milk added to it. Cocoa may be

well placed in the dietary of a child after his third year, while chocolate should be avoided as a beverage, but may be given as a confection. Invalids and those of weak digestion can take cocoa where chocolate would prove too rich.

Cocoa Shells

- 1 cup cocoa shells

Boil shells and water three hours; as water boils away it will be necessary to add more. Strain, and serve with milk and sugar. By adding one-third cup cocoa nibs, a much more satisfactory drink is obtained.

Cracked Cocoa

- 1/4 cup sugar
- A few grains salt
- 4 cups milk

- 3 cups milk

Scald milk. Melt chocolate in small saucepan placed over hot water, add sugar, salt, and gradually boiling water; when smooth, place on range and boil one minute; add to scalded milk, mill, and serve in chocolate cups with whipped cream. One and one-half ounces vanilla chocolate may be substitute for Baker's chocolate; being sweetened, less sugar is required.

Chocolate II

Prepare same as Chocolate I., substituting one can evaporated cream or condensed milk diluted with two cups boiling water in place of three cups milk. If sweetened condensed milk is used, omit sugar.

Chocolate III

- 2 ozs. sweetened chocolate
- 4 cups milk
- Few grains salt
- Whipped cream

Scald milk, add chocolate, and stir until chocolate is melted. Bring to boiling-point, mill, and serve in chocolate cups with whipped cream sweetened and flavored.

Bread And Bread Making

Bread is the most important article of food, and history tells of its use thousands of years before the Christian era. Many processes have been employed in making and baking; and as a result, from the first flat cake has come the perfect loaf. The study of bread making is of no slight importance, and deserves more attention than it receives.

Considering its great value, it seems unnecessary and wrong to find poor bread on the table; and would that our standard might be raised as high as that of our friends across the water! Who does not appreciate the loaf produced by the French baker, who has worked months to learn the art of bread making?

Bread is made from flour of wheat, or other cereals, by addition of water, salt, and a ferment. Wheat flour is best adapted for bread making, as it contains gluten in the right proportion to make the spongy loaf. But for its slight deficiency in fat, wheat bread is a perfect food; hence arose the custom of spreading it with butter. It should be remembered, in speaking of wheat bread as perfect food, that it must be made of flour rich in gluten. Next to wheat flour ranks rye in importance for bread making; but it is best used in combination with wheat, for alone it makes heavy, sticky, moist bread. Corn also needs to be used in combination with wheat for bread making, for if used alone the bread will be crumbly.

The miller, in order to produce flour which will make the white loaf (so slightly to many), in the process of grinding wheat has been forced to remove the inner bran coats, so rich in mineral matter, and much of the gluten intimately connected with them.

To understand better the details of bread making, wheat, from which bread is principally made, should be considered.

A grain of wheat consists of (1) an outer covering or husk, which is always removed before milling; (2) bran coats, which contain mineral matter; (3) gluten, the protein matter and fat; and (4) starch, the centre and largest part of the grain. Wheat is distinguished as *white* and *soft*, or *red* and *hard*. The former is known as *winter wheat*, having been sown in the fall, and living through the winter; the latter is known as *spring wheat*, having been sown in the spring. From winter wheat, pastry flour, sometimes called St. Louis, is made; from spring wheat, bread flour, also called Haxall. St. Louis flour takes its name from the old process of grinding; Haxall, from the name of the inventor of the new process. All flours are now milled by the same process. For difference in composition of wheat flours, consult table in Chapter VI on Cereals.

Wheat is milled for converting into flour by processes producing essentially the same results, all requiring cleansing, grinding, and bolting. Entire wheat flour has only the outer husk removed, the remainder of the kernel being finely ground. *Graham flour*, confounded with entire wheat, is too often found to be an inferior flour, mixed with coarse bran.

Grinding is accomplished by one of four systems: (1) low milling; (2) Hungarian system, or high milling; (3) roller-milling; and (4) by a machine known as disintegrator.

In low milling process, grooved stones are employed for grinding. The stones are enclosed in a metal case, and provision is made within case for passage of air to prevent wheat from becoming overheated. The lower stone being permanently fixed, the upper stone being so balanced above it that grooves may exactly correspond, when upper stone rotates, sharp edges of grooves meet each

other, and operate like a pair of scissors. By this process flour is made ready for bolting by one grinding.

In high milling process, grooved stones are employed, but are kept so far apart that at first the wheat is only bruised, and a series of grindings and siftings is necessary. This process is applicable only to the hardest wheats, and is partially supplanted by roller-milling.

In roller-milling, wheat is subjected to action of a pair of steel or chilled-iron horizontal rollers, having toothed surfaces. They revolve in opposite directions, at different rates of speed, and have a cutting action.

Porcelain rollers, with rough surfaces, are sometimes employed. In this system, grinding is accomplished by cutting rather than crushing.

“The **disintegrator** consists of a pair of circular metal disks, set face to face, studded with circles of projecting bars so arranged that circles of bars on one disk alternate with those of the other. The disks are mounted on the same centre, and so closely set to one another that projecting bars of one disk come quite close to plane surface of the other. They are enclosed within an external casing. The disks are caused to rotate in opposite directions with great rapidity, and the grain is almost instantaneously reduced to a powder.”

After grinding comes bolting, by which process the different grades of flour are obtained. The ground wheat is placed in octagonal cylinders (covered with silk or linen bolting-cloth of different degrees of fineness), which are allowed to rotate, thus forcing the wheat through. The flour from first siftings contains the largest percentage of gluten.

Flour is branded under different names to suit manufacturer or dealer. In consequence, the same wheat, milled by the same process, makes flour which is sold under different names.

In buying flour, whether bread or pastry, select the best kept by your grocer. Some of the well-known brands of bread flour are King Arthur, Swan's Down, Bridal Veil, Columbia, Washburn's Extra, and Pillsbury's Best; of pastry, Best St. Louis. Bread flour should be used in all cases where yeast is called for, with few exceptions; in other cases, pastry flour. The difference between bread and pastry flour may be readily determined. Take bread flour in the hand, close hand tightly, then open, and flour will not keep in shape; if allowed to pass through fingers it will feel slightly granular. Take pastry flour in the hand, close hand tightly, open, and flour will be in shape, having impression of the lines of the hand, and feeling soft and velvety to touch. Flour should always be sifted before measuring.

Entire wheat flour differs from ordinary flour inasmuch as it contains all the gluten found in wheat, the outer husk of kernels only being removed, the remainder ground to different degrees of fineness and left unbolted. Such flours are sold by the different health food companies, who have agencies in the large cities. Franklin Mills, Old Grist Mill, and Health Food flours are included in this class.

Gluten, the protein of wheat, is a gray, tough, elastic substance, insoluble in water. On account of its great power of expansion, it holds the gas developed in bread dough by fermentation, which otherwise would escape.

Yeast

Yeast is a microscopic plant of fungous growth, and is the lowest form of vegetable life. It consists of spores, or germs, found floating in air, and belongs to a family of which there are many species. These spores grow by budding and division, and multiply very rapidly under favorable conditions, and produce fermentation.

Fermentation is the process by which, under influence of air, warmth, moisture, and some

ferment, sugar (or dextrose, starch converted into sugar) is changed into alcohol (C_2H_5HO) and carbon dioxide (CO_2). The product of all fermentation is the same. Three kinds are considered,—alcoholic, acetic, and lactic. Where bread dough is allowed to ferment by addition of yeast, the fermentation is *alcoholic*; where alcoholic fermentation continues too long, *acetic* fermentation sets in, which is a continuation of alcoholic. *Lactic* fermentation is fermentation which takes place when milk sours.

Liquid, dry, or compressed yeast may be used for raising bread. The compressed yeast cakes done up in tinfoil have long proved satisfactory, and are now almost universally used, having replaced the home-made liquid yeast. Never use a yeast cake unless perfectly fresh, which may be determined by its light color and absence of dark streaks.

The *yeast plant* is killed at 212deg F.; life is suspended, but not entirely destroyed, 32deg F. The temperature best suited for its growth is from 65deg to 68deg F. The most favorable conditions for the growth of yeast are a warm, moist, sweet, nitrogenous soil. These must be especially considered in bread making.

Bread Making

Fermented bread is made by mixing to a dough, flour, with a definite quantity of water, milk, or water and milk, salt, and a ferment. Sugar is usually added to hasten fermentation. Dough is then kneaded that the ingredients may be thoroughly incorporated, covered, and allowed to rise in a temperature of 68deg F., until dough has doubled its bulk. This change has been caused by action of the ferment, which attacks some of the starch in flour, and changes it to sugar, and sugar in turn to alcohol and carbon dioxide, thus lightening the whole mass. Dough is then kneaded a second time to break bubbles and distribute evenly the carbon dioxide. It is shaped in loaves, put in greased bread pans (they being half filled), covered, allowed to rise in temperature same as for first rising, to double its bulk. If risen too long, it will be full of large holes; if not risen long enough, it will be heavy and soggy. If pans containing loaves are put in too hot a place while rising, a heavy streak will be found near bottom of loaf.

How to Shape Loaves and Biscuits. To shape bread dough in loaves, divide dough in parts, each part large enough for a loaf, knead until smooth, and if possible avoid seams in under part of loaf. If baked in brick pan, place two loaves in one pan, brushed between with a little melted butter. If baked in long shallow pan, when well kneaded, roll with both hands to lengthen, care being taken that it is smooth and of uniform thickness. Where long loaves are baked on sheets, shape and roll loosely in a towel sprinkled with corn meal for last rising.

To shape bread dough in biscuits, pull or cut off as many small pieces (having them of uniform size) as there are to be biscuits. Flour palms of hands slightly; take up each piece and shape separately, lifting, with thumb and first two fingers of right hand, and placing in palm of left hand, constantly moving dough round and round, while folding towards the centre; when smooth, turn it over and roll between palms of hands. Place in greased pans near together, brushed between with a little melted butter, which will cause biscuits to separate easily after baking. For finger rolls, shape biscuits and roll with one hand on part of board where there is no flour, until of desired length, care being taken to make smooth, of uniform size, and round at ends.

Biscuits may be shaped in a great variety of ways, but they should always be small. Large biscuits, though equally good, never tempt one by their daintiness.

Bread is often brushed over with milk before baking, to make a darker crust.

Where bread is allowed to rise over night, a small piece of yeast cake must be used; one-fourth yeast cake to one pint liquid is sufficient, one-third yeast cake to one quart liquid. Bread mixed and

baked during the day requires a larger quantity of yeast; one yeast cake, or sometimes even more, to one pint of liquid. Bread dough mixed with a large quantity of yeast should be watched during rising, and cut down as soon as mixture doubles its bulk. If proper care is taken, the bread will be found most satisfactory, having neither “yeasty” nor sour taste.

Fermented bread was formerly raised by means of leaven.

Baking Of Bread

Bread is baked: (1) To kill ferment, (2) to make soluble the starch, (3) to drive off alcohol and carbon dioxide, and (4) to form brown crust of pleasant flavor. Bread should be baked in a hot oven. If the oven be too hot the crust will brown quickly before the heat has reached the centre, and prevent further rising; loaf should continue rising for first fifteen minutes of baking, when it should begin to brown, and continue browning for the next twenty minutes. The last fifteen minutes it should finish baking, when the heat may be reduced. When bread is done, it will not cling to sides of pan, and may be easily removed. Biscuits require more heat than loaf bread, should continue rising the first five minutes, and begin to brown in eight minutes. Experience is the best guide for testing temperature of oven. Various oven thermometers have been made, but none have proved practical. Bread may be brushed over with melted butter, three minutes before removal from oven, if a more tender crust is desired.

Care Of Bread After Baking

Remove loaves at once from pans, and place side down on a wire bread or cake cooler. If a crisp crust is desired, allow bread to cool without covering; if soft crust, cover with a towel during cooling. When cool, put in tin box or stone jar, and cover closely.

Never keep bread wrapped in cloth, as the cloth will absorb moisture and transmit an unpleasant taste to bread. Bread tins or jars should be washed and scalded twice a week in winter, and every other day in summer; otherwise bread is apt to mould. As there are so many ways of using small and stale pieces of bread, care should be taken that none is wasted.

Unfermented bread is raised without a ferment, the carbon dioxide being produced by the use of soda (alkaline salt) and an acid. Soda, employed in combination with cream of tartar, for raising mixtures, in proportion of one-third soda to two-thirds cream of tartar, was formerly used to a great extent, but has been generally superseded by baking powder.

Soda bicarbonate (NaHCO_3) is manufactured from sodium chloride (NaCl), common salt or cryolite.

Baking powder is composed of soda and cream of tartar in definite, correct proportions, mixed with small quantity of dry material (flour or corn-starch) to keep action from taking place. If found to contain alum or ammonia, it is impure. In using baking powder, allow two teaspoons baking powder to each cup of flour, when eggs are not used; to egg mixtures allow one and one-half teaspoons baking powder. When a recipe calls for soda and cream of tartar, in substituting baking powder use double amount of cream of tartar given.

These rules apply to the various soda and cream of tartar baking powders on the market. Horsford's Baking Powder, the only mineral one, requires one-third less than others.

Soda and cream of tartar, or baking powder mixtures, are made light by liberation of gas in mixture; the gas in soda is set free by the acid in cream of tartar; in order to accomplish this, moisture and heat are both required. As soon as moisture is added to baking powder mixtures, the

gas will begin to escape; hence the necessity of baking as soon as possible. If baking powder only is used for raising, put mixture to be cooked in a hot oven.

Cream of tartar ($\text{HKC}_4\text{O}_6\text{H}_4$) is obtained from argols found adhering to bottom and sides of wine casks, which are ninety per cent cream of tartar. The argols are ground and dissolved in boiling water, coloring matter removed by filtering through animal charcoal, and by a process of recrystallization the cream of tartar of commerce is obtained.

The acid found in molasses, sour milk, and lemon juice will liberate gas in soda, but the action is much quicker than when cream of tartar is used.

Fermented and unfermented breads are raised to be made light and porous, that they may be easily acted upon by the digestive ferments. Some mixtures are made light by beating sufficiently to enclose a large amount of air, and when baked in a hot oven air is forced to expand.

Aerated bread is made light by carbon dioxide forced into dough under pressure. The carbon dioxide is generated from sulphuric acid and lime. Aerated bread is of close texture, and has a flavor peculiar to itself. It is a product of the baker's skill, but has found little favor except in few localities.

Water Bread

- 2 cups boiling water
- 1 tablespoon butter
- 1 tablespoon lard
- 1 tablespoon sugar
- 1 1/2 teaspoons salt
- 1/4 yeast cake dissolved in
- 1/4 cup lukewarm water
- 6 cups sifted flour

Put butter, lard, sugar, and salt in bread raiser, or large bowl without a lip; pour on boiling water; when lukewarm, add dissolved yeast cake and five cups of flour; then stir until thoroughly mixed, using a knife or mixing-spoon. Add remaining flour, mix, and turn on a floured board, leaving a clean bowl; knead until mixture is smooth, elastic to touch, and bubbles may be seen under the surface. Some practice is required to knead quickly, but the motion once acquired will never be forgotten. Return to bowl, cover with a clean cloth kept for the purpose, and board or tin cover; let rise over night in temperature of 65deg F. In morning cut down: this is accomplished by cutting through and turning over dough several times with a case knife, and checks fermentation for a short time; dough may be again raised, and recut down if it is not convenient to shape into loaves or biscuits after first cutting. When properly cared for, bread need never sour. Toss on board slightly floured, knead, shape into loaves or biscuits, place in greased pans, having pans nearly half full. Cover, let rise again to double its bulk, and bake in hot oven. (See Baking of Bread and Time Table for Baking.) This recipe will make a double loaf of bread and pan of biscuit. Cottolene, coto suet, or beef drippings may be used for shortening, one-third less being required. Bread shortened with butter has a good flavor, but is not as white as when lard is used.

Milk And Water Bread

1 cup scalded milk 1 cup boiling water 1 tablespoon lard 1 tablespoon butter 1 1/2 teaspoon salt 1 yeast cake dissolved in 1/4 cup lukewarm water 6 cups sifted flour, or one cup white flour and enough entire wheat flour to knead

Prepare and bake as Water Bread. When entire wheat flour is used add three tablespoons molasses. Bread may be mixed, raised, and baked in five hours, by using one yeast cake. Bread made in this way has proved most satisfactory. It is usually mixed in the morning, and the cook is able to watch the dough while rising and keep it at uniform temperature. It is often desirable to place bowl containing dough in pan of water, keeping water at uniform temperature of from 95deg to 100deg F. Cooks who have not proved themselves satisfactory bread makers are successful when employing this method.

Entire Wheat Bread

- 2 cups scalded milk
- 1/4 cup sugar or
- 1/3 cup molasses
- 1 teaspoon salt
- 1 yeast cake dissolved in
- 1/4 cup lukewarm water
- 4 2/3 cups coarse entire wheat flour

Add sweetening and salt to milk; cool, and when lukewarm add dissolved yeast cake and flour; beat well, cover, and let rise to double its bulk. Again beat, and turn into greased bread pans, having pans one-half full; let rise, and bake. Entire Wheat Bread should not quite double its bulk during last rising. This mixture may be baked in gem pans.

German Caraway Bread

Follow recipe for Milk and Water Bread (see p. 54), using rye flour in place of entire wheat flour, and one tablespoon sugar for sweetening. After first rising while kneading add one-third tablespoon caraway seed. Shape, let rise again, and bake in a loaf.

Entire Wheat And White Flour Bread

Use same ingredients as for Entire Wheat Bread, with exception of flour. For flour use three and one-fourth cups entire wheat and two and three-fourths cups white flour. The dough should be slightly kneaded, and if handled quickly will not stick to board. Loaves and biscuits should be shaped with hands instead of pouring into pans, as in Entire Wheat Bread.

Graham Bread

- 2 1/2 cups hot liquid (water, or milk and water)

- 1/3 cup molasses
- 1 1/2 teaspoons salt
- 1/4 yeast cake dissolved in
- 1/4 cup lukewarm water
- 3 cups flour
- 3 cups Graham flour

Prepare and bake as Entire Wheat Bread. The bran remaining in sieve after sifting Graham flour should be discarded.

Third Bread

- 2 cups lukewarm water
- 1 yeast cake
- 1/2 tablespoon salt
- 1/2 cup molasses
- 1 cup rye flour
- 1 cup granulated corn meal
- 3 cups flour

Dissolve yeast cake in water, add remaining ingredients, and mix thoroughly. Let rise, shape, let rise again, and bake as Entire Wheat Bread.

Rolled Oats Bread

- 2 cups boiling water
- 1/2 cup molasses
- 1/2 tablespoon salt
- 1 tablespoon butter

- 1/2 cup lukewarm water
- 1 cup Rolled Oats
- 4 1/2 cups flour

Add boiling water to oats and let stand one hour; add molasses, salt, butter, dissolved yeast cake, and flour; let rise, beat thoroughly, turn into buttered bread pans, let rise again, and bake. By using one-half cup less flour, the dough is better suited for biscuits, but, being soft, is difficult to handle. To make shaping of biscuits easy, take up mixture by spoonfuls, drop into plate of flour, and have palms of hands well covered with flour before attempting to shape.

Rye Biscuit

- 1 cup boiling water
- 1 cup rye flakes
- 2 tablespoons butter
- 1/3 cup molasses

- Flour

Make same as Rolled Oats Bread.

- 1 cup scalded milk
- 1 cup boiling water
- 1 tablespoon lard
- 1 tablespoon butter
- 1/3 cup brown sugar
- 1 1/2 teaspoons salt
- 1/4 yeast cake dissolved in
- 1/4 cup lukewarm water
- 3 cups flour

To milk and water add lard, butter, sugar, and salt; when lukewarm, add dissolved yeast cake and flour, beat thoroughly, cover, and let rise until light. Add rye meal until dough is stiff enough to knead; knead thoroughly, let rise, shape in loaves, let rise again, and bake.

Date Bread

Use recipe for Health Food Muffins (see p. 67). After the first rising, while kneading, add two-thirds cup each of English walnut meats cut in small pieces, and dates stoned and cut in pieces. Shape in a loaf, let rise in pan, and bake fifty minutes in a moderate oven. This bread is well adapted for sandwiches.

Boston Brown Bread

- 1 cup rye meal
- 1 cup granulated corn meal

- 1 cup Graham flour
- 3/4 tablespoon soda
- 1 teaspoon salt
- 3/4 cup molasses
- 2 cups sour milk, or 1 3/4 cups sweet milk or water

Mix and sift dry ingredients, add molasses and milk, stir until well mixed, turn into a well-buttered mould, and steam three and one-half hours. The cover should be buttered before being placed on mould, and then tied down with string; otherwise the bread in rising might force off cover. Mould should never be filled more than two-thirds full. A melon mould or one-pound baking-powder boxes make the most attractive-shaped loaves, but a five-pound lard pail answers the purpose. For steaming, place mould on a trivet in kettle containing boiling water, allowing water to come half-way up around mould, cover closely, and steam, adding, as needed, more boiling water.

New England Brown Bread

- 1 1/2 cups stale bread
- 3 1/4 cups cold water
- 3/4 cup molasses
- 1 1/2 teaspoons salt
- 11/2 cups rye meal

- 11/2 cups graham flour
- 3 teaspoons soda

Soak bread in two cups of the water over night. In the morning rub through colander, add molasses, dry ingredients mixed and sifted, and remaining water. Stir until well mixed, fill buttered one-pound baking-powder boxes two-thirds full, cover, and steam two hours.

Indian Bread

- 1 1/2 cups Graham flour
- 1 cup Indian meal
- 1/2 tablespoon soda
- 1 teaspoon salt
- 1/2 cup molasses
- 1 2/3 cups milk

Steamed Graham Bread

- 3 cups Arlington meal
- 1 cup flour
- 3 1/2 teaspoons soda
- 1 teaspoon salt
- 1 cup molasses (scant)
- 2 1/2 cups sour milk

Mix same as Boston Brown Bread and steam four hours. This bread may often be eaten when bread containing corn meal could not be digested.

Parker House Rolls

- 2 cups scalded milk
- 3 tablespoons butter
- 2 tablespoons sugar
- 1 teaspoon salt
- 1 yeast cake dissolved in
- 1/4 cup lukewarm water
- Flour

Add butter, sugar, and salt to milk; when lukewarm, add dissolved yeast cake and three cups of flour. Beat thoroughly, cover, and let rise until light; cut down, and add enough flour to knead (it will take about two and one-half cups). Let rise again, toss on slightly floured board, knead, pat, and roll out to one-third inch thickness. Shape with biscuit-cutter, first dipped in flour. Dip the handle of a case knife in flour, and with it make a crease through the middle of each piece; brush over one-half of each piece with melted butter, fold, and press edges together. Place in greased pan, one inch apart, cover, let rise, and bake in hot oven twelve to fifteen minutes. As rolls rise they will part slightly, and if hastened in rising are apt to lose their shape.

Parker House Rolls may be shaped by cutting or tearing off small pieces of dough, and shaping round like a biscuit; place in rows on floured board, cover, and let rise fifteen minutes. With handle of large wooden spoon, or toy rolling-pin, roll through centre of each biscuit, brush edge of lower halves with melted butter, fold, press lightly, place in buttered pan one inch apart, cover, let rise, and bake.

Salad Or Dinner Rolls

Use same ingredients as for Parker House Rolls, allowing one-fourth cup butter. Shape in small biscuits, place in rows on a floured board, cover with cloth and pan, and let rise until light and well puffed. Flour handle of wooden spoon and make a deep crease in middle of each biscuit, take up, and press edges together. Place closely in buttered pan, cover, let rise, and bake twelve to fifteen minutes in hot oven. From this same mixture crescents, braids, twists, bow-knots, clover leaves, and other fancy shapes may be made.

Sticks

- 1 cup scalded milk
- 1/4 cup butter
- 1 1/2 tablespoons sugar
- 1/2 teaspoon salt
- 1 yeast cake dissolved in
- 1/4 cup lukewarm water
- 1 egg white
- 3 3/4 cups flour

Add butter, sugar, and salt to milk; when lukewarm, add dissolved yeast cake, white of egg well beaten, and flour. Knead, let rise, shape, let rise again, and start baking in a hot oven, reducing heat, that sticks may be crisp and dry. To shape sticks, first shape as small biscuits, roll on board (where there is no flour) with hands until eight inches in length, keeping of uniform size and rounded ends, which may be done by bringing fingers close to, but not over, ends of sticks.

Salad Sticks

Follow recipe for Sticks. Let rise, and add salt to dough, allowing two teaspoons to each cup of dough. Shape in small sticks, let rise again, sprinkle with salt, and bake in a slow oven. If preferred glazed, brush over with egg yolk slightly beaten and diluted with one-half tablespoon cold water.

Bread For Garnishing

Dry toast is often used for garnishing, cut in various shapes. Always shape before toasting. Cubes of bread, toast points, and small oblong pieces are most common. Cubes of stale bread, from which centres are removed, are fried in deep fat and called croûstades; half-inch cubes, browned in butter, or fried in deep fat, are called croûtons.

Uses For Stale Bread

All pieces of bread should be saved and utilized. Large pieces are best for toast. Soft stale bread, from which crust is removed, when crumbed, is called stale breadcrumbs, or raspings, and is used for puddings, griddle-cakes, omelets, scalloped dishes, and dipping food to be fried. Remnants of bread, from which crusts have not been removed, are dried in oven, rolled, and sifted. These are called dry bread crumbs, and are useful for crumbing croquettes, cutlets, fish, meat, etc.

Toss on a floured board, pat and roll lightly to one-half inch in thickness. Shape with a biscuit-cutter.

Place on buttered pan, and bake in hot oven twelve to fifteen minutes. If baked in too slow an oven, the gas will escape before it has done its work. Many obtain better results by using bread flour.

Cereals

Cereals (cultivated grasses) rank first among vegetable foods; being of hardy growth and easy cultivation, they are more widely diffused over the globe than any of the flowering plants. They include wheat, oats, rye, barley, maize (Indian corn), and rice; some authorities place buckwheat among them. Wheat probably is the most largely consumed; next to wheat, comes rice.

Department of Agriculture, Washington, D. C.

Macaroni, *spaghetti*, and *vermicelli* are made from wheaten flour, rich in gluten, moistened to a stiff dough with water, and forced through small apertures in an iron plate by means of a screw press. Various Italian pastes are made from the same mixture. Macaroni is manufactured to some extent in this country, but the best comes from Italy, Lagana and Pejero, being the favorite brand. When macaroni is colored, it is done by the use of saffron, not by eggs, as is generally supposed. The only egg macaroni is manufactured in strips, and comes from Minneapolis.

Macaroni is valuable food, as it is very cheap and nutritious; but being deficient in fat, it should be combined with cream, butter, or cheese, to make a perfect food.

From cereals many preparations are made, used alone, or in combination with other food products. From rice is made rice flour; from oats, oatmeal, and oats steam-cooked and rolled,—as Rolled Avena, Quaker Rolled Oats, H-O, etc. There are many species of corn, the principal varieties being white, yellow, and red. From corn is made corn meal,—both white and yellow,—corn-starch, hominy, maizena, cerealine, samp, and hulled corn; from wheat, wheaten or white flour, Wheatena, Wheatlet, Rolled Wheat, Pettijohn's, etc. Rye is used for Rye Flakes, meal, and flour; barley, for flour and pearl barley. Buckwheat, throughout the United States, is used only when made into flour for buckwheat cakes.

For family use, cereals should be bought in small quantities, and kept in glass jars, tightly covered. Many cereal preparations are on the market for making breakfast mushes, put up in one and two pound packages, with directions for cooking. In nearly all cases, time allowed for cooking is not

sufficient, unless dish containing cereal is brought in direct contact with fire, which is not the best way. Mushes should be cooked over hot water after the first five minutes; if a double boiler is not procurable, improvise one. Boiling water and salt should always be added to cereals, allowing one teaspoon salt to each cup of cereal,—boiled to soften cellulose and swell starch-grains, salted to give flavor. Indian meal and finely ground preparations should be mixed with cold water before adding boiling water, to prevent lumping.

Core apples, leaving large cavities; pare, and cook until soft in syrup made by boiling sugar and water together, allowing one cup sugar to one and one-half cups water. Mush left over from breakfast may be packed in greased, one pound baking-powder box, and covered, which will prevent crust from forming. The next morning remove from box, slice thinly, dip in flour, and sauté. Serve with maple syrup.

Fried Corn Meal Mush, Or Fried Hominy

Pack corn meal or hominy mush in greased, one pound baking-powder boxes, or small bread pan, cool, and cover. Cut in thin slices, and sauté; cook slowly, if preferred crisp and dry. Where mushes are cooked to fry, use less water in steaming.

- 2 quarts boiling water
- 1 tablespoon salt
- *French Chef*

Pick over rice; add slowly to boiling, salted water, so as not to check boiling of water. Boil thirty minutes, or until soft, which may be determined by testing kernels. Old rice absorbs much more water than new rice, and takes longer for cooking. Drain in coarse strainer, and pour over one quart hot water; return to kettle in which it was cooked; cover, place on back of range, and let stand to dry off, when kernels are distinct. When stirring rice, always use a fork to avoid breaking kernels.

Steamed Rice

- 1 cup rice
- 1 teaspoon salt
- 2 3/4 to 3 1/4 cups boiling water (according to age of rice)

Put salt and water in top of double boiler, place on range, and add gradually well-washed rice, stirring with a fork to prevent adhering to boiler. Boil five minutes, cover, place over under part double boiler, and steam forty-five minutes, or until kernels are soft; uncover, that steam may escape. When rice is steamed for a simple dessert, use one-half quantity of water given in recipe, and steam until rice has absorbed water; then add scalded milk for remaining liquid.

To wash rice. Put rice in strainer, place strainer over bowl nearly full of cold water; rub rice between hands, lift strainer from bowl, and change water. Repeat process three or four times, until water is quite clear.

Rice With Cheese

Steam one cup rice, allowing one tablespoon salt; cover bottom of buttered pudding-dish with rice, dot over with three-fourths tablespoon butter, sprinkle with thin shavings mild cheese and a few grains cayenne; repeat until rice and one-fourth pound cheese are used. Add milk to half the depth of contents of dish, cover with buttered cracker crumbs, and bake until cheese melts.

Place colander over a kettle of boiling water, turn in one-third mixture, and force through colander into water, using a potato masher. As soon as buttons come to top of water, remove with skimmer to hot vegetable dish, and sprinkle with salt and grated cheese; repeat until mixture is used. Let stand in oven five minutes, then serve.

Ravioli

- 1 1/2 cups flour
- 1/2 egg
- Warm water
- 1/4 cup cracker crumbs
- 1/2 cup grated Parmesan cheese
- 1/4 cup chopped cooked spinach
- 1 egg
- White stock
- Salt
- Pepper

Sift flour on a board, make depression in centre, drop in one-half egg, and moisten with warm water to a stiff dough. Knead until smooth, cover, and let stand ten minutes; then roll as thin as a sheet of paper, using a rolling-pin. Cut in strips as long as paste, and two and three-fourth inches wide, using a pastry jagger. Mix cracker crumbs, spinach, and egg; moisten with stock and season with salt and pepper. Put mixture by three-fourths teaspoon on lower half of strips of paste, two inches apart. Fold upper part of paste over lower part. Press edges together and between mixture with tips of thumbs, then cut apart, using pastry jagger. Cook in White Stock ten minutes, take up with skimmer, arrange a layer on hot serving dish, sprinkle generously with grated Parmesan cheese, cover with Tomato Sauce; repeat twice and serve at once.

Eggs

Composition	
Protein	14.9%
Fat	10.6%
Mineral matter	1%
Water	73.5%

Eggs, like milk, form a typical food, inasmuch as they contain all the elements, in the right proportion, necessary for the support of the body. Their highly concentrated, nutritive value renders it necessary to use them in combination with other foods rich in starch (bread, potatoes, etc.). In order that the stomach may have enough to act upon, a certain amount of bulk must be furnished.

A pound of eggs (nine) is equivalent in nutritive value to a pound of beef. From this it may be seen that eggs, at even twenty-five cents per dozen, should not be freely used by the strict economist. Eggs being rich in protein serve as a valuable substitute for meat. In most families, their use in the making of cake, custard, puddings, etc., renders them almost indispensable. It is surprising how many intelligent women, who look well to the affairs of the kitchen, are satisfied to use what are termed “cooking eggs”; this shows poor judgment from an economical standpoint. Strictly fresh eggs should always be used if obtainable. An egg after the first twenty-four hours steadily deteriorates. If exposed to air, owing to the porous structure of the shell, there is an evaporation of water, air rushes in, and decomposition takes place.

White of egg contains albumen in its purest form. Albumen coagulates at a temperature of from 134deg to 160deg F. Herein lies the importance of cooking eggs at a low temperature, thus rendering them easy of digestion. Eggs cooked in boiling water are tough and horny, difficult of digestion, and should never be served.

When eggs come from the market, they should be washed, and put away in a cold place.

Ways of Determining Freshness of Eggs.

- I. Hold in front of candle flame in dark room, and the centre should look clear.
- II. Place in basin of cold water, and they should sink.
- III. Place large end to the cheek, and a warmth should be felt.

Ways of Keeping Eggs.

- I. Pack in sawdust, small end down.
- II. Keep in lime water.
- III. From July to September a large number of eggs are packed, small ends down, in cases having compartments, one for each egg, and kept in cold storage. Eggs are often kept in cold storage six months, and then sold as cooking eggs.

Boiled Eggs

Have ready a saucepan containing boiling water. Carefully put in with a spoon the number of eggs desired, covering them with water. Remove saucepan to back of range, where water will not boil. Cook from six to eight minutes if liked “soft-boiled,” forty to forty-five if liked “hard-boiled.” Eggs may be cooked by placing in cold water and allowing water to heat gradually until the boiling-point is reached, when they will be “soft-boiled.” In using hard-boiled eggs for making other dishes, when taken from the hot water they should be plunged into cold water to prevent, if possible, discoloration of yolks.

Eggs perfectly cooked should be placed and kept in water at a uniform temperature of 175deg F.

Dropped Eggs (Poached)

Have ready a shallow pan two-thirds full of boiling salted water, allowing one-half tablespoon salt to one quart of water. Put two or three buttered muffin rings in the water. Break each egg separately into a cup, and carefully slip into a muffin ring. The water should cover the eggs. When there is a film over the top, and the white is firm, carefully remove with a buttered skimmer to circular pieces of buttered toast, and let each person season his own egg with butter, salt, and pepper. If cooked for an invalid, garnish with four toast points and a bit of parsley. An egg-poacher may be used instead of muffin rings.

To three cups mashed potato add six tablespoons finely chopped ham, two tablespoons finely chopped parsley, whites of two eggs well beaten, three tablespoons butter, four tablespoons cream, and salt and pepper. Line potato shells with mixture, place in each cavity a poached egg, cover with potato mixture, and bake until browned. Care must be taken to have eggs delicately parched.

Baked Or Shirred Eggs

Butter an egg-shirrer. Cover bottom and sides with fine cracker crumbs. Break an egg into a cup, and carefully slip into shirrer. Cover with seasoned buttered crumbs, and bake in moderate oven until white is firm and crumbs brown. The shirrers should be placed on a tin plate, that they may be easily removed from the oven.

Plain Omelet

- 4 eggs
- 1/2 teaspoon salt
- Few grains pepper
- 4 tablespoons hot water
- 1 tablespoon butter

Beat whites until stiff and dry, cutting and folding them into first mixture until they have taken up mixture. Heat omelet pan, and butter sides and bottom. Turn in mixture, spread evenly, place on range where it will cook slowly, occasionally turning the pan that omelet may brown evenly. When well “puffed” and delicately browned underneath, place pan on centre grate of oven to finish cooking the top. The omelet is cooked if it is firm to the touch when pressed by the finger. If it clings to the finger like the beaten white of egg, it needs longer cooking. Fold, and turn on hot platter, and pour around one and one-half cups Thin White Sauce.

Milk is sometimes used in place of hot water, but hot water makes a more tender omelet. A few grains baking powder are used by some cooks to hold up an omelet.

To Fold And Turn An Omelet

Hold an omelet pan by handle with the left hand. With a case knife make two one-half inch incisions opposite each other at right angles to handle. Place knife under the part of omelet nearest handle, tip pan to nearly a vertical position; by carefully coaxing the omelet with knife, it will fold and turn without breaking.

Soups

It cannot be denied that the French excel all nations in the excellence of their cuisine, and to their soups and sauces belong the greatest praise. It would be well to follow their example, and it is the duty of every housekeeper to learn the art of soup making. How may a hearty dinner be better begun than with a thin soup? The hot liquid, taken into an empty stomach, is easily assimilated, acts as a stimulant rather than a nutrient (as is the popular opinion), and prepares the way for the meal which is to follow. The cream soups and purées are so nutritious that, with bread and butter, they furnish a satisfactory meal.

Soups are divided into two great classes: soups with stock; soups without stock.

Soups with stock have, for their basis, beef, veal, mutton, fish, poultry, or game, separately or in combination. They are classified as:—

Bouillon, made from lean beef, delicately seasoned, and usually cleared. Exception,—clam bouillon.

Brown Soup Stock, made from beef (two-thirds lean meat, and remainder bone and fat), highly seasoned with vegetables, spices, and sweet herbs.

White Soup Stock, made from chicken or veal, with delicate seasonings.

Consommé, usually made from two or three kinds of meat (beef, veal, and fowl being employed), highly seasoned with vegetables, spices, and sweet herbs. Always served clear.

Lamb Stock, delicately seasoned, is served as mutton broth.

Soups without stock are classified as:—

Cream Soups, made of vegetables or fish, with milk, and a small amount of cream and seasonings. Always thickened.

Purées, made from vegetables or fish, forced through a strainer, and retained in soup, milk, and seasonings. Generally thicker than cream soup. Sometimes White Stock is added.

Bisques, generally made from shell-fish, milk, and seasonings, and served with fish dice; made similarly to purées. They may be made of meat, game, or vegetables, with small dice of the same.

Various names have been given to soups, according to their flavorings, chief ingredients, the people who use them, etc. To the Scotch belongs Scotch Broth; to the French, Pot-au-feu; to the Indo, Mulligatawny; and to the Spanish, Olla Podrida.

Soup Making

The art of soup making is more easily mastered than at first appears. The young housekeeper is startled at the amazingly large number of ingredients the recipe calls for, and often is discouraged. One may, with but little expense, keep at hand what is essential for the making of a good soup. Winter vegetables—turnips, carrots, celery, and onions—may be bought in large or small quantities. The outer stalks of celery, often not suitable for serving, should be saved for soups. At seasons when celery is a luxury, the tips and roots should be saved and dried. Sweet herbs, including thyme, savory, and marjoram, are dried and put up in packages, retailing from five to ten cents. Bay leaves, which should be used sparingly, may be obtained at first-class grocers' or druggists'; seeming never to lose strength, they may be kept indefinitely. Spices, including whole cloves, allspice berries, peppercorns,

and stick cinnamon, should be kept on hand. These seasonings, with the addition of salt, pepper, and parsley, are the essential flavorings for stock soups. Flour, corn-starch, arrowroot, fine tapioca, sago, pearl barley, rice, bread, or eggs are added to give consistency and nourishment.

In small families, where there are few left-overs, fresh meat must be bought for the making of soup stock, as a good soup cannot be made from a small amount of poor material. On the other hand, large families need seldom buy fresh meat, provided all left-overs are properly cared for. The soup kettle should receive small pieces of beef (roasted, broiled, or stewed), veal, carcasses of fowl or chicken, chop bones, bones left from lamb roast, and all trimmings and bones, which a careful housewife should see are sent from the market with her order. Avoid the use of smoked or corned meats, or large pieces of raw mutton or lamb surrounded by fat, on account of the strong flavor so disagreeable to many. A small piece of bacon or lean ham is sometimes cooked with vegetables for flavor.

Beef ranks first as regards utility and economy in soup making. It should be cut from the fore or hind shin (which cuts contain marrow-bone), the middle cuts being most desirable. If the lower part of shin is used, the soup, although rich in gelatin, lacks flavor, unless a cheap piece of lean meat is used with it, which frequently is done. It must be remembered that meat, bone, and fat in the right proportions are all necessary; allow two-thirds lean meat, the remaining one-third bone and fat. From the meat the soluble juices, salts, extractives (which give color and flavor), and a small quantity of gelatin are extracted; from the bone, gelatin (which gives the stock when cold a jelly-like consistency) and mineral matter. Gelatin is also obtained from cartilage, skin, tendons, and ligaments. Some of the fat is absorbed; the remainder rises to the top and should be removed.

Soup stock making is rendered easier by use of proper utensils. Sharp meat knives, hardwood board, two purée strainers having meshes of different size, and a soup digester (a porcelain-lined iron pot, having tight-fitting cover, with valve in the top), or covered granite kettle, are essentials. An iron kettle, which formerly constituted one of the furnishings of a range, may be used if perfectly smooth. A saw, cleaver, and scales, although not necessary, are useful, and lighten labor.

When meat comes from market, remove from paper and put in cool place. When ready to start stock, if scales are at hand, weigh meat and bone to see if correct proportions have been sent. Wipe meat with clean cheese-cloth wrung out of cold water. Cut lean meat in one-inch cubes; by so doing, a large amount of surface is exposed to the water, and juices are more easily drawn out. Heat frying-pan hissing hot; remove marrow from marrow-bone, and use enough to brown one-third of the lean meat, stirring constantly, that all parts of surface may be seared, thus preventing escape of juices,—sacrificing a certain amount of goodness in the stock to give additional color and flavor, which is obtained by caramelization. Put fat, bone, and remaining lean meat in soup kettle; cover with cold water, allowing one pint to each pound of meat, bone, and fat. Let stand one hour, that cold water may draw out juices from meat. Add browned meat, taking water from soup kettle to rinse out frying-pan, that none of the coloring may be lost. Heat gradually to boiling-point, and cook six or seven hours at low temperature. A scum will rise on the top, which contains coagulated albuminous juices; these give to soup its chief nutritive value; many, however, prefer a clear soup, and have them removed. If allowed to remain, when straining, a large part will pass through strainer. Vegetables, spices, and salt should be added the last hour of cooking. Strain and cool quickly; by so doing, stock is less apt to ferment. A knuckle of veal is often used for making white soup stock. Fowl should be used for stock in preference to chicken, as it is cheaper, and contains a larger amount of nutriment. A cake of fat forms on stock when cold, which excludes air, and should not be removed until stock is used. To remove fat, run a knife around edge of bowl and carefully remove the same. A small quantity will remain, which should be removed by passing a cloth wrung out of hot water around edge and over top of stock. This fat should be clarified and used for drippings. If time cannot be allowed for stock to cool before using, take off as much fat as possible with a spoon, and remove

the remainder by passing tissue or any absorbent paper over the surface.

How to Clear Soup Stock

Whites of eggs slightly beaten, or raw, lean beef finely chopped, are employed for clearing soup stock. The albumen found in each effects the clearing by drawing to itself some of the juices which have been extracted from the meat, and by action of heat have been coagulated. Some rise to the top and form a scum, others are precipitated.

Remove fat from stock, and put quantity to be cleared in stewpan, allowing white and shell of one egg to each quart of stock. Beat egg slightly, break shell in small pieces and add to stock. Place on front of range, and stir constantly until boiling-point is reached; boil two minutes. Set back where it may simmer twenty minutes; remove scum, and strain through double thickness of cheese-cloth placed over a fine strainer. If stock to be cleared is not sufficiently seasoned, additional seasoning must be added as soon as stock has lost its jelly-like consistency; not after clearing is effected. Many think the flavor obtained from a few shavings of lemon rind an agreeable addition.

How to Bind Soups

Cream soups and purées, if allowed to stand, separate, unless bound together. To bind a soup, melt butter, and when bubbling add an equal quantity of flour; when well mixed add to boiling soup, stirring constantly. If recipe calls for more flour than butter, or soup is one that should be made in double boiler, add gradually a portion of hot mixture to butter and flour until of such consistency that it may be poured into the mixture remaining in double boiler.

- Salt

Cook bread and milk to a paste, add egg well beaten, and fish pounded and forced through a purée strainer. Season with salt. A meat chopper is of great assistance in making force-meats, as raw fish or meat may be easily forced through it. Bass, halibut, or pickerel are the best fish to use for force-meat. Force-meat is often shaped into small balls.

Fish Force-Meat II

- 2/3 cup raw halibut
- 1 egg white
- Salt
- Pepper
- Cayenne
- 1/2 cup heavy cream

Chop fish finely, or force through a meat chopper. Pound in mortar, adding gradually white of egg, and working until smooth. Add seasonings, rub through a sieve, and then add cream.

Salmon Force-Meat

- 1/2 cup milk
- 1/2 cup soft stale bread crumbs
- 1/2 cup cold flaked salmon
- 2 tablespoons cream
- 1 egg
- 2 tablespoons melted butter
- 1/2 teaspoon salt
- Few grains pepper

Cook milk and bread crumbs ten minutes, add salmon chopped and rubbed through a sieve; then add cream, egg slightly beaten, melted butter, salt, and pepper.

Oyster Force-Meat

To Fish Force-meat add one-fourth small onion, finely chopped, and fried five minutes in one-half tablespoon butter; then add one-third cup soft part of oysters, parboiled and finely chopped, one-third cup mushrooms finely chopped, and one-third cup Thick White Sauce. Season with salt, cayenne, and one teaspoon finely chopped parsley.

Clam Force-Meat

Follow recipe for Oyster Force-meat, using soft part of clams in place of oysters.

Chicken Force-Meat I

- 1/2 cup fine stale bread crumbs
- 1/2 cup milk
- 2 tablespoons butter
- 1 egg white
- 2/3 cup breast raw chicken
- Salt
- Few grains cayenne
- Slight grating nutmeg

Cook bread and milk to a paste, add butter, white of egg beaten stiff, and seasonings; then add chicken pounded and forced through purée strainer.

Chicken Force-Meat II

- 1/2 breast raw chicken
- 1 egg white
- Salt
- Pepper
- Slight grating nutmeg
- Heavy cream

Chop chicken finely, or force through a meat chopper. Pound in mortar, add gradually white of egg, and work until smooth; then add heavy cream slowly until of right consistency, which can only be determined by cooking a small ball in boiling salted water. Add seasonings, and rub through sieve.

Quenelles

Quenelles are made from any kind of force-meat, shaped in small balls or between tablespoons, making an oval, or by forcing mixture through pastry bag on buttered paper. They are cooked in boiling salted water or stock, and are served as garnish to soups or other dishes; when served with sauce, they are an entrée.

Fish

The meat of fish is the animal food next in importance to that of birds and mammals. Fish meat, with but few exceptions, is less stimulating and nourishing than meat of other animals, but is usually easier of digestion. Salmon, mackerel, and eels are exceptions to these rules, and should not be eaten by those of weak digestion. White fish, on account of their easy digestibility, are especially desirable for those of sedentary habits. Fish is not recommended for brain-workers on account of the large amount of phosphorus (an element abounding largely in nerve tissue) which it contains, but because of its easy digestibility. It is a conceded fact that many fish contain less of this element than meat.

Fish meat is generally considered cheaper than meat of other animals. This is true when compared with the better cuts of meat, but not so when compared with cheaper cuts.

To obtain from fish its greatest value and flavor, it should be eaten fresh, and in season. Turbot, which is improved by keeping, is the only exception to this rule.

To Determine Freshness of Fish. Examine the flesh, and it should be firm; the eyes and gills, and they should be bright.

Broiling and baking are best methods for cooking fish. White fish may often be fried, but oily rarely. Frozen fish are undesirable, but if used, should be thawed in cold water just before cooking.

On account of its strong odor, fish should never be put in an ice-box with other food, unless closely covered. A tin lard pail will be found useful for this purpose.

White And Oily Fish

White fish have fat secreted in the liver. Examples: cod, haddock, trout, flounder, smelt, perch, etc.

Oily fish have fat distributed throughout the flesh. Examples: salmon, eels, mackerel, bluefish, swordfish, shad, herring, etc.

Cod belongs to one of the most prolific fish families (Gadidae), and is widely distributed throughout the northern and temperate seas of both hemispheres. On account of its abundance, cheapness, and easy procurability, it forms, from an economical standpoint, one of the most important fish foods. Cod have been caught weighing over a hundred pounds, but average market cod weigh from six to ten pounds; a six-pound cod measures about twenty-three inches in length. Large cod are cut into steaks. The skin of cod is white, heavily mottled with gray, with a white line running the entire length of fish on either side. Cod is caught in shallow or deep waters. Shallow-water cod (caught off rocks) is called rock cod; deep-water cod is called off-shore cod. Rock cod are apt to be wormy. Cod obtained off George's Banks, Newfoundland, are called George's cod, and are commercially known as the best fish. Quantities of cod are preserved by drying and salting. Salted George's cod is the best brand on the market. Cod is in season throughout the year.

Cod Liver Oil is obtained from cods' livers, and has great therapeutic value. Isinglass, made from swimming bladder of cod, nearly equals in quality that made from bladder of sturgeon.

Haddock is more closely allied to cod than any other fish.

It is smaller (its average weight being about four pounds), and differently mottled. The distinguishing mark of the haddock is a black line running the entire length of fish on either side. Haddock is found in the same water and in company with cod, but not so abundantly. Like cod,

haddock is cheap, and in season throughout the year. Haddock, when dried, smoked, and salted, is known as *Finnan Haddie*.

Halibut is the largest of the flatfish family (Pleuronectidæ), specimens having been caught weighing from three to four hundred pounds. Small, or chicken, halibut is the kind usually found in market, and weighs from fifteen to twenty-five pounds. Halibut are distinctively cold-water fish, being caught in water at from 32deg to 45deg F. They are found in the North Atlantic and North Pacific oceans, where they are nearly identical. The halibut has a compressed body, the skin on one side being white, on the other light, or dark gray, and both eyes are found on the dark side of head. Halibut is in season throughout the year.

Turbot (called little halibut) is a species of the flatfish family, being smaller than halibut, and of more delicate flavor. Turbot are in season from January to March.

Flounder is a small flatfish, which closely resembles the sole which is caught in English waters, and is often served under that name.

Trout are generally fresh water fish, varying much in size and skin-coloring. Lake trout, which are the largest, reach their greatest perfection in Lakes Huron, Michigan, and Superior, but are found in many lakes. Salmon trout is the name applied to trout caught in New York lakes. Brook trout, caught in brooks and small lakes, are superior eating. Trout are in season from April to August, but a few are found later.

Whitefish is the finest fish found in the Great Lakes.

Smelts are small salt-water fish, and are usually caught in temperate waters at the mouths of rivers. New Brunswick and Maine send large quantities of smelts to market. Selected smelts are the largest in size, and command higher price. The Massachusetts Fish and Game Protective Law forbids their sale from March 15th to June 1st. Smelts are always sold by the pound.

Bluefish belongs to the Pomatomidæ family. It is widely distributed in temperate waters, taking different names in different localities. In New England and the Middle States it is generally called Bluefish, although in some parts called Snappers, or Snapping Mackerel. In the Southern States it is called Greenfish. It is in season in our markets from May to October; as it is frozen and kept in cold storage from six to nine months, it may be obtained throughout the year. The heavier the fish, the better its quality. Bluefish weigh from one to eight pounds, and are from fourteen to twenty-nine inches in length.

Mackerel is one of the best-known food fishes, and is caught in North Atlantic waters. Its skin is lustrous dark blue above, with wavy blackish lines, and silvery below. It sometimes attains a length of eighteen inches, but is usually less. Mackerel weigh from three-fourths of a pound to two pounds, and are sold by the piece. They are in season from May 1st to September 1st. Mackerel, when first in market, contain less fat than later in the season, therefore are easier of digestion. The supply of mackerel varies greatly from year to year, and some years is very small. *Spanish mackerel* are found in waters farther south than common mackerel, and in our markets command higher price.

Salmon live in both fresh and salt waters, always going, inland, usually to the head of rivers, during the spawning season. The young after a time seek salt water, but generally return to fresh water. Penobscot River Salmon are the best, and come from Maine and St. John, New Brunswick. The average weight of salmon is from fifteen to twenty-five pounds, and the flesh is of pinkish orange color. Salmon are in season from May to September, but frozen salmon may be obtained the greater part of the year. In the Columbia River and its tributaries salmon are so abundant that extensive canneries are built along the banks.

Shad, like salmon, are found in both salt and fresh water, always ascending rivers for spawning. Shad is caught on the Atlantic Coast of the United States, and its capture constitutes one of the most important fisheries. Shad have a silvery hue, which becomes bluish on the back; they vary in length from eighteen to twenty-eight inches, and are always sold by the piece, price being irrespective

of size. *Jack shad* are usually cheaper than *roe shad*. The roe of shad is highly esteemed. Shad are in season from January to June. First shad in market come from Florida, and retail from one and one-half to two dollars each. The finest come from New Brunswick, and appear in market about the first of May.

Caviare is the salted roe of the sturgeon.

Herring are usually smoked, or smoked and salted, and, being very cheap, are a most economical food.

Shellfish

I. Bivalve Mollusks

Oysters are mollusks, having two shells. The shells are on the right and left side of the oyster, and are called right and left valves. The one upon which the oyster rests grows faster, becomes deeper, and is known as the left valve. The valves are fastened by a ligament, which, on account of its elasticity, admits of opening and closing of the shells. The oyster contains a tough muscle, by which it is attached to the shell; the body is made up largely of the liver (which contains *glycogen*, animal starch), and is partially surrounded by fluted layers, which are the gills. Natural oyster beds (or banks) are found in shallow salt water having stony bottom, along the entire Atlantic Coast. The oyster industry of the world is chiefly in the United States and France, and on account of its increase many artificial beds have been prepared for oyster culture. Oysters are five years old before suitable for eating. Blue Points, which are small, plump oysters, take their name from Blue Point, Long Island, from which place they originally came. Their popularity grew so rapidly that the supply became inadequate for the demand, and any small, plump oysters were soon sold for Blue Points. During the oyster season they form the first course of a dinner, served raw on the half shell. In our markets, selected oysters (which are extremely large and used for broiling) Providence River, and Norfolk oysters are familiarly known, and, taken out of the shells, are sold by the quart. Farther south, they are sold by count.

Oysters are obtainable all the year, but are in season from September to May. During the summer months they are flabby and of poor flavor, although when fresh they are perfectly wholesome. *Mussels*, eaten in England and other parts of Europe, are similar to oysters, though of inferior quality. Oysters are nutritious and of easy digestibility, especially when eaten raw.

To Open Oysters. Put a thin flat knife under the back end of the right valve, and push forward until it cuts the strong muscle which holds the shells together. As soon as this is done, the right valve may be raised and separated from the left.

To Clean Oysters. Put oysters in a strainer placed over a bowl. Pour over oysters cold water, allowing one-half cup water to each quart oysters. Carefully pick over oysters, taking each one separately in the fingers, to remove any particles of shell which adhere to tough muscle.

Clams, among bivalve mollusks, rank in value next to oysters. They are found just below the surface of sand and mud, above low-water mark, and are easily dug with shovel or rake. Clams have hard or soft shells. Soft-shell clams are dear to the New Englander. From New York to Florida are found hard-shelled clams (quahaugs). *Small quahaugs* are called *Little Neck Clams* and take the place of Blue Points at dinner, when Blue Points are out of season.

Scallops are bivalve mollusks, the best being found in Long Island Sound and Narragansett Bay. The central muscle forms the edible portion, and is the only part sent to market. Scallops are in season from October first to April first.

II. Crustaceans

Lobsters belong to the highest order of Crustaceans, live exclusively in sea-water, generally near rocky coasts, and are caught in pots set on gravelly bottoms. The largest and best species are found in Atlantic waters from Maine to New Jersey, being most abundant on Maine and Massachusetts coasts. Lobsters have been found weighing from sixteen to twenty-five pounds, but such have been exterminated from our coast. The average weight is two pounds, and the length from ten to fifteen inches. Lobsters are largest and most abundant from June to September, but are obtainable all the year. When taken from the water, shells are of mottled dark green color, except when found on sandy bottoms, when they are quite red. Lobsters are generally boiled, causing the shell to turn red.

A lobster consists of body, tail, two large claws, and four pairs of small claws. On lower side of body, in front of large claws, are various small organs which surround the mouth, and a long and short pair of feelers. Under the tail are found several pairs of appendages. In the female lobster, also called hen lobster, is found, during the breeding season, the spawn, known as *coral*. Sex is determined by the pair of appendages in the tail which lie nearest the body; in the female they are soft and pliable, in the male hard and stiff. At one time small lobsters were taken in such quantities that it was feared, if the practice was long continued, they would be exterminated. To protect the continuance of lobster fisheries, a law has been passed in many States prohibiting their sale unless at least ten inches long.

Lobsters shed their shells at irregular intervals, when old ones are outgrown. The new ones begin to form and take on distinctive characteristics before the old ones are discarded. New shells after twenty-four hours' exposure to the water are quite hard.

Lobsters, being coarse feeders (taking almost any animal substance attainable), are difficult of digestion, and with some create great gastric disturbance; notwithstanding, they are seldom found diseased.

To Select a Lobster. Take in the hand, and if heavy in proportion to its size, the lobster is fresh. Straighten the tail, and if it springs into place the lobster was alive (as it should have been) when put into the pot for boiling. There is greater shrinkage in lobsters than in any other fish.

To Open Lobsters. Take off large claws, small claws, and separate tail from body. Tail meat may sometimes be drawn out whole with a fork; more often it is necessary to cut the thin shell portion (using scissors or a can opener) in under part of the tail, then the tail meat may always be removed whole. Separate tail meat through centre, and remove the small intestinal vein which runs its entire length; although generally darker than the meat, it is sometimes found of the same color. Hold body shell firmly in left hand, and with first two fingers and thumb of right hand draw out the body, leaving in shell the stomach (known as the *lady*), which is not edible, and also some of the green part, the *liver*. The liver may be removed by shaking the shell. The sides of the body are covered with the *lungs*; these are always discarded. Break body through the middle and separate body bones, picking out meat that lies between them, which is some of the sweetest and tenderest to be found. Separate large claws at joints. If shells are thin, with a knife cut off a strip down the sharp edge, so that shell may be broken apart and meat removed whole. Where shell is thick, it must be broken with a mallet or hammer. Small claws are used for garnishing. The shell of body, tail, and lower part of large claws, if not broken, may be washed, dried, and used for serving of lobster meat after it has been prepared. The portions of lobsters which are not edible are *lungs*, *stomach* (lady), and *intestinal vein*.

Crabs among Crustaceans are next in importance to lobsters, commercially speaking. They are about two and one-half inches long by five inches wide, and are found along the Atlantic Coast from Massachusetts to Florida, and in the Gulf of Mexico. Crabs, like lobsters, change their shells. *Soft-shell* crabs are those which have recently shed their old shells, and the new shells have not had

time to harden; these are considered by many a great luxury. *Oyster crabs* (very small crabs found in shells with oysters) are a delicacy not often indulged in. Crabs are in season during the spring and summer.

Shrimps are found largely in our Southern waters, the largest and best coming from Lake Pontchartrain. They are about two inches long, covered with a thin shell, and are boiled and sent to market with heads removed. Their grayish color is changed to pink by boiling. Shrimps are in season from May first to October first, and are generally used for salads. Canned shrimps are much used and favorably known.

Reptiles. Frogs and terrapin belong to a lower order of animals than fish,—reptiles. They are both table delicacies, and are eaten by the few.

Only the hind legs of frogs are eaten, and have much the same flavor as chicken.

Terrapin, although sold in our large cities, specially belong to Philadelphia, Baltimore, and Washington, where they are cooked and served at their best. They are shipped from the South, packed in seaweed, and may be kept for some time in a dark place. Terrapin are found in both fresh and salt-water. The Diamond Back, salt-water terrapin, coming from Chesapeake Bay, are considered the best, and command a very high price. Terrapin closely resembling Diamond Back, coming from Texas and Florida, are principally sold in our markets. Terrapin are in season from November to April, but are best in January, February, and March. They should always be cooked alive.

To Prepare Fish For Cooking

To Clean a Fish. Fish are cleaned and dressed at market as ordered, but need additional cleaning before cooking. Remove scales which have not been taken off. This is done by drawing a knife over fish, beginning at tail and working towards head, occasionally wiping knife and scales from fish. Incline knife slightly towards you to prevent scales from flying. The largest number of scales will be found on the flank. Wipe thoroughly inside and out with cloth wrung out of cold water, removing any clotted blood which may be found adhering to backbone.

Head and tail may or may not be removed, according to size of fish and manner of cooking. Small fish are generally served with head and tail left on.

To Skin a Fish. With sharp knife remove fins along the back and cut off a narrow strip of skin the entire length of back. Loosen skin on one side from bony part of gills, and being once started, if fish is fresh, it may be readily drawn off; if flesh is soft do not work too quickly, as it will be badly torn. By allowing knife to closely follow skin this may be avoided. After removing skin from one side, turn fish and skin the other side.

To Bone a Fish. Clean and skin before boning. Beginning at the tail, run a sharp knife under flesh close to backbone, and with knife follow bone (making as clean a cut as possible) its entire length, thus accomplishing the removal of one-half the flesh; turn, and remove flesh from other side. Pick out with fingers any small bones that may remain. Cod, haddock, halibut, and whitefish are easily and frequently boned; flounders and smelts occasionally.

To Fillet Fish. Clean, skin, and bone. A piece of fish, large or small, freed from skin and bones, is known as a fillet. Halibut, cut in three-fourths inch slices, is more often cut in fillets than any kind of fish, and fillets are frequently rolled. When flounder is cut in fillets it is served under the name of *fillet of sole*. Sole found in English waters is much esteemed, and flounder is our nearest approach to it.

Ways Of Cooking Fish

To Cook Fish in Boiling Water. Small cod, haddock, or cusk are cooked whole in enough boiling water to cover, to which is added salt and lemon juice or vinegar. Salt gives flavor; lemon juice or vinegar keeps the flesh white. A long fish-kettle containing a rack on which to place fish is useful but rather expensive. In place of fish-kettle, if the fish is not too large to be coiled in it, a frying-basket may be used placed in any kettle.

Large fish are cut in thick pieces for boiling, containing the number of pounds required. Examples: salmon and halibut.

Pieces cut from large fish for boiling should be cleaned and tied in a piece of cheese-cloth to prevent scum being deposited on the fish. If skin is not removed before serving, scald the dark skin and scrape to remove coloring; this may be easily accomplished by holding fish on two forks, and lowering into boiling water the part covered with black skin; then remove and scrape. Time required for boiling fish depends on extent of surface exposed to water. Consult Time Table for Boiling, which will serve as a guide. The fish is cooked when flesh leaves the bone, no matter how long the time.

To Broil Fish. Cod, haddock, bluefish, and mackerel are split down the back and broiled whole, removing head and tail or not, as desired. Salmon, chicken halibut, and swordfish are cut in inch slices for broiling. Smelts and other small fish are broiled whole, without splitting. Clean and wipe fish as dry as possible, sprinkle with salt and pepper, and place in well-greased wire broiler. Slices of fish should be turned often while broiling; whole fish should be first broiled on flesh side, then turned and broiled on skin side just long enough to make skin brown and crisp.

To remove from broiler, loosen fish on one side, turn and loosen on other side; otherwise flesh will cling to broiler. Slip from broiler to hot platter, or place platter over fish and invert platter and broiler together.

To Bake Fish. Clean, and bake on a greased fish-sheet placed in a dripping-pan. If a fish-sheet is not at hand, place strips of cotton cloth under fish, by which it may be lifted from pan.

To Fry Fish. Clean fish, and wipe as dry as possible. Sprinkle with salt, dip in flour or crumbs, egg, and crumbs, and fry in deep fat.

To Sauté Fish. Prepare as for frying, and cook in frying-pan with small amount of fat; or, if preferred, dip in granulated corn meal. Cod steak and smelts are often cooked in this way.

Boiled Haddock

Clean and boil as directed in Ways of Cooking Fish. Remove to a hot platter, garnish with slices of "hard-boiled" eggs and parsley, and serve with Egg Sauce. A thick piece of halibut may be boiled and served in the same way.

Boiled Salmon

Clean and boil as directed in Ways of Cooking Fish. Place on a hot platter, remove skin, and garnish with slices of lemon and parsley. Serve with Egg Sauce I or II, or Hollandaise Sauce.

Steamed Halibut, Silesian Sauce

Steam by cooking over boiling water a piece of halibut weighing two pounds, and serve with Silesian Sauce.

- 1 1/2 tablespoons vinegar
- 1/8 teaspoon powdered tarragon
- 3 peppercorns
- Bit of bay leaf
- Sprig of parsley
- 1/2 teaspoon finely chopped shallot
- Salt and cayenne
- 3 egg yolks
- 2/3 cup Brown Stock
- 1/4 cup butter
- 1 tablespoon flour
- 1/2 tablespoon capers
- 1/2 tablespoon parsley

Cook first six ingredients until reduced one-half; strain, add yolks of eggs well beaten, one-half, each, brown stock and butter, and cook over hot water, stirring constantly until thickened. Then add, gradually, remaining butter mixed with flour and stock. As soon as mixture thickens, add capers, parsley finely chopped, and salt and cayenne.

Broiled Scrod

A young cod, split down the back, and backbone removed, except a small portion near the tail, is called a scrod. Scrod are always broiled, spread with butter, and sprinkled with salt and pepper. Haddock is also so dressed.

Broiled Chicken Halibut

Clean and broil as directed in Ways of Cooking Fish. Spread with butter, sprinkle with salt and pepper, and garnish with slices of lemon cut in fancy shapes and sprinkled with paprika and parsley.

Broiled Swordfish

Clean and broil fish, spread with butter, sprinkle with salt and pepper, and serve with Cucumber Sauce I, or Horseradish Sauce I.

Broiled Shad Roe

Wipe, sprinkle with salt and pepper, put on greased wire broiler, and broil five minutes on each side. Serve with Maître d'Hôtel Butter. Mackerel roe are delicious cooked in this way.

Broiled Pompano With Fricassee Of Clams

Clean and broil fish as directed in Ways of Cooking Fish (see p. 160). When nearly cooked, slip from broiler onto a hot platter and brush over with melted butter. Surround with two borders of mashed potatoes, one-inch apart, forced through a pastry bag and tube. Arrange ten halves of clam-shells between potato borders, at equal distances; fill spaces between shells with potato roses. Place in oven to finish cooking fish and to brown potatoes. Just before serving, fill clam-shells with

Fricassee of Clams. Clean one pint clams, finely chop hard portions and reserve soft portions. Melt two tablespoons butter, add chopped clams, two tablespoons flour, and pour on gradually one-third cup cream. Strain sauce, add soft part of clams, cook one minute, season with salt and cayenne, and add yolk of one egg slightly beaten.

Baked Haddock With Stuffing

Clean a four-pound haddock, sprinkle with salt inside and out, stuff, and sew. Cut five diagonal gashes on each side of backbone and insert narrow strips of fat salt pork, having gashes on one side come between gashes on other side. Shape with skewers in form of letter S, and fasten skewers with small twine. Place on greased fish-sheet in a dripping-pan, sprinkle with salt and pepper, brush over with melted butter, dredge with flour, and place around fish small pieces of fat salt pork. Bake one hour in hot oven, basting as soon as fat is tried out, and continue basting every ten minutes. Serve with Drawn Butter, Egg or Hollandaise Sauce.

Fish Stuffing I

- 1/2 cup cracker crumbs
- 1/2 cup stale bread crumbs
- 1/4 cup melted butter
- 1/4 teaspoon salt
- 1/8 teaspoon pepper
- Few drops onion juice
- 1/4 cup hot water

Mix ingredients in order given.

Fish Stuffing II

- 1 cup cracker crumbs
- 1/4 cup melted butter

- 1/4 teaspoon salt
- 1/8 teaspoon pepper
- Few drops onion juice
- 1 teaspoon parsley
- 1 teaspoon capers
- 1 teaspoon pickles

Mix ingredients in order given. This makes a dry, crumbly stuffing.

Baked Bluefish

Clean a four-pound bluefish, stuff, sew, and bake as Baked Halibut with Stuffing, omitting to cut gashes on sides, as the fish is rich enough without addition of pork. Baste often with one-third cup butter melted in two-thirds cup boiling water. Serve with Shrimp Sauce.

Breslin Baked Bluefish

Split and bone a bluefish, place on a well-buttered sheet, and cook twenty minutes in a hot oven. Cream one-fourth cup butter, add yolks two eggs, and when well mixed add two tablespoons, each, onion, capers, pickles, and parsley, finely chopped; two tablespoons lemon juice, one tablespoon vinegar, one-half teaspoon salt, and one-third teaspoon paprika. Sprinkle fish with salt, spread with mixture, and continue the baking until fish is done. Remove to serving dish and garnish with potato balls, cucumber ribbons, lemon cut in fancy shapes, and parsley.

Bluefish À L'Italienne

Clean a four-pound bluefish, sprinkle with salt and pepper, and put on buttered fish-sheet in a dripping-pan. Add three tablespoons white wine, three tablespoons mushroom liquor, one-half onion finely chopped, eight mushrooms finely chopped, and enough water to allow sufficient liquor in pan for basting. Bake forty-five minutes in hot oven, basting five times. Serve with Sauce à l'Italienne.

Baked Cod With Oyster Stuffing

Clean a four-pound cod, sprinkle with salt and pepper, brush over with lemon juice, stuff, and sew. Gash, skewer, and bake as Baked Halibut with Stuffing. Serve with Oyster Sauce.

Oyster Stuffing

- 1 cup cracker crumbs
- 1/4 cup melted butter
- 1/2 teaspoon salt
- 1/8 teaspoon pepper
- 1 1/2 teaspoons lemon juice

- 1/2 tablespoon finely chopped parsley
- 1 cup oysters

Add seasonings and butter to cracker crumbs. Clean oysters, and remove tough muscles; add soft parts to mixture, with two tablespoons oyster liquor to moisten.

Baked Haddock With Oyster Stuffing

Remove skin, head, and tail from a four-pound haddock. Bone, leaving in large bones near head, to keep fillets in shape of the original fish. Sprinkle with salt, and brush over with lemon juice. Lay one fillet on greased fish-sheet in a dripping-pan, cover thickly with oysters, cleaned and dipped in buttered cracker crumbs seasoned with salt and pepper. Cover oysters with other fillet, brush with egg slightly beaten, cover with buttered crumbs, and bake fifty minutes in a moderate oven. Serve with Hollandaise Sauce I. Allow one pint oysters and one cup cracker crumbs.

Baked Halibut With Tomato Sauce

- 2 lbs. halibut
- 2 cups tomatoes
- 1 cup water
- 1 slice onion
- 3 cloves
- 1/2 tablespoon sugar
- 3 tablespoons butter

Roasted clams are served at Clam Bakes. Clams are washed in sea-water, placed on stones which have been previously heated by burning wood on them, ashes removed, and stones sprinkled with thin layer of seaweed. Clams are piled on stones, covered with seaweed, and a piece of canvas thrown over them to retain the steam.

Clams, Union League

Fry one-half teaspoon finely chopped shallot in one and one-half tablespoons butter five minutes; add eighteen clams and one-half cup white wine. Cook until the shells open. Remove clams from shells and reduce liquor to one-third cupful. Melt two tablespoons butter, add two tablespoons flour, and pour on gradually the clam liquor; add one-fourth cup cream and the clams, season with salt and pepper. Refill clam-shells, sprinkle with chopped parsley, and serve on each a square piece of fried bacon.

Clams à la Grand Union

Clean and dry selected clams, dip in batter, fry in deep fat, and drain on brown paper. Serve on small slices of cream toast, seasoned with salt, celery salt, pepper, and cayenne.

Batter. Mix and sift one cup bread flour, one-half teaspoon salt, and a few grains cayenne. Add gradually two-thirds cup milk, and two eggs well beaten.

Fried Scallops

Clean one quart scallops, turn into a saucepan, and cook until they begin to shrivel; drain, and dry between towels. Season with salt and pepper, roll in fine crumbs, dip in egg, again in crumbs, and fry two minutes in deep fat; then drain on brown paper.

Plain Lobster

Remove lobster meat from shell, arrange on platter, and garnish with small claws. If two lobsters are opened, stand tail shells (put together) in centre of platter, and arrange meat around them.

Lobster Cocktail

Allow one-fourth cup lobster meat, cut in pieces, for each cocktail, and season with two tablespoons, each, tomato catsup and Sherry wine, one tablespoon lemon juice, six drops Tabasco Sauce, one-eighth teaspoon finely chopped chives, and salt to taste. Chill thoroughly, and serve in cocktail glasses.

Fried Lobster

Remove lobster meat from shell. Use tail meat, divided in fourths, and large pieces of claw meat. Sprinkle with salt, pepper, and lemon juice; dip in crumbs, egg, and again in crumbs; fry in deep fat, drain, and serve with Sauce Tartare.

Buttered Lobster

- 2 lb. lobster
- 3 tablespoons butter
- Salt and pepper
- Lemon juice

Remove lobster meat from shell and chop slightly. Melt butter, add lobster, and when heated, season and serve garnished with lobster claws.

Scalloped Lobster

- 2 lb. lobster
- 1 1/2 cups White Sauce II
- 1/2 teaspoon salt
- Few grains cayenne
- 2 teaspoons lemon juice

Remove lobster meat from shell and cut in cubes. Heat in White Sauce and add seasonings. Refill lobster shells, cover with buttered crumbs, and bake until crumbs are brown. To prevent lobster shells from curling over lobster while baking, insert small wooden skewers of sufficient length to keep shell in its original shape. To assist in preserving color of shell, brush over with olive oil before putting into oven. Scalloped lobster may be baked in buttered scallop shells, or in a buttered baking-dish.

Devilled Lobster

Scalloped lobster highly seasoned is served as Devilled Lobster. Use larger proportions of same seasonings, with the addition of mustard.

Curried Lobster

Prepare as Scalloped Lobster, adding to flour one-half teaspoon curry powder when making White Sauce.

Lobster Farci

- 1 cup chopped lobster meat
- Yolks 2 “hard-boiled” eggs
- 1/2 tablespoon chopped parsley
- 1 cup White Sauce I
- Slight grating nutmeg

- 1/3 cup buttered crumbs
- Salt
- Pepper

To lobster meat add yolks of eggs rubbed to a paste, parsley, sauce, and seasonings to taste. Fill lobster shells, cover with buttered crumbs, and bake until crumbs are brown.

Lobster And Oyster Filling

(For Patties or Vol-au-Vent)

- 1 stalk celery
- 1 slice onion
- Salt
- 1/4 cup butter
- 1/3 cup flour
- 3/4 cup cream
- Worcestershire Sauce
- Lemon juice
- Paprika

Clean and parboil oysters; drain, and add to liquor body bones and tough claw meat from lobster, water, celery, and onion. Cook slowly until stock is reduced to one cup, and strain. Make sauce of butter, flour, strained stock, and cream. Add oysters and lobster meat cut in strips; then add seasonings. One-half teaspoon beef extract is an improvement to this dish.

Fricassee Of Lobster And Mushrooms

- 1/4 cup butter
- 3/4 lb. mushrooms
- Few drops onion juice
- 1/4 cup flour
- 1 1/2 cups milk

Remove lobster meat from shell and cut in strips. Cook butter with mushrooms broken in pieces and onion juice three minutes; add flour, and pour on gradually milk. Add lobster meat, season with salt and paprika, and, as soon as lobster is heated, add wine. Remove to serving dish, and garnish with puff paste or toast points and parsley.

Lobster And Oyster Ragout

- 1/4 cup butter
- 1/4 cup flour
- 3/4 cup oyster liquor
- 3/4 cup cream
- 3/4 teaspoon salt
- 1/4 teaspoon pepper
- Few grains cayenne
- Few drops onion juice
- 1 pint oysters parboiled
- 3/4 cup lobster dice
- 1 1/2 tablespoons Sauterne
- 1 tablespoon finely chopped parsley

Make a sauce of first eight ingredients. Add oysters, lobster dice, wine, and parsley.

Scald milk with bay leaf, remove bay leaf and make a white sauce of butter, flour, and milk; add salt, cayenne, nutmeg, parsley, yolks of eggs slightly beaten, and lemon juice. Add lobster dice, refill shells, cover with buttered crumbs, and bake until crumbs are brown. One-half chicken stock and one-half cream may be used for sauce if a richer dish is desired.

Broiled Live Lobster

Live lobsters may be dressed for broiling at market, or may be done at home. Clean lobster and place in a buttered wire broiler. Broil eight minutes on flesh side, turn and broil six minutes on shell side. Serve with melted butter. Lobsters taste nearly the same when placed in dripping-pan and baked fifteen minutes in hot oven, and are much easier cooked.

To Split a Live Lobster. Cross large claws and hold firmly with left hand. With sharp-pointed knife, held in right hand, begin at the mouth and make a deep incision, and, with a sharp cut, draw the knife quickly through body and entire length of tail. Open lobster, remove intestinal vein, liver, and stomach, and crack claw shells with a mallet.

Baked Live Lobster. Devilled Sauce.

Prepare lobster same as for Broiled Live Lobster and place in a dripping-pan. Cook liver of lobster with one tablespoon butter three minutes. Season highly with salt, cayenne, and Worcestershire Sauce. Spread over lobster, and bake in a hot oven fifteen minutes. Remove to platter and serve at once, allowing over one and one-half pound lobster to each person.

Live Lobster En Brochette

Split a live lobster, remove meat from tail and large claws, cut in pieces, and arrange on skewers, alternating pieces with small slices of bacon. Fry in deep fat and drain. Cook liver of lobster with one tablespoon butter three minutes, season highly with mustard and cayenne, and serve with lobster.

Lobster À L'Américaine

To the liver add one tablespoon wine, two tablespoons Tomato Sauce, and one-half tablespoon melted butter; heat in pan after lobster has been removed. As soon as sauce is heated, strain, and pour over lobster.

Lobster À La Muisset

Cut two one and one-half pound live lobsters in pieces for serving and crack large claws. Cook one tablespoon finely chopped shallot and three tablespoons chopped carrot in two tablespoons butter ten minutes, stirring constantly that carrots may not burn. Add two sprigs thyme, one-half bay leaf, two red peppers from pepper sauce, one teaspoon salt, one and one-third cups Brown Stock, two-thirds cup stewed and strained tomatoes, and three tablespoons Sherry wine. Add lobster and cook fifteen minutes. Remove lobster to serving dish, thicken sauce with butter and flour cooked together, and add one and one-half tablespoons brandy. Pour sauce around lobster, and sprinkle all with finely chopped chives.

Beef

Meat is the name applied to the flesh of all animals used for food. Beef is the meat of steer, ox, or cow, and is the most nutritious and largely consumed of all animal foods. Meat is chiefly composed of the albuminoids (fibrin, albumen, gelatin), fat, mineral matter, and water.

Fibrin is that substance in blood which causes it to coagulate when shed. It consists of innumerable delicate fibrils which entangle the blood corpuscles, and form with them a mass called blood clot. Fibrin is insoluble in both cold and hot water.

Albumen is a substance found in the blood and muscle. It is soluble in cold water, and is coagulated by hot water or heat. It begins to coagulate at 134deg F. and becomes solid at 160deg F. Here lies the necessity of cooking meat in hot water at a low temperature; of broiling meat at a high temperature, to quickly sear surface.

Gelatin in its raw state is termed *collagen*. It is a transparent, tasteless substance, obtained by boiling with water, muscle, skin, cartilage, bone, tendon, ligament, or membrane of animals. By this process, collagen of connective tissues is dissolved and converted into gelatin. Gelatin is insoluble in cold water, soluble in hot water, but in boiling water is decomposed, and by much boiling will not solidify on cooling. When subjected to cold water it swells, and is called hydrated gelatin. Myosin is the albuminoid of muscle, collagen of tendons, ossein of bones, and chondrin of cartilage and gristle.

Gelatin, although highly nitrogenous, does not act in the system as other nitrogenous foods, as a large quantity passes out unchanged.

Fat is the white or yellowish oily solid substance forming the chief part of the adipose tissue. Fat is found in thick layers directly under the skin, in other parts of the body, in bone, and is intermingled throughout the flesh. Fat as food is a great heat-giver and force-producer. *Suet* is the name given to fat which lies about the loins and kidneys. Beef suet tried out and clarified is much used in cookery for shortening and frying.

Mineral Matter. The largest amount of mineral matter is found in bone. It is principally calcium phosphate (phosphate of lime). Sodium chloride (common salt) is found in the blood and throughout the tissues.

Water abounds in all animals, constituting a large percentage of their weight.

The color of meat is due to the coloring matter (hæmoglobin) which abounds in the red corpuscles of the blood.

The distinctive flavor of meat is principally due to peptones and allied substances, and is intensified by the presence of sodium chloride and other salts.

The beef creature is divided by splitting through the backbone in two parts, each part being called *a side of beef*. Four hundred and fifty pounds is good market weight for a side of beef.

The most expensive cuts come from that part of the creature where muscles are but little used, which makes the meat finer-grained and consequently more tender, taking less time for cooking. Many of the cheapest cuts, though equally nutritious, need long, slow cooking to render them tender enough to digest easily. Tough meat which has long and coarse fibres is often found to be very juicy, on account of the greater motion of that part of the creature, which causes the juices to flow freely. Roasting and broiling, which develop so fine a flavor, can only be applied to the more expensive cuts. The liver, kidneys, and heart are of firm, close texture, and difficult of digestion. Tripe, which is

the first stomach of the ox, is easy of digestion, but on account of the large amount of fat which it contains, it is undesirable for those of weak digestion.

The quality of beef depends on age of the creature and manner of feeding. The best beef is obtained from a steer of four or five years. Good beef should be firm and of fine-grained texture, bright red in color, and well mottled and coated with fat. The fat should be firm and of a yellowish color. Suet should be dry, and crumble easily. Beef should not be eaten as soon as killed, but allowed to hang and ripen,—from two to three weeks in winter, and two weeks in summer.

Meat should be removed from paper as soon as it comes from market, otherwise paper absorbs some of the juices.

Meat should be kept in a cool place. In winter, beef may be bought in large quantities and cut as needed. If one chooses, a loin or rump may be bought and kept by the butcher, who sends cuts as ordered.

Always wipe beef, before cooking, with a cheese-cloth wrung out of cold water, but never allow it to stand in a pan of cold water, as juices will be drawn out.

The Effect Of Different Temperatures On The Cooking Of Meat

By putting meat in cold water and allowing water to heat gradually, a large amount of juice is extracted and meat is tasteless; and by long cooking the connective tissues are softened and dissolved, which gives to the stock when cold a jelly-like consistency. This principle applies to soup making.

By putting meat in boiling water, allowing the water to boil for a few minutes, then lowering the temperature, juices in the outer surface are quickly coagulated, and the inner juices are prevented from escaping. This principle applies where nutriment and flavor is desired in meat. Examples: boiled mutton, fowl.

By putting in cold water, bringing quickly to the boiling-point, then lowering the temperature and cooking slowly until meat is tender, some of the goodness will be in the stock, but a large portion left in the meat. Examples: fowl, when cooked to use for made-over dishes, Scotch Broth.

Broiled Beefsteak

The best cuts of beef for broiling are porterhouse, sirloin, cross-cut of rump steaks, and second and third cuts from top of round. Porterhouse and sirloin cuts are the most expensive, on account of the great loss in bone and fat, although price per pound is about the same as for cross-cut of rump. Round steak is very juicy, but, having coarser fibre, is not as tender. Steaks should be cut at least an inch thick, and from that to two and one-half inches. The flank end of sirloin steak should be removed before cooking. It may be put in soup kettle, or lean part may be chopped and utilized for

meat cakes, fat tried out and clarified for shortening.

To Broil Steak. Wipe with a cloth wrung out of cold water, and trim off superfluous fat. With some of the fat grease a wire broiler, place meat in broiler (having fat edge next to handle), and broil over a clear fire, turning every ten seconds for the first minute, that surface may be well seared, thus preventing escape of juices. After the first minute, turn occasionally until well cooked on both sides. Steak cut one inch thick will take five minutes, if liked rare; six minutes, if well done. Remove to hot platter, spread with butter, and sprinkle with salt and pepper.

Beefsteak With Maître D'Hôtel Butter

Serve Broiled Steak with Maître d'Hôtel Butter.

Porterhouse Steak With Mushroom Sauce

Serve broiled Porterhouse Steak with Mushroom Sauce.

Porterhouse Steak With Tomato And Mushroom Sauce

Serve broiled Porterhouse Steak with Tomato and Mushroom Sauce.

Porterhouse Steak, Bordelaise Sauce

Serve broiled porterhouse steak with

Bordelaise Sauce. Cook one shallot, finely chopped, with one-fourth cup claret until claret is reduced to two tablespoons, and strain. Melt two tablespoons butter, add one slice onion, two slices carrot, sprig of parsley, bit of bay leaf, eight peppercorns, and one clove, and cook until brown. Add three and one-half tablespoons flour, and when well browned add gradually one cup Brown Stock. Strain, let simmer eight minutes, add claret and one tablespoon butter. Season with salt and pepper. Remove marrow from a marrow-bone and cut in one-third inch slices; then poach in boiling water. Arrange on and around steak, and pour around sauce.

Beefsteak À La Henriette

- 1/2 cup butter
- 3 egg yolks
- 1 tablespoon cold water
- 1/2 tablespoon lemon juice
- 1/4 teaspoon salt
- 2 tablespoons tomato purée
- 1 tablespoon Worcestershire Sauce
- 1/2 tablespoon finely chopped parsley
- Few grains cayenne

Wash butter, and divide in three pieces. Put one piece in saucepan with yolks of eggs slightly beaten and mixed with water and lemon juice. Proceed same as in making Hollandaise Sauce I (see p. 274); then add tomato, parsley, and seasonings. Pour one-half sauce on a serving dish, lay a broiled porterhouse steak on sauce, and cover steak with remaining sauce. Garnish with parsley.

Beefsteak À La Victor Hugo

Wipe a porterhouse steak, broil, and serve with

Victor Hugo Sauce. Cook one-half teaspoon finely chopped shallot in one tablespoon tarragon vinegar five minutes. Wash one-third cup butter, and divide in thirds. Add one piece butter to mixture, with yolks two eggs, one teaspoon lemon juice, and one teaspoon meat extract. Cook over hot water, stirring constantly; as soon as butter is melted, add second piece, and then third piece. When mixture thickens, add one-half tablespoon grated horseradish.

Steak À La Chiron

Spread broiled rump steak with Hollandaise Sauce I (see p. 274) to which is added a few drops onion juice and one-half tablespoon finely chopped parsley.

Beefsteak À La Mirabeau

Garnish a broiled porterhouse or cross-cut of rump steak with anchovies, and stoned olives stuffed with green butter and chopped parsley. Arrange around steak stuffed tomatoes, and fried potato balls served in shells made from noodle mixture. Pour around the following sauce: Melt two tablespoons butter, add two and one-half tablespoons browned flour, then add one cup Chicken Stock. Season with one tablespoon tomato catsup and salt and pepper.

Noodle Shells. Make noodle mixture (see p. 147), roll as thinly as possible, cut in pieces, and shape over buttered inverted scallop shells. Put in dripping-pan and bake in a slow oven. As mixture bakes it curls from edges, when cases should be slipped from shells and pressed firmly in insides of shells to finish cooking and leave an impression of shells. Potato balls served in these shells make an attractive garnish for broiled fish and meats.

Beefsteak With Oyster Blanket

Wipe a sirloin steak, cut one and one-half inches thick, broil five minutes, and remove to platter. Spread with butter and sprinkle with salt and pepper. Clean one pint oysters, cover steak with same, sprinkle oysters with salt and pepper and dot over with butter. Place on grate in hot oven, and cook until oysters are plump.

Planked Beefsteak

Wipe, remove superfluous fat, and pan broil seven minutes a porterhouse or cross-cut of the rump steak cut one and three-fourths inches thick. Butter a plank and arrange a border of Duchess Potatoes close to edge, using a pastry bag and rose tube. Remove steak to plank, put in a hot oven, and bake until steak is cooked and potatoes are browned. Spread steak with butter, sprinkle with

salt, pepper, and finely chopped parsley. Garnish top of steak with sautéed mushroom caps, and put around steak at equal distances halves of small tomatoes sautéed in butter, and on top of each tomato a circular slice of cucumber.

Broiled Fillets Of Beef

Slices cut from the tenderloin are called sliced fillets of beef. Wipe sliced fillets, place in greased broiler, and broil four or five minutes over a clear fire. These may be served with Maître d'Hôtel Butter or Mushroom Sauce.

Cutlets Of Tenderloin With Chestnut Purée

Shape slices of tenderloin, one inch thick, in circular pieces. Broil five minutes. Spread with butter, sprinkle with salt and pepper. Arrange on platter around a mound of Chestnut Purée.

Sautéed Mignon Fillets Of Beef With Sauce Figaro

Wipe and sauté small fillets in hot omelet pan. Arrange in a circle on platter with cock's-comb shaped croûtons between, and pour sauce in the centre. Serve as a luncheon dish with Brussels Sprouts or String Beans.

Sautéed Mignon Fillets Of Beef With Sauce Trianon

Wipe and sauté small fillets in hot omelet pan. Arrange in a circle around a mound of fried potato balls sprinkled with parsley. Put Sauce Trianon on each fillet.

Sautéed Fillets Of Beef À La Moelle

Cut beef tenderloin in slices one inch thick, and trim into circular shapes. Season with salt and pepper, and broil six minutes in hot buttered frying-pan. Remove marrow from a marrow-bone, cut in one-third inch slices, poach in boiling water, and drain. Put a slice of marrow on each fillet. To liquor in pan add one tablespoon butter, two tablespoons flour, and one cup Brown Stock. Season with salt, pepper, and Madeira wine. Pour sauce around meat.

Sautéed Fillets Of Beef, Cherry Sauce

Prepare and cook six fillets same as Sautéed Fillets of Beef à la Moelle. Arrange on serving dish, sprinkle with salt and pepper, spread with butter, and pour over.

Cherry Sauce. Soak one-fourth cup glacé cherries fifteen minutes in boiling water. Drain, cut in halves, cover with Sherry wine, and let stand three hours.

Sautéed Fillets Of Beef With Stuffed Mushroom Caps

Prepare and cook six fillets same as Sautéed Fillets of Beef à la Moelle. Put a sautéed stuffed mushroom cap on each, sprinkle with buttered crumbs, and bake until crumbs are browned. Remove to serving

dish, pour around Espagnole Sauce, and garnish caps with strips of red and green pepper cut in fancy shapes.

Stuffing for Mushroom Caps. Clean and finely chop six mushroom caps; add one tablespoon each of parsley and onion finely chopped, and one tablespoon butter. Moisten with Espagnole Sauce (See p. 200).

Châteaubriand Of Beef

Trim off fat and skin from three pounds of beef cut from centre of fillet and flatten with a broad-bladed cleaver. Sprinkle with salt, brush over with olive oil, and broil over a clear fire twenty minutes. Remove to serving dish, garnish with red pepper cut in fancy shapes and parsley. Serve with

Espagnole Sauce. To one and one-half cups rich brown sauce add two-thirds teaspoon meat extract, one tablespoon lemon juice, and one and one-half tablespoons finely chopped parsley. Just before serving add one tablespoon butter and salt and pepper to taste.

Broiled Meat Cakes

Chop finely lean raw beef, season with salt and pepper, shape in small flat cakes, and broil in a greased broiler or frying-pan. Spread with butter, or serve with Maître d'Hôtel Butter. In forming the cakes, handle as little as possible; for if pressed too compactly, cakes will be found solid.

Hamburg Steaks

Chop finely one pound lean raw beef; season highly with salt, pepper, and a few drops onion juice or one-half shallot finely chopped. Shape, cook, and serve as Meat Cakes. A few gratings of nutmeg and one egg slightly beaten may be added.

Cannelon Of Beef

- 2 lbs. lean beef, cut from round
- Grated rind 1/2 lemon
- 1 tablespoon finely chopped parsley
- 1 egg
- 1/2 teaspoon onion juice
- 2 tablespoons melted butter
- Few gratings nutmeg
- 1 teaspoon salt
- 1/4 teaspoon pepper

Chop meat finely, and add remaining ingredients in order given. Shape in a roll six inches long, wrap in buttered paper, place on rack in dripping-pan, and bake thirty minutes. Baste every five minutes with one-fourth cup butter melted in one cup boiling water. Serve with Brown Mushroom Sauce I.

Roast Beef

The best cuts of beef for roasting are: tip or middle of sirloin, back of rump, or first three ribs. Tip of sirloin roast is desirable for a small family. Back of rump makes a superior roast for a large family, and is more economical than sirloin. It is especially desirable where a large quantity of dish gravy is liked, for in carving the meat juices follow the knife. Rib roasts contain more fat than either of the others, and are somewhat cheaper.

To Roast Beef. Wipe, put on a rack in dripping-pan, skin side down, rub over with salt, and dredge meat and pan with flour. Place in hot oven, that the surface may be quickly seared, thus preventing escape of inner juices. After flour in pan is browned, reduce heat, and baste with fat which has tried out; if meat is quite lean, it may be necessary to put trimmings of fat in pan. Baste every ten minutes; if this rule is followed, meat will be found more juicy. When meat is about half done, turn it over and dredge with flour, that skin side may be uppermost for final browning. For roasting, consult Time Table for Baking Meats, page 30.

If there is danger of flour burning in pan, add a small quantity of water; this, however, is not desirable, and seldom need be done if size of pan is adapted to size of roast. Beef to be well roasted should be started in hot oven and heat decreased, so that when carved the slices will be red throughout, with a crisp layer of golden brown fat on the top. Beef roasted when temperature is so high that surface is hardened before heat can penetrate to the centre is most unsatisfactory.

Sirloin or rib roasts may have the bones removed, and be rolled, skewered, and tied in shape. Chicago Butt is cut from the most tender part of back of rump. They are shipped from Chicago, our greatest beef centre, and if fresh and from a heavy creature, make excellent roasts at a small price.

Roast Beef Gravy. Remove some of the fat from pan, leaving four tablespoons. Place on front of range, add four tablespoons flour, and stir until well browned. The flour, dredged and browned in pan, should give additional color to gravy. Add gradually one and one-half cups boiling water, cook five minutes, season with salt and pepper, and strain. If flour should burn in pan, gravy will be full of black particles.

To Carve a Roast of Beef. Have roast placed on platter skin side up; with a pointed, thin-bladed, sharp knife cut a sirloin or rib roast in thin slices at right angles to the ribs, and cut slices from ribs. If there is tenderloin, remove it from under the bone, and cut in thin slices across grain of meat. Carve back of rump in thin slices with the grain of meat; by so doing, some of the least tender muscle will be served with that which is tender. By cutting across grain of meat, the tenderest portion is sliced by itself, as is the less tender portion.

Yorkshire Pudding

- 1 cup milk
- 1 cup flour
- 2 eggs
- 1/4 teaspoon salt
- *Miss C. J. Wills*

Mix salt and flour, and add milk gradually to form a smooth paste; then add eggs beaten until very light. Cover bottom of hot pan with some of beef fat tried out from roast, pour mixture in pan one-half inch deep. Bake twenty minutes in hot oven, basting after well risen, with some of the fat from pan in which meat is roasting. Cut in squares for serving. Bake, if preferred, in greased, hissing hot iron gem pans.

Larded Fillet Of Beef

The tenderloin of beef which lies under the loin and rump is called fillet of beef. The fillet under the loin is known as the long fillet, and when removed no porterhouse steaks can be cut; therefore it commands a higher price than the short fillet lying under rump. Two short fillets are often skewered together, and served in place of a long fillet.

Wipe, remove fat, veins, and any tendinous portions; skewer in shape, and lard upper side with grain of meat, following directions for larding on page 23. Place on a rack in small pan, sprinkle with salt and pepper, dredge with flour, and put in bottom of pan small pieces of pork. Bake twenty to thirty minutes in hot oven, basting three times. Take out skewer, remove meat to hot platter, and garnish with watercress. Serve with Mushroom, Figaro, or Horseradish Sauce I.

Fillet Of Beef With Vegetables

Wipe a three-pound fillet, trim, and remove fat. Put one-half pound butter in hot frying-pan and when melted add fillet, and turn frequently until the entire surface is seared and well browned; then turn occasionally until done, the time required being about thirty minutes. Remove to serving dish and garnish with one cup each cooked peas and carrots cut in fancy shapes, both well seasoned, one-half cup raisins seeded and cooked in boiling water until soft, and the caps from one-half pound fresh mushrooms sautéed in butter five minutes. Serve with

Brown Mushroom Sauce. Pour off one-fourth cup fat from frying-pan, add five tablespoons flour, and stir until well browned; then add one cup Brown Soup Stock, one-third cup mushroom liquor, and the caps from one-half pound mushrooms cut in slices and sautéed in butter three minutes. Season with salt and pepper, and just before serving add gradually, while stirring constantly, the butter remaining in frying-pan.

To obtain mushroom liquor, scrape stems of mushrooms, break in pieces, cover with cold water, and cook slowly until liquid is reduced to one-third cup.

Braised Beef

- 3 lbs. beef from lower part of round or face of rump
- 2 thin slices fat salt pork
- 1/2 teaspoon peppercorns
- 1/4 cup carrot
- 1/4 cup turnip
- 1/4 cup onion
- 1/4 cup celery
- Salt and pepper

Fry out pork and remove scraps. Wipe meat, sprinkle with salt and pepper, dredge with flour, and brown entire surface in pork fat. When turning meat, avoid piercing with fork or skewer, which allows the inner juices to escape. Place on trivet in deep granite pan or in earthen pudding-dish, and surround with vegetables, peppercorns, and three cups boiling water; cover closely, and bake four hours in very slow oven, basting every half-hour, and turning after second hour. Throughout

the cooking, the liquid should be kept below the boiling-point. Serve with Horseradish Sauce, or with sauce made from liquor in pan.

Beef À La Mode

Insert twelve large lardoons in a four-pound piece of beef cut from the round. Make incisions for lardoons by running through the meat a large skewer. Season with salt and pepper, dredge with flour, and brown the entire surface in pork fat. Put on a trivet in kettle, surround with one-third cup each carrot, turnip, celery, and onion cut in dice, sprig of parsley, bit of bay leaf, and water to half cover meat. Cover closely, and cook slowly four hours, keeping liquor below the boiling-point. Remove to hot platter. Strain liquor, thicken and season to serve as a gravy. When beef is similarly prepared (with exception of lardoons and vegetables), and cooked in smaller amount of water, it is called Smothered Beef, or Pot Roast. A bean-pot (covered with a piece of buttered paper, tied firmly down) is the best utensil to use for a Pot Roast.

Pressed Beef Flank

Wipe, remove superfluous fat, and roll a flank of beef. Put in a kettle, cover with boiling water, and add one tablespoon salt, one-half teaspoon peppercorns, a bit of bay leaf, and a bone or two which may be at hand. Cook slowly until meat is in shreds; there should be but little liquor in kettle when meat is done. Arrange meat in a deep pan, pour over liquor, cover, and press with a heavy weight. Serve cold, thinly sliced.

Beef Stew With Dumplings

Aitchbone, weighing 5 lbs.

- 4 cups potatoes, cut in 1/4 inch slices
- 2/3 cup turnip
- 2/3 cup carrot
- 1/2 small onion, cut in thin slices
- 1/4 cup flour
- Salt
- Pepper

Wipe meat, remove from bone, cut in one and one-half inch cubes, sprinkle with salt and pepper, and dredge with flour. Cut some of the fat in small pieces and try out in frying-pan. Add meat and stir constantly, that the surface may be quickly seared; when well browned, put in kettle, and rinse frying-pan with boiling water, that none of the goodness may be lost. Add to meat remaining fat, and bone sawed in pieces; cover with boiling water and boil five minutes, then cook at a lower temperature until meat is tender (time required being about three hours). Add carrot, turnip, and onion, with salt and pepper the last hour of cooking. Parboil potatoes five minutes, and add to stew fifteen minutes before taking from fire. Remove bones, large pieces of fat, and then skim. Thicken with one-fourth cup flour, diluted with enough cold water to pour easily. Pour in deep hot platter, and surround with dumplings. Remnants of roast beef are usually made into a beef stew; the meat

having been once cooked, there is no necessity of browning it. If gravy is left, it should be added to the stew.

Dumplings

- 2 cups flour
- 4 teaspoons baking powder
- 1/2 teaspoon salt
- 2 teaspoons butter
- 3/4 cup milk

Mix and sift dry ingredients. Work in butter with tips of fingers, and add milk gradually, using a knife for mixing. Toss on a floured board, pat, and roll out to one-half inch in thickness. Shape with biscuit-cutter, first dipped in flour. Place closely together in a buttered steamer, put over kettle of boiling water, cover closely, and steam twelve minutes. A perforated tin pie plate may be used in place of steamer. A little more milk may be used in the mixture, when it may be taken up by spoonfuls, dropped and cooked on top of stew. In this case some of the liquid must be removed, that dumplings may rest on meat and potato, and not settle into liquid.

Corned Beef

Corned beef has but little nutritive value. It is used to give variety to our diet in summer, when fresh meats prove too stimulating. It is eaten by the workingman to give bulk to his food. The best pieces of corned beef are the rattle rand and fancy brisket. The fancy brisket commands a higher price and may be easily told from the rattle rand by the selvage on lower side and the absence of bones. The upper end of brisket (butt end) is thick and composed mostly of lean meat, the middle cut has more fat but is not well mixed, while the lower (navel end) has a large quantity of fat. The rattle rand contains a thick lean end; the second cut contains three distinct layers of meat and fat, and is considered the best cut by those who prefer meat well streaked with fat. The rattle rand has a thin end, which contains but one layer of lean meat and much fat, consequently is not a desirable piece.

To Boil Corned Beef. Wipe the meat and tie securely in shape, if this has not been already done at market. Put in kettle, cover with cold water, and bring slowly to boiling-point. Boil five minutes, remove scum, and cook at a lower temperature until tender. Cool slightly in water in which it was cooked, remove to a dish, cover, and place on cover a weight, that meat may be well pressed. The lean meat and fat may be separated and put in alternate layers in a bread pan, then covered and pressed.

Boiled Dinner

A boiled dinner consists of warm impressed corned beef, served with cabbage, beets, turnips, carrots, and potatoes. After removing meat from water, skim off fat and cook vegetables (with exception of beets, which require a long time for cooking) in this water. Carrots require a longer time for cooking than cabbage or turnips. Carrots and turnips, if small, may be cooked whole; if large, cut in pieces. Cabbage and beets are served in separate dishes, other vegetables on same dish with meat.

Boiled Tongue

A boiled corned tongue is cooked the same as Boiled Corned Beef. If very salt, it should be soaked in cold water several hours, or over night, before cooking. Take from water when slightly cooled and remove skin.

Braised Tongue

A fresh tongue is necessary for braising. Put tongue in kettle, cover with boiling water, and cook slowly two hours. Take tongue from water and remove skin and roots. Place in deep pan and surround with one-third cup each carrot, onion, and celery, cut in dice, and one sprig parsley; then pour over four cups sauce. Cover closely, and bake two hours, turning after the first hour. Serve on platter and strain around the sauce.

Sauce for Tongue. Brown one-fourth cup butter, add one-fourth cup flour and stir together until well browned. Add gradually four cups of water in which tongue was cooked. Season with salt and pepper and add one teaspoon Worcestershire Sauce. One and one-half cups stewed and strained tomatoes may be used in place of some of the water.

Broiled Liver

Cover with boiling water slices of liver cut one-half inch thick, let stand five minutes to draw out the blood; drain, wipe, and remove the thin outside skin and veins. Sprinkle with salt and pepper, place in a greased wire broiler and broil five minutes, turning often. Remove to a hot platter, spread with butter, and sprinkle with salt and pepper.

Liver And Bacon

Prepare as for Broiled Liver, cut in pieces for serving, sprinkle with salt and pepper, dredge with flour, and fry in bacon fat. Serve with bacon.

Bacon I

Place strips of thinly cut bacon on board, and with a broad-bladed knife make strips as thin as possible. Put in hot frying-pan and cook until bacon is crisp and brown, occasionally pouring off fat from pan, turning frequently. Drain on brown paper.

Bacon II

Place thin slices of bacon (from which the rind has been removed) closely together in a fine wire broiler; place broiler over dripping-pan and bake in a hot oven until bacon is crisp and brown, turning once. Drain on brown paper. Fat which has dripped into the pan should be poured out and used for frying liver, eggs, potatoes, etc.

Braised Liver

Skewer, tie in shape, and lard upper side of calf's liver. Place in deep pan, with trimmings from lardoons; surround with one-fourth cup each, carrot, onion, and celery, cut in dice; one-fourth teaspoon peppercorns, two cloves, bit of bay leaf, and two cups Brown Stock or water. Cover closely and bake slowly two hours, uncovering the last twenty minutes. Remove from pan, strain liquor, and use liquor for the making of a brown sauce with one and one-half tablespoons butter and two tablespoons flour. Pour sauce around liver for serving.

Calf's Liver, Stuffed And Larded

Make a deep cut nearly the entire length of liver, beginning at thick end, thus making a pouch for stuffing. Fill pouch. Skewer liver and lard upper side. Put liver in baking-pan, pour around two cups Brown Sauce, made of one tablespoon each butter and flour, and two cups Brown Stock, salt, and pepper. Bake one and one-fourth hours, basting every twelve minutes with sauce in pan. Remove to serving dish, strain sauce around liver, and garnish with Glazed or French Fried Onions (see p. 296).

Stuffing. Mix one-half pound chopped cooked cold ham, one-half cup stale bread crumbs, one half small onion finely chopped, and one tablespoon finely chopped parsley. Moisten with Brown Sauce; then add one beaten egg, and season with salt and pepper.

Broiled Tripe

Fresh honeycomb tripe is best for broiling. Wipe tripe as dry as possible, dip in fine cracker dust and olive oil or melted butter, draining off all fat that is possible, and again dip in cracker dust. Place in a greased broiler and broil five minutes, cooking smooth side of tripe the first three minutes. Place on a hot platter, honeycomb side up, spread with butter, and sprinkle with salt and pepper. Broiled tripe is at its best when cooked over a charcoal fire.

Tripe In Batter

Wipe tripe and cut in pieces for serving. Sprinkle with salt and pepper, dip in batter, fry in a small quantity of hot fat, and drain.

Tripe Batter. Mix one cup flour with one-fourth teaspoon salt; add gradually one-half cup cold water, and when perfectly smooth add one egg well beaten, one-half tablespoon vinegar, and one teaspoon olive oil or melted butter.

Tripe Fried In Batter

Cut pickled honeycomb tripe in pieces for serving; wash, cover with boiling water, and simmer gently twenty minutes. Drain, and again cover, using equal parts cold water and milk. Heat to boiling-point, again drain, wipe as dry as possible, sprinkle with salt and pepper, brush over with melted butter, dip in batter, fry in deep fat, and drain on brown paper. Serve with slices of lemon and Chili Sauce.

Batter. Mix and sift one cup flour, one and one-half teaspoons baking powder, one-fourth teaspoon salt, and a few grains pepper. Add one-third cup milk and one egg well beaten.

Lyonnaise Tripe

Cut honeycomb tripe in pieces two inches long by one-half inch wide, having three cupfuls. Put in a pan and place in oven that water may be drawn out. Cook one tablespoon finely chopped onion in two tablespoons butter until slightly browned, add tripe drained from water, and cook five minutes. Sprinkle with salt and pepper and finely chopped parsley.

Tripe À La Creole

Cut, bake, and drain tripe as for Lyonnaise Tripe. Cook same quantity of butter and onion, add one-eighth green pepper finely chopped, one tablespoon flour, one-half cup stock, one-fourth cup drained tomatoes, and one fresh mushroom cut in slices; then add tripe and cook five minutes. Season with salt and pepper.

Tripe À La Provençale

Add to Lyonnaise Tripe one tablespoon white wine. Cook until quite dry, add one-third cup Tomato Sauce, cook two minutes, season with salt and pepper, and serve.

Calf's Head À La Terrapin

Wash and clean a calf's head, and cook until tender in boiling water to cover. Cool, and cut meat from cheek in small cubes. To two cups meat dice add one cup sauce made of two tablespoons butter, two tablespoons flour, and one cup White Stock, seasoned with one-half teaspoon salt, one-eighth teaspoon pepper, and a few grains cayenne. Add one-half cup cream and yolks of two eggs slightly beaten; cook two minutes and add two tablespoons Madeira wine.

Calves' Tongues

Cook tongues until tender in boiling water to cover, with six slices carrot, two stalks celery, one onion stuck with six cloves, one-half teaspoon peppercorns and one-half tablespoon salt; take from water and remove skin and roots. Split and pour over equal parts brown stock and tomatoes boiled until thick.

Calves' Tongues, Sauce Piquante

Cook four tongues, until tender, in boiling water, to cover, with six slices carrot, two stalks celery, one onion stuck with eight cloves, one teaspoon peppercorns, and one-half tablespoon salt. Take tongues from water, and remove skin and roots. Cut in halves lengthwise and reheat in

Sauce Piquante. Brown one-fourth cup butter, add six tablespoons flour, and stir until well browned; then add two cups Brown Stock and cook three minutes. Season with two-thirds teaspoon salt, one-half teaspoon paprika, few grains of cayenne, one tablespoon vinegar, one-half tablespoon capers, and one cucumber pickle thinly sliced. Served garnished with cucumber pickles, and cold cooked beets cut in fancy shapes.

Calf's Heart

Wash a calf's heart, remove veins, arteries, and clotted blood. Stuff (using half quantity of Fish Stuffing I on page 164, seasoned highly with sage) and sew. Sprinkle with salt and pepper, roll in flour, and brown in hot fat. Place in small, deep baking-pan, half cover it with boiling water, cover closely, and bake slowly two hours, basting every fifteen minutes. It may be necessary to add more water. Remove heart from pan, and thicken the liquor with flour diluted with a small quantity of cold water. Season with salt and pepper, and pour around the heart before serving.

Stuffed Hearts With Vegetables

Clean and wash calves' hearts, stuff, skewer into shape, lard, season with salt and pepper, dredge with flour, and sauté in pork fat, adding to fat one stalk celery, one tablespoon chopped onion, two sprigs parsley, four slices carrot cut in pieces, half the quantity of turnip, a bit of bay leaf, two cloves, and one-fourth teaspoon peppercorns. Turn hearts occasionally until well browned, then add one and one-half cups Brown Stock, cover, and cook slowly one and one-half hours. Serve with cooked carrots and turnips cut in strips or fancy shapes.

Braised Ox Joints

Cut ox-tail at joints, parboil five minutes, wash thoroughly, dredge with flour, and sauté in butter (to which has been added a sliced onion) until well browned. Add one-fourth cup flour, two cups each brown stock, water, and canned tomatoes, one teaspoon salt, and one-fourth teaspoon pepper. Turn into an earthen pudding-dish, cover, and cook slowly three and one-half hours. Remove ox-tail, strain sauce, and return ox-tail and sauce to oven to finish cooking. Add two-thirds cup each carrot and turnip (shaped with a vegetable cutter in pieces one-inch long, and about as large around as macaroni) parboiled in boiled salted water five minutes. As soon as vegetables are soft, add Sherry wine to taste, and more salt and pepper, if needed. The wine may be omitted.

Ways Of Warming Over Beef

Roast Beef with Gravy

Cut cold roast beef in thin slices, place on a warm platter, and pour over some of the gravy reheated to the boiling-point. If meat is allowed to stand in gravy on the range, it becomes hard and tough.

Roast Beef, Mexican Sauce

Reheat cold roast beef cut in thin slices, in

Mexican Sauce. Cook one onion, finely chopped, in two tablespoons butter five minutes. Add one red pepper, one green pepper, and one clove of garlic, each finely chopped, and two tomatoes peeled and cut in pieces. Cook fifteen minutes, add one teaspoon Worcestershire Sauce, one-fourth teaspoon celery salt, and salt to taste.

Cottage Pie

Cover bottom of a small greased baking-dish with hot mashed potato, add a thick layer of roast beef, chopped or cut in small pieces (seasoned with salt, pepper, and a few drops onion juice) and moistened with some of the gravy; cover with a thin layer of mashed potato, and bake in a hot oven long enough to heat through.

Beefsteak Pie

Cut remnants of cold broiled steak or roast beef in one-inch cubes. Cover with boiling water, add one-half onion, and cook slowly one hour. Remove onion, thicken gravy with flour diluted with cold water, and season with salt and pepper. Add potatoes cut in one-fourth inch slices, which have been parboiled eight minutes in boiling salted water. Put in a buttered pudding-dish, cool, cover with baking-powder biscuit mixture or pie-crust. Bake in a hot oven. If covered with pie crust, make several incisions in crust that gases may escape.

Cecils with Tomato Sauce

- 1 cup cold roast beef or rare steak finely chopped
- Salt
- Pepper
- Onion juice
- Worcestershire Sauce
- 2 tablespoons bread crumbs
- 1 tablespoon melted butter
- Yolk 1 egg slightly beaten

Season beef with salt, pepper, onion juice, and Worcestershire Sauce; add remaining ingredients, shape after the form of small croquettes, pointed at ends. Roll in flour, egg, and crumbs, fry in deep fat, drain, and serve with Tomato Sauce.

Corned Beef Hash

Remove skin and gristle from cooked corned beef, then chop the meat. When meat is very fat, discard most of the fat. To chopped meat add an equal quantity of cold boiled chopped potatoes. Season with salt and pepper, put into a hot buttered frying-pan, moisten with milk or cream, stir until well mixed, spread evenly, then place on a part of the range where it may slowly brown underneath. Turn, and fold on a hot platter. Garnish with sprig of parsley in the middle.

Corned Beef Hash with Beets

When preparing Corned Beef hash, add one-half as much finely chopped cooked beets as potatoes. Cold roast beef or one-half roast beef and one-half corned beef may be used.

Dried Beef with Cream

- 1/4 lb. smoked dried beef, thinly sliced
- 1 cup scalded cream
- 1 1/2 tablespoons flour

Remove skin and separate meat in pieces, cover with hot water, let stand ten minutes, and drain. Dilute flour with enough cold water to pour easily, making a smooth paste; add to cream, and cook in double boiler ten minutes. Add beef, and reheat. One cup White Sauce I may be used in place of cream, omitting the salt.

Lamb And Mutton

Lamb is the name given to the meat of lambs; mutton, to the meat of sheep. Lamb, coming as it does from the young creature, is immature, and less nutritious than mutton. The flesh of mutton ranks with the flesh of beef in nutritive value and digestibility. The fat of mutton, on account of its larger percentage of stearic acid, is more difficult of digestion than the fat of beef.

Lamb may be eaten soon after the animal is killed and dressed; mutton must hang to ripen. Good mutton comes from a sheep about three years old, and should hang from two to three weeks. The English South Down Mutton is cut from creatures even older than three years. Young lamb, when killed from six weeks to three months old, is called spring lamb, and appears in the market as early as the last of January, but is very scarce until March. Lamb one year old is called a yearling. Many object to the strong flavor of mutton; this is greatly overcome by removing the pink skin and trimming off superfluous fat.

Lamb and mutton are divided into two parts by cutting through entire length of backbone; then subdivided into fore and hind quarter, eight ribs being left on hind quarter,—while in beef but three ribs are left on hind-quarter. These eight ribs are cut into chops and are known as *rib chops*. The meat which lies between these ribs and the leg, cut into chops, is known as *loin* or *kidney chops*.

Lamb and mutton chops cut from loin have a small piece of tenderloin on one side of bone, and correspond to porterhouse steaks in the beef creature. Rib chops which have the bone cut short and scraped clean, nearly to the lean meat, are called *French chops*.

The leg is sold whole for boiling or roasting. The fore-quarter may be boned, stuffed, rolled, and roasted, but is more often used for broth, stew, or fricassee.

For a *saddle of mutton* the loin is removed whole before splitting the creature. Some of the bones are removed and the flank ends are rolled, fastened with wooden skewers, and securely tied to keep skewers in place.

Good quality mutton should be fine-grained and of bright pink color; the fat white, hard, and flaky. If the outside skin comes off easily, mutton is sure to be good. Lamb chops may be easily distinguished from mutton chops by the red color of bone. As lamb grows older, blood recedes from bones; therefore in mutton the bone is white. In *leg of lamb* the bone at joint is serrated, while in leg of mutton the bone at joint is smooth and rounded. Good mutton contains a larger proportion of fat than good beef. Poor mutton is often told by the relatively small proportion of fat and lean as compared to bone.

Lamb is usually preferred well done; mutton is often cooked rare.

Broiled Lamb Or Mutton Chops

Wipe chops, remove superfluous fat, and place in a broiler greased with some of mutton fat. In loin chops, flank may be rolled and fastened with a small wooden skewer. Follow directions for Broiling Beefsteak on page 196.

Pan-Broiled Chops

Chops for pan broiling should have flank and most of fat removed. Wipe chops and put in hissing hot frying-pan.

Turn as soon as under surface is seared, and sear other side. Turn often, using knife and fork that the surface may not be pierced, as would be liable if fork alone were used. Cook six minutes if liked rare, eight to ten minutes if liked well done. Let stand around edge of frying-pan to brown the outside fat. When half cooked, sprinkle with salt. Drain on brown paper, put on hot platter, and spread with butter or serve with Tomato or Soubise Sauce.

Breaded Mutton Chops

Wipe and trim chops, sprinkle with salt and pepper, dip in crumbs, egg, and crumbs, fry in deep fat from five to eight minutes, and drain. Serve with Tomato Sauce, or stack around a mound of mashed potatoes, fried potato balls, or green peas. Never fry but four at a time, and allow fat to reheat between fryings. After testing fat for temperature, put in chops and place kettle on back of range, that surface of chops may not be too brown while the inside is still underdone.

Chops À La Signora

Gash French Chops on outer edge, extending cut half-way through lean meat. Insert in each gash a slice of truffle, sprinkle with salt and pepper, wrap in calf's caul. Roll in flour, dip in egg, then in stale bread crumbs, and sauté in butter eight minutes, turning often. Place in oven four minutes to finish cooking. Arrange on hot platter for serving, and place on top of each a fresh broiled mushroom or mushroom baked in cream. To fat in pan add a small quantity of boiling water and pour around chops. This is a delicious way of cooking chops for a dinner party.

Lamb Chops À La Marseilles

Pan broil, on one side, six French chops, cover cooked side with Mushroom Sauce, place in a buttered baking-dish, and bake in a hot oven eight minutes. Remove to serving dish, place a paper frill on each chop, and garnish with parsley.

Mushroom Sauce. Brown one and one-half tablespoons butter, add three tablespoons flour, and stir until well browned; then add one-half cup highly seasoned Brown Stock. Add one-fourth cup chopped canned mushrooms, and season with salt and pepper.

Chops À La Castellane

Broil six lamb chops, arrange on slices of fried eggplant, and pour around the following sauce: Brown three tablespoons butter, add three and one-half tablespoons flour, and stir until well browned; then add, gradually, one cup rich Brown Stock. Cook three tablespoons lean raw ham cut in small cubes in one-half tablespoon butter two minutes. Moisten with two tablespoons Sherry wine, and add to sauce with two tablespoons finely shredded green pepper. Season with salt and pepper.

Chops En Papillote

Finely chop the whites of three “hard-boiled” eggs and force yolks through potato ricer, mix, and add to three common crackers, rolled and sifted; then add three tablespoons melted butter, salt, pepper, and onion juice, to taste. Add enough cream to make of right consistency to spread. Cover chops thinly with mixture and wrap in buttered paper cases. Bake twenty-five minutes in hot oven. Remove from cases, place on hot platter, and garnish with parsley.

Mutton Cutlets À La Maintenon

Wipe six French Chops, cut one and one-half inches thick. Split meat in halves, cutting to bone. Cook two and one-half tablespoons butter and one tablespoon onion five minutes; remove onion, add one-half cup chopped mushrooms, and cook five minutes; then add two tablespoons flour, three tablespoons stock, one teaspoon finely chopped parsley, one-fourth teaspoon salt, and a few grains cayenne. Spread mixture between layers of chops, press together lightly, wrap in buttered paper cases, and broil ten minutes. Serve with Spanish Sauce.

Boiled Leg Of Mutton

Wipe meat, place in a kettle, and cover with boiling water. Bring quickly to boiling-point, boil five minutes, and skim. Set on back of range and simmer until meat is tender. When half done, add one tablespoon salt. Serve with Caper Sauce, or add to two cups White Sauce (made of one-half milk and one-half Mutton Stock), two “hard-boiled” eggs cut in slices.

Braised Leg Of Mutton

Order a leg of mutton boned. Wipe, stuff, sew, and place in deep pan. Cook five minutes in one-fourth cup butter, a slice each of onion, carrot, and turnip cut in dice, one-half bay leaf, and a sprig each of thyme and parsley. Add three cups hot water, one and one-half teaspoons salt, and twelve peppercorns; pour over mutton. Cover closely, and cook slowly three hours, uncovering for the last half-hour. Remove from pan to hot platter. Brown three tablespoons butter, add four tablespoons flour, and stir until well browned; then pour on slowly the strained liquor; there should be one and three-fourths cups.

Stuffing

- 1 cup cracker crumbs
- 1/4 cup melted butter
- 1/4 teaspoon salt
- 1/8 teaspoon pepper
- 1/2 tablespoon Poultry Seasoning
- 1/4 cup boiling water

Roast Lamb

A leg of lamb is usually sent from market wrapped in caul; remove caul, wipe meat, sprinkle with salt and pepper, place on rack in dripping-pan, and dredge meat and bottom of pan with flour. Place in hot oven, and baste as soon as flour in pan is brown, and every fifteen minutes afterwards until meat is done, which will take about one and three-fourths hours. It may be necessary to put a small quantity of water in pan while meat is cooking. Leg of lamb may be boned and stuffed for roasting. See Stuffing, under Braised Mutton.

Make gravy, following directions for Roast Beef Gravy on page 202, or serve with Currant Jelly Sauce.

To Carve a Leg of Lamb. Cut in thin slices across grain of meat to the bone, beginning at top of the leg.

Lamb Bretonne

Serve hot thinly sliced roast lamb with

Beans Bretonne. Soak one and one-half cups pea beans over night in cold water to cover, drain, and parboil until soft; again drain, put in earthen-ware dish or bean-pot, add tomato sauce, cover, and cook until beans have nearly absorbed sauce.

Tomato Sauce. Mix one cup stewed and strained tomatoes, one cup white stock, six canned pimientos rubbed through a sieve, one onion finely chopped, two cloves garlic finely chopped, one-fourth cup butter, and two teaspoons salt.

Saddle Of Mutton

Mutton for a saddle should always be dressed at market. Wipe meat, sprinkle with salt and pepper, place on rack in dripping-pan, and dredge meat and bottom of pan with flour. Bake in hot oven one and one-fourth hours, basting every fifteen minutes. Serve with Currant Jelly Sauce.

To Carve a Saddle of Mutton, cut thin slices parallel with backbone, then slip the knife under and separate slices from ribs.

Saddle Of Mutton, Currant Mint Sauce

Follow directions for Saddle of Mutton, and serve with

Currant Mint Sauce. Separate two-thirds tumbler of currant jelly in pieces, but do not beat it. Add one and one-half tablespoons finely chopped mint leaves and shavings from the rind of one-fourth orange.

Saddle Of Lamb À L'Estragon

Wipe meat, sprinkle with salt and pepper, place on rack in dripping-pan, and dredge meat and bottom of pan with flour. Bake in hot oven one and one-fourth hours, basting every fifteen minutes. Remove to hot serving dish and pour around

Estragon Sauce. Brown four tablespoons butter, add four tablespoons flour (which has been previously browned), and pour on gradually, while stirring constantly, two cups bouillon, and one-half cup stock which has infused with one tablespoon tarragon one hour.

Crown Of Lamb

Select parts from two loins containing ribs, scrape flesh from bone between ribs, as far as lean meat, and trim off backbone. Shape each piece in a semicircle, having ribs outside, and sew pieces together to form a crown. Trim ends of bones evenly, care being taken that they are not left too long, and wrap each bone in a thin strip of fat salt pork or insert in cubes of fat salt pork to prevent bone from burning; then cover with buttered paper. Roast one and one-fourth hours.

Remove pork from bones before serving, and fill centre with Purée of Chestnuts.

Lamb En Casserole

Wipe two slices of lamb cut one and one-fourth inches thick from centre of leg. Put in hot frying-pan, and turn frequently until seared and browned on both sides. Brush over with melted butter, season with salt and pepper, and bake in casserole dish twenty minutes or until tender. Parboil three-fourths cup carrot, cut in strips, fifteen minutes; drain, and sauté in one tablespoon bacon fat to which has been added one tablespoon finely chopped onion. Add to lamb, with one cup potato balls, two cups thin Brown Sauce, three tablespoons Sherry wine, and pepper to taste. Cook until potatoes are soft, then add twelve small onions cooked until soft, then drained and sautéed in butter to which is added one tablespoon sugar. Onions need not be sautéed unless they are desired glazed. Serve from casserole dish.

Mutton Curry

Wipe and cut meat from fore-quarter of mutton in one-inch pieces; there should be three cupfuls. Put in kettle, cover with cold water, and bring quickly to boiling-point; drain in colander and pour over one quart cold water. Return meat to kettle, cover with one quart boiling water, add three onions cut in slices, one-half teaspoon peppercorns, and a sprig each of thyme and parsley. Simmer until meat is tender, remove meat, strain liquor, and thicken with one-fourth cup each of butter and flour cooked together; to the flour add one-half teaspoon curry powder, one-half teaspoon salt, and one-eighth teaspoon pepper. Add meat to gravy, reheat, and serve with border of steamed rice.

Fricassee Of Lamb With Brown Gravy

Order three pounds lamb from the fore-quarter, cut in pieces for serving. Wipe meat, put in kettle, cover with boiling water, and cook slowly until meat is tender. Remove from water, cool, sprinkle with salt and pepper, dredge with flour, and sauté in butter or mutton fat. Arrange on platter, and pour around one and one-half cups Brown Sauce made from liquor in which meat was cooked after removing all fat. It is better to cook meat the day before serving, as then fat may be more easily removed.

Mutton Broth

- 3 lbs. mutton (from the neck)
- 2 quarts cold water
- 1 teaspoon salt

- Few grins pepper
- 3 tablespoons rice or
- 3 tablespoons barley

Wipe meat, remove skin and fat, and cut in small pieces. Put into kettle with bones, and cover with cold water. Heat gradually to boiling-point, skim, then season with salt and pepper. Cook slowly until meat is tender, strain, and remove fat. Reheat to boiling-point, add rice or barley, and cook until rice or barley is tender. If barley is used, soak over night in cold water. Some of the meat may be served with the broth.

Irish Stew With Dumplings

Wipe and cut in pieces three pounds lamb from the fore-quarter. Put in kettle, cover with boiling water, and cook slowly two hours or until tender. After cooking one hour add one-half cup each carrot and turnip cut in one-half inch cubes, and one onion cut in slices. Fifteen minutes before serving add four cups potatoes cut in one-fourth inch slices, previously parboiled five minutes in boiling water. Thicken with one-fourth cup flour, diluted with enough cold water to form a thin smooth paste. Season with salt and pepper, serve with Dumplings. (See p. 205.)

Scotch Broth

Wipe three pounds mutton cut from fore-quarter. Cut lean meat in one-inch cubes, put in kettle, cover with three pints cold water, bring quickly to boiling-point, skim, and add one-half cup barley which has been soaked in cold water over night; simmer one and one-half hours, or until meat is tender. Put bones in a second kettle, cover with cold water, heat slowly to boiling-point, skim, and boil one and one-half hours. Strain water from bones and add to meat. Fry five minutes in two tablespoons butter, one-fourth cup each of carrot, turnip, onion, and celery, cut in one-half inch dice, add to soup with salt and pepper to taste, and cook until vegetables are soft. Thicken with two tablespoons each of butter and flour cooked together. Add one-half tablespoon finely chopped parsley just before serving. Rice may be used in place of barley.

Lambs' Kidneys I

Soak, pare, and cut in slices six kidneys, and sprinkle with salt and pepper. Melt two tablespoons butter in hot frying-pan, put in kidneys, and cook five minutes; dredge thoroughly with flour, and add two-thirds cup boiling water or hot Brown Stock. Cook five minutes, add more salt and pepper if needed. Lemon juice, onion juice, or Madeira wine may be used for additional flavor. Kidneys must be cooked a short time, or for several hours; they are tender after a few minutes' cooking, but soon toughen, and need hours of cooking to again make them tender.

Lambs' Kidneys II

Soak, pare, trim, and slice six kidneys. Sprinkle with salt and pepper, sauté in butter, and remove to a hot dish. Cook one-half tablespoon finely chopped onion in two tablespoons butter until brown; add three tablespoons flour, and pour on slowly one and one-half cups hot stock. Season with salt and pepper, strain, add kidneys, and one tablespoon Madeira wine.

Ragout Of Kidneys

Soak lambs' kidneys one hour in lukewarm water. Drain, clean, cut in slices, season with salt and pepper, dredge with flour, and sauté in butter. Fry one sliced onion and one-half shallot, finely chopped, in three tablespoons butter until yellow; add three tablespoons flour and one and one-fourth cups Brown Stock. Cook five minutes, strain, and add one-half cup mushroom caps peeled and cut in quarters; season with salt and pepper, add kidneys, and serve as soon as heated. White wine may be added if desired.

Kidney Rolls

Mix one-half cup stale bread crumbs, one-half small onion, finely chopped, and one-half tablespoon finely chopped parsley. Season with salt and pepper and moisten with beaten egg. Spread mixture on thin slices of bacon, fasten around pieces of lambs' kidney, using skewers. Bake in a hot oven twenty minutes.

Ways Of Warming Over Mutton And Lamb

Minced Lamb on Toast

Remove dry pieces of skin and gristle from remnants of cold roast lamb, then chop meat. Heat in well-buttered frying-pan, season with salt, pepper, and celery salt, and moisten with a little hot water or stock; or, after seasoning, dredge well with flour, stir, and add enough stock to make thin gravy. Pour over small slices of buttered toast.

Scalloped Lamb

Remove skin and fat from thin slices of cold roast lamb, and sprinkle with salt and pepper. Cover bottom of a buttered baking-dish with buttered cracker crumbs; cover meat with boiled macaroni, and add another layer of meat and macaroni. Pour over Tomato Sauce, and cover with buttered cracker crumbs. Bake in hot oven until crumbs are brown. Cold boiled rice may be used in place of macaroni.

Blanquette of Lamb

Cut remnants of cooked lamb in cubes or strips. Reheat two cups meat in two cups sauce,—sauce made of one-fourth cup each of butter and flour, one cup White Stock, and one cup of milk which has been scalded with two blades of mace. Season with salt and pepper, and add one tablespoon Mushroom Catsup, or any other suitable table sauce. Garnish with large croûtons, serve around green peas, or in a potato border, sprinkle with finely chopped parsley.

Barbecued Lamb

Cut cold roast lamb in thin slices and reheat in sauce made by melting two tablespoons butter, adding three-fourths tablespoon vinegar, one-fourth cup currant jelly, one-fourth teaspoon French mustard, and salt and cayenne to taste.

Rechauffé of Lamb

Brown two tablespoons butter, add two and one-half tablespoons flour, and stir until well browned; then add one-fourth teaspoon, each, curry powder, mustard, and salt, and one-eighth teaspoon paprika. Add, gradually, one cup brown stock and two tablespoons sherry wine. Reheat cold roast lamb cut in thin slices in sauce.

Salmi of Lamb

Cut cold roast lamb in thin slices. Cook five minutes two tablespoons butter with one-half tablespoon finely chopped onion. Add lamb, sprinkle with salt and pepper, and cover with one cup Brown Sauce, or one cup cold lamb gravy seasoned with Worcestershire, Harvey, or Elizabeth Sauce. Cook until thoroughly heated. Arrange slices overlapping one another lengthwise of platter, pour around sauce, and garnish with toast points. A few sliced mushrooms or stoned olives improve this sauce.

Casserole of Rice and Meat

Line a mould, slightly greased, with steamed rice. Fill the centre with two cups cold, finely chopped, cooked mutton, highly seasoned with salt, pepper, cayenne, celery salt, onion juice and lemon juice; then add one-fourth cup cracker crumbs, one egg slightly beaten, and enough hot stock or water to moisten. Cover meat with rice, cover rice with buttered paper to keep out moisture while steaming, and steam forty-five minutes. Serve on a platter surrounded with Tomato Sauce. Veal may be used in place of mutton.

Breast of Lamb

Wipe a breast of lamb, put in kettle with bouquet of sweet herbs, a small onion stuck with six cloves, one-half tablespoon salt, one-half teaspoon peppercorns, and one-fourth cup each carrot and turnip cut in dice. Cover with boiling water, and simmer until bones will slip out easily. Take meat from water, remove bones, and press under weight. When cool, trim in shape, dip in crumbs, egg, and crumbs, fry in deep fat, and drain. Serve with Spanish Sauce. Small pieces of cold lamb may be sprinkled with salt and pepper, dipped in crumbs, egg, and crumbs, and fried in deep fat.

Veal

Veal is the meat obtained from a young calf killed when six to eight weeks old. Veal from a younger animal is very unwholesome, and is liable to provoke serious gastric disturbances. Veal contains a much smaller percentage of fat than beef or mutton, is less nutritious, and (though from a young creature) more difficult of digestion. Like lamb, it is not improved by long hanging, but should be eaten soon after killing and dressing. It should always be remembered that the flesh of young animals does not keep fresh as long as that of older ones. Veal is divided in same manner as lamb, into fore and hind quarters. The fore-quarter is subdivided into breast, shoulder, and neck; the hind-quarter into loin, leg, and knuckle. Cutlets, fillets (cushion), and fricandeau are cut from the thick part of leg.

Good veal may be known by its pinkish-colored flesh and white fat; when the flesh lacks color, it has been taken from a creature which was too young to kill for food, or, if of the right age, was bled before killing. Veal may be obtained throughout the year, but is in season during the spring. Veal should be thoroughly cooked; being deficient in fat and having but little flavor, pork or butter should be added while cooking, and more seasoning is required than for other meats.

Veal Cutlets

Use slices of veal from leg cut one-half inch thick. Wipe, remove bone and skin, then cut in pieces for serving. The long, irregular-shaped pieces may be rolled, and fastened with small wooden skewers. Sprinkle with salt and pepper; dip in flour, egg, and crumbs; fry slowly, until well browned, in salt pork fat or butter; then remove cutlets to stewpan and pour over one and one-half cups Brown Sauce. Place on back of range and cook slowly forty minutes, or until cutlets are tender.

Veal may be cooked first in boiling water until tender, then crumbed and fried. The water in which veal was cooked may be used for sauce. Arrange on hot platter, strain sauce and pour around cutlets, and garnish with parsley.

Brown Sauce. Brown three tablespoons butter, add three tablespoons flour, and stir until well browned. Add gradually one and one-half cups stock or water, or half stock and half stewed and strained tomatoes. Season with salt, pepper, lemon juice, and Worcestershire Sauce. The trimmings from veal (including skin and bones) may be covered with one and one-half cups cold water, allowed to heat slowly to boiling-point, then cooked, strained, and used for sauce.

Veal Chops Bavarian

Wipe six loin chops and put in a stewpan with one-half onion, eight slices carrot, two stalks celery, one-half teaspoon peppercorns, four cloves, and two tablespoons butter. Cover with boiling water and cook until tender. Drain, season with salt and pepper, dip in flour, egg, and crumbs, fry in deep fat, and drain on brown paper. Arrange chops on hot serving dish and surround with boiled flat macaroni to which Soubise Sauce (see p. 267) is added.

Fricassee Of Veal

Wipe two pounds sliced veal, cut from loin, and cover with boiling water; add one small onion, two stalks celery, and six slices carrot. Cook slowly until meat is tender. Remove meat, sprinkle with salt and pepper, dredge with flour, and sauté in pork fat. Strain liquor (there should be two cups). Melt four tablespoons butter, add four tablespoons flour and strained liquor. Bring to boiling-point, season with salt and pepper, and pour around meat. Garnish with parsley.

Minuten Fleisch

- 1 1/2 lbs. veal cut in thin slices
- Salt and pepper
- 2/3 cup claret wine
- Flour
- 1 1/3 cups Brown Stock
- Juice 1 lemon
- 2 sprigs parsley

Pound veal until one-fourth inch thick and cut in pieces for serving. Sprinkle with salt and pepper, put in baking-pan, pour over wine, and let stand thirty minutes. Drain, dip in flour, arrange in two buttered pans, and pour over remaining ingredients and wine which was drained from meat. Cover, and cook slowly until meat is tender. Remove to serving dish and pour over sauce remaining in pan.

Loin Of Veal À La Jardinière

Wipe four pounds loin of veal, sprinkle with salt and pepper, and dredge with flour. Put one-fourth cup butter in deep stewpan; when melted, add veal and brown entire surface of meat, watching carefully and turning often, that it may not burn. Add one cup hot water, cover closely, and cook slowly two hours, or until meat is tender, adding more water as needed, using in all about three cups. Remove meat, thicken stock remaining in pan with flour diluted with enough cold water to pour easily. Surround the meat with two cups each boiled turnips and carrots, cut in half-inch cubes, and potatoes cut in balls. Serve gravy in a tureen.

Braised Shoulder Of Veal

Bone, stuff, and sew in shape five pounds shoulder of veal; then cook same as Braised Beef, adding with vegetables two sprigs thyme and one of marjoram.

English Meat Pie

- 1 knuckle of veal
- 1 slice onion

- 1 slice carrot
- Bit of bay leaf
- Sprig of parsley
- 12 peppercorns
- Blade of mace
- 2 teaspoons salt
- 1/2 lb. lean raw ham
- 4 tablespoons flour
- 4 tablespoons butter
- 2 doz. bearded oysters

Remove meat from bones. Cover bones with cold water, add vegetables and seasonings, and heat slowly to boiling-point. Add meat, boil five minutes, and let simmer until meat is tender; remove meat and reduce stock to two cups. Put ham in frying-pan, cover with lukewarm water, and let stand on back of range one hour. Brown butter, add flour, and when well browned add stock; then add veal and ham each cut into cubes. Let simmer twenty minutes and add oysters. Put in serving dish and cover with top made of puff paste. It is much better to bake the paste separately and cover pie just before sending to table.

Roast Veal

The leg, cushion (thickest part of leg), and loin, are suitable pieces for roasting. When leg is to be used, it should be boned at market. Wipe meat, sprinkle with salt and pepper, stuff, and sew in shape. Place on rack in dripping-pan, dredge meat and bottom of pan with flour, and place around meat strips of fat salt pork. Bake three or four hours in moderate oven, basting every fifteen minutes with one-third cup butter melted in one-half cup boiling water, until used, then baste with fat in pan. Serve with brown gravy.

Fricandeau Of Veal

Lard a cushion of veal and roast or braise.

India Curry

Wipe a slice of veal one-half inch thick, weighing one and one-half pounds, and cook in frying-pan without butter, quickly searing one side, then the other. Place on a board and cut in one and one-half inch pieces. Fry two sliced onions in one-half cup butter until brown, remove onions, and add to the butter, meat, and one-half tablespoon curry powder, then cover with boiling water. Cook slowly until meat is tender. Thicken with flour diluted with enough cold water to pour easily; then add one teaspoon vinegar. Serve with a border of steamed rice.

Veal Birds

Wipe slices of veal from leg, cut as thinly as possible, then remove bone, skin, and fat. Pound until one-fourth inch thick and cut in pieces two and one-half inches long by one and one-half inches wide, each piece making a bird. Chop trimmings of meat, adding for every three birds a piece of fat salt pork cut one inch square and one-fourth inch thick; pork also to be chopped. Add to trimmings and pork one-half their measure of fine cracker crumbs, and season highly with salt, pepper, cayenne, poultry seasoning, lemon juice, and onion juice. Moisten with beaten egg and hot water or stock. Spread each piece with thin layer of mixture and avoid having mixture come close to edge. Roll, and fasten with skewers. Sprinkle with salt and pepper, dredge with flour, and fry in hot butter until a golden brown. Put in stewpan, add cream to half cover meat, cook slowly twenty minutes or until tender. Serve on small pieces of toast, straining cream remaining in pan over birds and toast, and garnish with parsley. A Thin White Sauce in place of cream may be served around birds.

Veal Loaf I

Separate a knuckle of veal in pieces by sawing through bone. Wipe, put in kettle with one pound lean veal and one onion; cover with boiling water, and cook slowly until veal is tender. Drain, chop meat finely, and season highly with salt and pepper. Garnish bottom of a mould with slices of “hard-boiled” eggs and parsley. Put in layer of meat, layer of thinly sliced “hard-boiled” eggs, sprinkle with finely chopped parsley, and cover with remaining meat. Pour over liquor, which should be reduced to one cupful. Press and chill, turn on a dish, and garnish with parsley.

Veal Loaf II

Wipe three pounds lean veal, and remove skin and membrane. Chop finely or force through meat chopper, then add one-half pound fat salt pork (also finely chopped), six common crackers (rolled), four tablespoons cream, two tablespoons lemon juice, one tablespoon salt, one-half tablespoon pepper, and a few drops onion juice. Pack in a small bread pan, smooth evenly on top, brush with white of egg, and bake slowly three hours, basting with one-fourth cup pork fat. Prick frequently while baking, that pork fat may be absorbed by meat. Cool, remove from pan, and cut in thin slices for serving.

Broiled Veal Kidneys

Order veal kidneys with the suet left on. Trim, split, and broil ten minutes. Arrange on pieces of toast and pour over melted butter seasoned with salt, cayenne, and lemon juice.

Veal Kidneys À La Canfield

Trim kidneys, cook in Brown Stock ten minutes, drain, and cut in slices. Arrange alternate slices of kidney and thinly sliced bacon on skewers with a fresh mushroom cap at either end of each skewer. Broil until bacon is crisp and arrange on pieces of toast. Pour over sauce made from stock in which kidneys were cooked, seasoned with salt, cayenne, and Madeira wine.

Ways Of Warming Over Veal

Minced Veal on Toast

Prepare as Minced Lamb on Toast, using veal in place of lamb.

Blanquette of Veal

Reheat two cups cold roast veal, cut in small strips, in one and one-half cups White Sauce I. Serve in a potato border and sprinkle over all finely chopped parsley.

Ragoût of Veal

Reheat two cups cold roast veal, cut in cubes, in one and one-half cups Brown Sauce seasoned with one teaspoon Worcestershire Sauce, few drops of onion juice, and a few grains of cayenne.

Sweetbreads

A sweetbread is the thymus gland of lamb or calf, but in cookery, veal sweetbreads only are considered. It is prenatally developed, of unknown function, and as soon as calf is taken from liquid food it gradually disappears. Pancreas, stomach sweetbread, is sold in some sections of the country, but in our markets this custom is not practised. Sweetbreads are a reputed table delicacy, and a valuable addition to the menu of the convalescent.

A sweetbread consists of two parts, connected by tubing and membranes. The round, compact part is called the heart sweetbread, as its position is nearer the heart; the other part is called the throat sweetbread. When sweetbread is found in market separated, avoid buying two of the throat sweetbreads, as the heart sweetbread is more desirable.

Sweetbreads spoil very quickly. They should be removed from paper as soon as received from market, plunged into cold water and allowed to stand one hour, drained, and put into acidulated salted boiling water then allowed to cook slowly twenty minutes; again drained, and plunged into cold water, that they may be kept white and firm. Sweetbreads are always parboiled in this manner for subsequent cooking.

Broiled Sweetbread

Parboil a sweetbread, split crosswise, sprinkle with salt and pepper, and broil five minutes. Serve with Lemon Butter.

Creamed Sweetbread

Parboil a sweetbread, and cut in one-half inch cubes, or separate in small pieces. Reheat in one cup White Sauce II. Creamed Sweetbread may be served on toast, or used as filling for patty cases or Swedish Timbales.

Creamed Sweetbread And Chicken

Reheat equal parts of cold cooked chicken, and sweetbread cut in dice, in White Sauce II.

Sweetbread À La Poulette

Reheat sweetbread, cut in cubes, in one cup Béchamel Sauce.

Sweetbreads, Country Style

Parboil sweetbreads, sprinkle with salt and pepper, and dredge with flour. Arrange in baking-dish, brush over with melted butter, allowing two tablespoons to each pair of sweetbreads, and cover

Larded Sweetbread

Parboil a sweetbread, lard the upper side, and bake until well browned, basting with Meat Glaze.

Sweetbreads À La Napoli

Parboil a large sweetbread and cut in eight pieces. Cook in hot frying-pan with a small quantity of butter, adding enough beef extract to give sweetbread a glazed appearance. Cut bread in slices, shape with a circular cutter three and one-half inches in diameter, and toast. Spread each piece with two tablespoons grated Parmesan cheese seasoned with salt and paprika and moistened with two tablespoons heavy cream. Arrange one piece of sweetbread on each piece of toast. Put in individual glass-covered dishes, having two tablespoons cream in each dish. Cover each piece of sweetbread with sautéed mushroom cap, put on glass covers, and bake in a moderate oven eight minutes.

Braised Sweetbreads Eugénie

Parboil a sweetbread in Sherry wine twelve minutes. Drain, cool, cut in four pieces, and lard. Cook in frying-pan same as Sweetbreads à la Napoli. Peel mushroom caps, cover with Sherry wine, let stand one hour, drain, and sauté in butter. Arrange on circular pieces of toast, over each of which has been poured one teaspoon wine drained from mushroom caps. Pile five or six mushroom caps on each piece of sweetbread, add two tablespoons heavy cream, and bake in a moderate oven, eight minutes. Cook in individual glass-covered dishes.

Sweetbread Cutlets With Asparagus Tips

Parboil a sweetbread, split, and cut in pieces shaped like a small cutlet, or cut in circular pieces. Sprinkle with salt and pepper, dip in crumbs, egg, and crumbs, and sauté in butter. Arrange in a circle around Creamed Asparagus Tips.

Sweetbread With Tomato Sauce

Prepare as Sweetbread Cutlets with Asparagus Tips, sauté in butter or fry in deep fat, and serve with Tomato Sauce.

Sweetbread And Bacon

Parboil a sweetbread, cut in small pieces, dip in flour, egg, and crumbs, and arrange alternately with pieces of bacon on small skewers, having four pieces sweetbread and three of bacon on each skewer. Fry in deep fat, and drain. Arrange in a circle around mound of green peas.

Pork

Pork is the flesh and fat of pig or hog. Different parts of the creature, when dressed, take different names.

The chine and spareribs, which correspond to the loin in lamb and veal, are used for roasts or steaks. Two ribs are left on the chine. The hind legs furnish *hams*. These are cured, salted, and smoked. Sugar-cured hams are considered the best. Pickle, to which is added light brown sugar, molasses, and saltpetre, is introduced close to bone; hams are allowed to hang one week, then smoked with hickory wood. *Shoulders* are usually corned, or salted and smoked, though sometimes cooked fresh. *Pigs' feet* are boiled until tender, split, and covered with vinegar made from white wine. *Hocks*, the part just above the feet, are corned, and much used by Germans. *Heads* are soured, and cooked by boiling. The flank, which lies just below the ribs, is salted and smoked, and furnishes *bacon*. The best pieces of fat salt pork come from the back, on either side of backbone.

Fat, when separated from flesh and membrane, is tried out and called lard. *Leaf lard* is the best, and is tried out from the leaf shaped pieces of solid fat which lie inside the flank. *Sausages* are trimmings of lean and fat meat, minced, highly seasoned, and forced into thin casings made of the prepared entrails. *Little pigs* (four weeks old) are sometimes killed; dressed, and roasted whole.

Pork contains the largest percentage of fat of any meat. When eaten fresh it is the most difficult of digestion, and although found in market through the entire year, it should be but seldom served, and then only during the winter months. By curing, salting, and smoking, pork is rendered more wholesome. *Bacon*, next to butter and cream, is the most easily assimilated of all fatty foods.

Pork Chops

Wipe chops, sprinkle with salt and pepper, place in a hot frying-pan, and cook slowly until tender, and well browned on each side.

Pork Chops With Fried Apples

Arrange Pork Chops on a platter, and surround with slices of apples, cut one-half inch thick, fried in the fat remaining in pan.

Roast Pork

Wipe pork, sprinkle with salt and pepper, place on a rack in a dripping-pan, and dredge meat and bottom of pan with flour. Bake in a moderate oven three or four hours, basting every fifteen minutes with fat in pan. Make a gravy as for other roasts.

Pork Tenderloins With Sweet Potatoes

Wipe tenderloins, put in a dripping-pan, and brown quickly in a hot oven; then sprinkle with salt and pepper, and bake forty-five minutes, basting every fifteen minutes.

Sweet Potatoes. Pare six potatoes and parboil ten minutes, drain, put in pan with meat, and cook until soft, basting when basting meat.

Breakfast Bacon

See Liver and Bacon, page 207.

Fried Salt Pork With Codfish

Cut fat salt pork in one-fourth inch slices, cut gashes one-third inch apart in slices, nearly to rind. Try out in a hot frying-pan until brown and crisp, occasionally turning off fat from pan. Serve around strips of codfish which have been soaked in pan of lukewarm water and allowed to stand on back of range until soft. Serve with Drawn Butter Sauce, boiled potatoes, and beets.

Broiled Ham

Soak thin slices of ham one hour in lukewarm water. Drain, wipe, and broil three minutes.

Fried Ham And Eggs

Wipe ham, remove one-half outside layer of fat, and place in frying-pan. Cover with tepid water and let stand on back of range thirty minutes; drain, and dry on a towel. Heat pan, put in ham, brown quickly on one side, turn and brown other side; or soak ham over night, dry, and cook in hot frying-pan. If cooked too long, ham will become hard and dry. Serve with fried eggs cooked in the dried-out ham fat.

Barbecued Ham

Soak thin slices of ham one hour in lukewarm water; drain, wipe, and cook in a hot frying-pan until slightly browned. Remove to serving dish and add to fat in pan three tablespoons vinegar mixed with one and one-half teaspoons mustard, one-half teaspoon sugar, and one-eighth teaspoon paprika. When thoroughly heated pour over ham and serve at once.

Boiled Ham

Soak several hours or over night in cold water to cover. Wash thoroughly, trim off hard skin near end of bone, put in a kettle, cover with cold water, heat to boiling-point, and cook slowly until tender. See Time Table for Cooking, page 28. Remove kettle from range and set aside, that ham may partially cool; then take from water, remove outside skin, sprinkle with sugar and fine cracker crumbs, and stick with cloves one-half inch apart. Bake one hour in a slow oven. Serve cold, thinly sliced.

Roast Ham With Champagne Sauce

Place a whole baked ham in the oven fifteen minutes before serving time, that outside fat may be heated. Remove to a hot platter, garnish bone end with a paper ruffle, and serve with Champagne Sauce.

Westphalian Ham

These hams are imported from Germany, and need no additional cooking. Cut in very thin slices for serving.

Broiled Pigs' Feet

Wipe, sprinkle with salt and pepper, and broil six to eight minutes. Serve with Maître d'Hôtel Butter or Sauce Piquante.

Fried Pigs' Feet

Wipe, sprinkle with salt and pepper, dip in crumbs, egg, and crumbs, fry in deep fat, and drain.

Sausages

Cut apart a string of sausages. Pierce each sausage several times with a carving fork. Put in frying-pan, cover with boiling water, and cook fifteen minutes; drain, return to frying-pan, and fry until well browned. Serve with fried apples. Sausages are often broiled same as bacon and apples baked in pan under them.

Boston Baked Beans

Pick over one quart pea beans, cover with cold water, and soak over night. In morning, drain, cover with fresh water, heat slowly (keeping water below boiling-point), and cook until skins will burst,—which is best determined by taking a few beans on the tip of a spoon and blowing on them, when skins will burst if sufficiently cooked. Beans thus tested must, of course, be thrown away. Drain beans, throwing bean-water out of doors, not in sink. Scald rind of three-fourths pound fat salt pork, scrape, remove one-fourth inch slice and put in bottom of bean-pot. Cut through rind of remaining pork every one-half inch, making cuts one inch deep. Put beans in pot and bury pork in beans, leaving rind exposed. Mix one tablespoon salt, one tablespoon molasses, and three tablespoons sugar; add one cup boiling water, and pour over beans; then add enough more boiling water to cover beans. Cover bean-pot, put in oven, and bake slowly six or eight hours, uncovering the last hour of cooking, that rind may become brown and crisp. Add water as needed. Many feel sure that by adding with seasonings one-half tablespoon mustard, the beans are more easily digested. If pork mixed with lean is preferred, use less salt.

The fine reputation which Boston Baked Beans have gained has been attributed to the earthen bean-pot with small top and bulging sides in which they are supposed to be cooked. Equally good beans have often been eaten where a five-pound lard pail was substituted for the broken bean-pot.

Yellow-eyed beans are very good when baked.

Poultry And Game

Poultry includes all domestic birds suitable for food except pigeon and squab. Examples: chicken, fowl, turkey, duck, goose, etc. Game includes such birds and animals suitable for food as are pursued and taken in field and forest. Examples: quail, partridge, wild duck, plover, deer, etc.

The flesh of chicken, fowl, and turkey has much shorter fibre than that of ruminating animals, and is not intermingled with fat,—the fat always being found in layers directly under the skin, and surrounding the intestines. Chicken, fowl, and turkey are nutritious, and chicken is specially easy of digestion. The white meat found on breast and wing is more readily digested than the dark meat. The legs, on account of constant motion, are of a coarser fibre and darker color.

Since incubators have been so much used for hatching chickens, small birds suitable for broiling may be always found in market. Chickens which appear in market during January weighing about one and one-half pounds are called *spring chickens*.

Fowl is found in market throughout the year, but is at its best from March until June.

Philadelphia, until recently, furnished our market with Philadelphia chickens and *capons*, but now Massachusetts furnishes equally good ones, which are found in market from December to June. They are very large, plump, and superior eating. At an early age they are deprived of the organs of reproduction, penned, and specially fattened for killing. They are recognized by the presence of head, tail, and wing feathers.

Turkeys are found in market throughout the year, but are best during the winter months. Tame ducks and geese are very indigestible on account of the large quantity of fat they contain. Goose meat is thoroughly infiltrated with fat, containing sometimes forty to forty-five per cent. Pigeons, being old birds, need long, slow cooking to make them tender. Squabs (young pigeons) make a delicious tidbit for the convalescent, and are often the first meat allowed a patient by the physician.

The flesh of game, with the exception of wild duck and wild geese, is tender, contains less fat than poultry, is of fine though strong flavor, and easy of digestion. Game meat is usually of dark color, partridge and quail being exceptions, and is usually cooked rare. Venison, the flesh of deer, is short-fibred, dark-colored, highly savored, tender, and easy of digestion; being highly savored, it often disagrees with those of weak digestion.

Geese are in market throughout the year; Massachusetts and Rhode Island furnishing specially good ones. A goose twelve weeks old is known as a *green goose*. They may be found in market from May to September. Young geese which appear in market September first and continue through December are called *goslings*. They have been hatched during May and June, and then fattened for market.

Young ducks, found in market about March first, are called *ducklings*. Canvasback Ducks have gained a fine reputation throughout the country, and are found in market from the last of November until March. Redhead Ducks are in season two weeks earlier, and are about as good eating as Canvasback Ducks, and much less in price. The distinctive flavor of both is due to the wild celery on which they feed. Many other kinds of ducks are found in market during the fall and winter. Examples: Widgeon, Mallard, Lake Erie Teal, Black Ducks, and Butterballs.

Fresh quail are in market from October fifteenth to January first, the law forbidding their being killed at any other time in the year. The same is true of partridge, but both are frozen and kept

in cold storage several months. California sends frozen quail in large numbers to Eastern markets. Grouse (*prairie chicken*) are always obtainable,—fresh ones in the fall; later, those kept in cold storage. Plover may be bought from April until December.

To Select Poultry and Game. A *chicken* is known by soft feet, smooth skin, and soft cartilage at end of breastbone. An abundance of pinfeathers always indicates a young bird, while the presence of long hairs denotes age. In a *fowl* the feet have become hard and dry with coarse scales, and cartilage at end of breastbone has ossified. _Cock turkeys_ are usually better eating than hen turkeys, unless hen turkey is young, small, and plump. A good turkey should be plump, have smooth dark legs, and cartilage at end of breastbone soft and pliable. Good geese abound in pinfeathers. Small birds should be plump, have soft feet and pliable bills.

To Dress and Clean Poultry. Remove hairs and down by holding the bird over a flame (from gas, alcohol, or burning paper) and constantly changing position until all parts of surface have been exposed to flame; this is known as *singeing*. Cut off the head and draw out pinfeathers, using a small pointed knife. Cut through the skin around the leg one and one-half inches below the leg joint, care being taken not to cut tendons; place leg at this cut over edge of board, press downward to snap the bone, then take foot in right hand, holding bird firmly in left hand, and pull off foot, and with it the tendons. In old birds the tendons must be drawn separately, which is best accomplished by using a steel skewer. Make an incision through skin below breastbone, just large enough to admit the hand. With the hand remove entrails, gizzard, heart, and liver; the last three named constitute what is known as *giblets*. The gall-bladder, lying on the under surface of the right lobe of the liver, is removed with liver, and great care must be taken that it is not broken, as a small quantity of the bile which it contains would impart a bitter flavor to the parts with which it came in contact. Enclosed by the ribs, on either side of backbone, may be found the lungs, of spongy consistency and red color. Care must be taken that every part of them is removed. Kidneys, lying in the hollow near end of backbone, must also be removed. By introducing first two fingers under skin close to neck, the windpipe may be easily found and withdrawn; also the crop, which will be found adhering to skin close to breast. Draw down neck skin, and cut off neck close to body, leaving skin long enough to fasten under the back. Remove oil bag, and wash bird by allowing cold water to run through it, not allowing bird to soak in cold water. Wipe inside and outside, looking carefully to see that everything has been withdrawn. If there is disagreeable odor, suggesting that fowl may have been kept too long, clean at once, wash inside and out with soda water, and sprinkle inside with charcoal and place some under wings.

Poultry dressed at market seldom have tendons removed unless so ordered. It is always desirable to have them withdrawn, as they become hard and bony during cooking. It is the practice of market-men to cut a gash through the skin, to easier reach crop and windpipe. This gash must be sewed before stuffing, and causes the bird to look less attractive when cooked.

To Cut up a Fowl. Singe, draw out pinfeathers, cut off head, remove tendons and oil bag. Cut through skin between leg and body close to body, bend back leg (thus breaking ligaments), cut through flesh, and separate at joint. Separate the upper part of leg, *second joint*, from lower part of leg, *drumstick*, as leg is separated from body. Remove wing by cutting through skin and flesh around upper wing joint which lies next to body, then disjoint from body. Cut off tip of wing and separate wing at middle joint. Remove leg and wing from other side. Separate breast from back by cutting through skin, beginning two inches below breastbone and passing knife between terminus of small ribs on either side and extending cut to collar-bone. Before removing entrails, gizzard, heart, liver, lungs, kidneys, crop, and windpipe, observe their position, that the anatomy of the bird may be understood. The back is sometimes divided by cutting through the middle crosswise. The wishbone, with adjoining meat, is frequently removed, and the breast meat may be separated in two parts by cutting through flesh close to breastbone with cleaver. Wipe pieces, excepting back, with

cheese-cloth wrung out of cold water. Back piece needs thorough washing.

To Clean Giblets. Remove thin membrane, arteries, veins, and clotted blood around heart. Separate gall-bladder from liver, cutting off any of liver that may have a greenish tinge. Cut fat and membranes from gizzard. Make a gash through thickest part of gizzard, and cut as far as inner lining, being careful not to pierce it. Remove the inner sack and discard. Wash giblets and cook until tender, with neck and tips of wings, putting them in cold water and heating water quickly that some of the flavor may be drawn out into stock, which is to be used for making gravy.

To Stuff Poultry. Put stuffing by spoonfuls in neck end, using enough to sufficiently fill the skin, that bird may look plump when served. Where cracker stuffing is used, allowance must be made for the swelling of crackers, otherwise skin may burst during cooking. Put remaining stuffing in body; if the body is full, sew skin; if not full, bring skin together with a skewer.

To Truss Fowl. Draw thighs close to body and hold by inserting a steel skewer under middle joint running it through body, coming out under middle joint on other side. Cut piece three-fourths inch wide from neck skin, and with it fasten legs together at ends; or cross drumsticks, tie securely with a long string, and fasten to tail. Place wings close to body and hold them by inserting a second skewer through wing, body, and wing on opposite side. Draw neck skin under back and fasten with a small wooden skewer. Turn bird on its breast. Cross string attached to tail piece and draw it around each end of lower skewer; again cross string and draw around each end of upper skewer; fasten string in a knot and cut off ends. In birds that are not stuffed legs are often passed through incisions cut in body under bones near tail.

To Dress Birds for Broiling. Singe, wipe, and with a sharp-pointed knife, beginning at back of neck, make a cut through backbone the entire length of bird. Lay open the bird and remove contents from inside. Cut out rib bones on either side of backbone, remove from breastbone, then cut through tendons at joints.

To Fillet a Chicken. Remove skin from breast, and with a small sharp knife begin at end of collar-bone and cut through flesh, following close to wish and breast bones the entire length of meat. Raise flesh with fingers, and with knife free the piece of meat from bones which lie under it. Cut meat away from wing joint; this solid piece of breast is meat known as a *fillet*. This meat is easily separated in two parts. The upper, larger part is called the *large fillet*; the lower part the *mignon fillet*. The tough skin on the outside of large fillet should be removed, also the sinew from mignon fillet. To remove tough skin, place large fillet on a board, upper side down, make an incision through flesh at top of fillet, and cut entire length of fillet, holding knife as close to skin as possible. Trim edges, that fillet may look shapely.

Broiled Chicken

Dress for broiling, following directions on page 244. Sprinkle with salt and pepper, and place in a well-greased broiler. Broil twenty minutes over a clear fire, watching carefully and turning broiler so that all parts may be equally browned. The flesh side must be exposed to the fire the greater part of time, as the skin side will brown quickly. Remove to a hot platter, spread with soft butter, and sprinkle with salt and pepper. Chickens are so apt to burn while broiling that many prefer to partially cook in oven. Place chicken in dripping-pan, skin side down, sprinkle with salt and pepper, dot over with butter, and bake fifteen minutes in hot oven; then broil to finish cooking. *Guinea chickens* are becoming popular cooked in this way.

Boiled Fowl

Place chicken on hot platter, surround with sauce, and sprinkle chicken and sauce with one-half tablespoon finely chopped parsley.

Dredge bottom of pan with flour. Place in a hot oven, and when flour is well browned, reduce the heat, then baste. Continue basting every ten minutes until chicken is cooked. For basting, use one-fourth cup butter, melted in two-thirds cup boiling water, and after this is gone, use fat in pan, and when necessary to prevent flour burning, add one cup boiling water. During cooking, turn chicken frequently, that it may brown evenly. If a thick crust is desired, dredge bird with flour two or three times during cooking. If a glazed surface is preferred, spread bird with butter, omitting flour, and do not dredge during baking. When breast meat is tender, bird is sufficiently cooked. A four-pound chicken requires about one and one-half hours.

Fish And Meat Sauces

The French chef keeps always on hand four sauces,—White, Brown, Béchamel, and Tomato,—and with these as a basis is able to make kinds innumerable. Butter and flour are usually cooked together for thickening sauces. When not browned, it is called *roux*; when browned, *_brown roux_*. The French mix butter and flour together, put in saucepan, place over fire, stir for five minutes; set aside to cool, again place over fire, and add liquid, stirring constantly until thick and smooth. Butter and flour for brown sauces are cooked together much longer, and watched carefully lest butter should burn. The American cook makes sauce by stirring butter in saucepan until melted and bubbling, adds flour and continues stirring, then adds liquid, gradually stirring or beating until the boiling-point is reached. For Brown Sauce, butter should be stirred until well browned; flour should be added and stirred with butter until both are browned before the addition of liquid. The secret in making a Brown Sauce is to have butter and flour well browned before adding liquid.

It is well worth remembering that a sauce of average thickness is made by allowing two tablespoons each of butter and flour to one cup liquid, whether it be milk, stock, or tomato. For Brown Sauce a slightly larger quantity of flour is necessary, as by browning flour its thickening property is lessened, its starch being changed to dextrine. When sauces are set away, put a few bits of butter on top to prevent crust from forming.

W. O. Atwater, Ph.D.

Vegetables include, commonly though not botanically speaking, all plants used for food except grains and fruits. With exception of beans, peas, and lentils, which contain a large amount of protein, they are chiefly valuable for their potash salts, and should form a part of each day's dietary. Many contain much cellulose, which gives needed bulk to the food. The legumes, peas, beans, and lentils

may be used in place of flesh food.

For the various vegetables different parts of the plant are used. Some are eaten in the natural state, others are cooked.

Tubers	White potatoes and Jerusalem artichokes
Roots	Beets, carrots, parsnips, radishes, sweet potatoes, salsify or oyster plant, and turnips
Bulbs	Garlic, onions, and shallots
Stems	Asparagus, celery, and chives
Leaves	Brussels sprouts, beet greens, cabbages, dandelions, lettuce, sorrel, spinach, and watercress
Flowers	Cauliflower
Fruit	Beans, corn, cucumbers, okra, eggplant, peas, lentils, squash, and tomatoes.

Young, tender vegetables,—as lettuce, radishes, cucumbers, watercress, and tomatoes,—eaten uncooked, served separately or combined in salads, help to stimulate a flagging appetite, and when dressed with oil furnish considerable nutriment.

Beans, and peas when old, should be employed in making purées and soups; by so doing, the outer covering of cellulose, so irritating to the stomach, is removed.

Care Of Vegetables

Summer vegetables should be cooked as soon after gathering as possible; in case they must be kept, spread on bottom of cool, dry, well-ventilated cellar, or place in ice-box. Lettuce may be best kept by sprinkling with cold water and placing in a tin pail closely covered. Wilted vegetables may be freshened by allowing to stand in cold water. Vegetables which contain sugar lose some of their sweetness by standing; corn and peas are more quickly affected than others. Winter vegetables should be kept in a cold, dry place. Beets, carrots, turnips, potatoes, etc., should be put in barrels or piled in bins, to exclude as much air as possible. Squash should be spread, and needs careful watching; when dark spots appear, cook at once.

In using canned goods, empty contents from can as soon as opened, lest the acid therein act on the tin to produce poisonous compounds, and let stand one hour, that it may become reoxygenated. Beans, peas, asparagus, etc., should be emptied into a strainer, drained, and cold water poured over them and allowed to run through. In using dried vegetables, soak in cold water several hours before cooking. A few years ago native vegetables were alone sold; but now our markets are largely supplied from the Southern States and California, thus allowing us fresh vegetables throughout the year.

Cooking Of Vegetables

A small scrubbing-brush, which may be bought for five cents, and two small pointed knives for preparing vegetables should be found in every kitchen.

Vegetables should be washed in cold water, and cooked until soft in boiling salted water; if cooked in an uncovered vessel, their color is better kept. For peas and beans add salt to water last half hour of cooking. Time for cooking the same vegetable varies according to freshness and age, therefore time tables for cooking serve only as guides.

Mushrooms And Truffles

These are classed among vegetables. Mushrooms, which grow about us abundantly, may be easily gathered, and as they contain considerable nutriment, should often be found on the table. While there are hundreds of varieties, one by a little study may acquaint herself with a dozen or more of the most common ones which are valuable as food. Consult W. Hamilton Gibson, "Our Edible Toadstools and Mushrooms." Many might cause illness, but only a few varieties of the *Amanita* family are deadly poison. Mushrooms require heat and moisture,—a severe drought or very wet soil being unfavorable for their growth. Never gather mushrooms in the vicinity of decaying matter. They appear the middle of May, and last until frost comes. *Campestris* is the variety always found in market; French canned are of this family. *Boleti* are dried, canned, and sold as *cepes*.

Truffles

Truffles belong to the same family as mushrooms, and are grown underground. France is the most famous field for their production, from which country they are exported in tin cans, and are too expensive for ordinary use.

Artichokes

French artichokes, imported throughout the year, are the ones principally used. They retail from thirty to forty cents each, and are cheapest and best in November, December, and January. Artichokes are appearing in market from California and are somewhat cheaper in price than the French Artichoke. Jerusalem artichokes are employed for pickling, and can be bought for fifteen cents per quart.

Boiled Artichokes

Cut off stem close to leaves, remove outside bottom leaves, trim artichoke, cut off one inch from top of leaves, and with a sharp knife remove choke; then tie artichoke with a string to keep its shape. Soak one-half hour in cold water. Drain, and cook thirty to forty-five minutes in boiling, salted, acidulated water. Remove from water, place upside down to drain, then take off string. Serve with Béchamel or Hollandaise Sauce. Boiled Artichokes often constitute a course at dinner. Leaves are drawn out separately with fingers, dipped in sauce, and fleshy ends only eaten, although the bottom is edible. Artichokes may be cut in quarters, cooked, drained, and served with Sauce Bearnaise. When prepared in this way they are served with mutton.

Fried Artichokes

Sprinkle Boiled Artichokes cut in quarters with salt, pepper, and finely chopped parsley. Dip in Batter I, fry in deep fat, and drain. In preparing artichokes, trim off tops of leaves closer than when served as Boiled Artichokes.

Artichoke Bottoms

Remove all leaves and the choke. Trim bottoms in shape, and cook until soft in boiling, salted, acidulated water. Serve with Hollandaise or Béchamel Sauce.

Stuffed Artichokes

Prepare and cook as Boiled Artichokes, having them slightly underdone. Fill with Chicken Force-meat I or II, and bake thirty minutes in a moderate oven, basting twice with Thin White Sauce. Remove to serving dish and pour around Thin White Sauce.

Asparagus

Hothouse asparagus is found in market during winter, but is not very satisfactory, and is sold for about one dollar per bunch. Oyster Bay (white asparagus) appears first of May, and commands a very high price. Large and small green stalk asparagus is in season from first of June to middle of July, and cheapest the middle of June.

Boiled Asparagus

Cut off lower parts of stalks as far down as they will snap, untie bunches, wash, remove scales, and retie. Cook in boiling salted water fifteen minutes or until soft, leaving tips out of water first ten minutes. Drain, remove string, and spread with soft butter, allowing one and one-half tablespoons butter to each bunch asparagus. Asparagus is often broken or cut in inch pieces for boiling, cooking tips a shorter time than stalks.

Asparagus On Toast

Serve Boiled Asparagus on Buttered or Milk Toast.

Asparagus In White Sauce

Boil asparagus cut in one-inch pieces, drain, and add to White Sauce I, allowing one cup sauce to each bunch asparagus. Serve in Croustades of Bread for a vegetable course.

Asparagus À La Hollandaise

Pour Hollandaise Sauce I over Boiled Asparagus.

Asparagus In Crusts

Remove centres from small rolls, fry shells in deep fat, drain, and fill with Asparagus in White Sauce.

Beans

String Beans that are obtainable in winter come from California; natives appear in market the last of June and continue until the last of September. There are two varieties, green (pole cranberry being best flavored) and yellow (butter bean).

Shell Beans, including horticultural and sieva, are sold in the pod or shelled, five quarts in pod making one quart shelled. They are found in market during July and August. Common lima and improved lima shell beans are in season in August and September. Dried lima beans are procurable throughout the year.

String Beans

Remove strings, and snap or cut in one-inch pieces; wash, and cook in boiling water from one to three hours, adding salt last half-hour of cooking. Drain, season with butter and salt.

Shell Beans

Wash, and cook in boiling water from one to one and a half hours, adding salt last half-hour of cooking. Cook in sufficiently small quantity of water, that there may be none left to drain off when beans are cooked. Season with butter and salt.

Cream Of Lima Beans

Soak one cup dried beans over night, drain, and cook in boiling salted water until soft; drain, add three-fourths cup cream, and season with butter and salt. Reheat before serving.

Boiled Beets

Wash, and cook whole in boiling water until soft; time required being from one to four hours. Old beets will never be tender, no matter how long they may be cooked. Drain, and put in cold water that skins may be easily removed. Serve cut in quarters or slices.

Sugared Beets

- 4 hot boiled beets
- 3 tablespoons butter
- 1 1/2 tablespoons sugar
- 1/2 teaspoon salt

Cut beets in one-fourth inch slices, add butter, sugar, and salt; reheat for serving.

Pickled Beets

Slice cold boiled beets and cover with vinegar.

Beets, Sour Sauce

Wash beets, and cook in boiling salted water until soft. Drain, and reserve one-half cup water in which beets were cooked. Plunge into cold water, rub off skins and cut into cubes. Reheat in

Sour Sauce. Melt two tablespoons butter, add two tablespoons flour, and pour on the beet water. Add one-fourth cup, each, vinegar and cream, one teaspoon sugar, one-half teaspoon salt, and a few grains pepper.

Harvard Beets

Wash twelve small beets, cook in boiling water until soft, remove skins, and cut beets in thin slices, small cubes, or fancy shapes, using French vegetable cutter. Mix one-half cup sugar and one-half tablespoon corn-starch. Add one-half cup vinegar and let boil five minutes. Pour over beets, and let stand on back of range one-half hour. Just before serving add two tablespoons butter.

Brussels Sprouts

Brussels sprouts belong to the same family as cabbage, and the small heads grow from one to two inches apart, on the axis of the entire stem, one root yielding about two quarts. They are imported, and also grow in this country, being cheapest and best in December and January.

Brussels Sprouts In White Sauce

Pick over, remove wilted leaves, and soak in cold water fifteen minutes. Cook in boiling salted water twenty minutes, or until easily pierced with a skewer. Drain, and to each pint add one cup White Sauce I.

Scalloped Brussels Sprouts

Pick over, remove wilted leaves, and soak in cold water one quart sprouts. Cook in boiling salted water until soft, then drain. Wash celery and cut in pieces; there should be one and one-half cups. Melt three tablespoons butter, add celery, cook two minutes, add three tablespoons flour, and pour on gradually one and one-half cups scalded milk; add sprouts and turn mixture into a baking-dish. Cover with buttered crumbs and bake in a hot oven until crumbs are brown.

Cabbage

There are four kinds of cabbage in the market,—drum-head, sugar-loaf, Savoy, and purple; and some variety may be found throughout the year. The Savoy is best for boiling; drum-head and purple for Cole-Slaw. In buying, select heavy cabbages.

Boiled Cabbage

Take off outside leaves, cut in quarters, and remove tough stalk. Soak in cold water and cook in an uncovered vessel in boiling salted water, to which is added one-fourth teaspoon soda; this prevents

disagreeable odor during cooking. Cook from thirty minutes to one hour, drain, and serve; or chop, and season with butter, salt, and pepper.

Escalloped Cabbage

Cut one-half boiled cabbage in pieces; put in buttered baking-dish, sprinkle with salt and pepper, and add one cup White Sauce I. Lift cabbage with fork, that it may be well mixed with sauce, cover with buttered crumbs, and bake until crumbs are brown.

German Cabbage

Slice red cabbage and soak in cold water. Put one quart in stewpan with two tablespoons butter, one-half teaspoon salt, one tablespoon finely chopped onion, few gratings of nutmeg, and few grains cayenne; cover, and cook until cabbage is tender. Add two tablespoons vinegar and one-half tablespoon sugar, and cook five minutes.

Cole-Slaw

Select a small, heavy cabbage, take off outside leaves, and cut in quarters; with a sharp knife slice very thinly. Soak in cold water until crisp, drain, dry between towels, and mix with Cream Salad Dressing.

Hot Slaw

Slice cabbage as for Cole-Slaw, using one-half cabbage. Heat in a dressing made of yolks of two eggs slightly beaten, one-fourth cup cold water, one tablespoon butter, one-fourth cup hot vinegar, and one-half teaspoon salt, stirred over hot water until thickened.

Carrots

Carrots may always be found in market. New carrots appear last of April, and are sold in bunches; these may be boiled and served, but carrots are chiefly used for flavoring soups, and for garnishing, on account of their bright color. To prepare carrots for cooking, wash and scrape, as best flavor and brightest color are near the skin.

Carrots And Peas

Wash, scrape, and cut young carrots in small cubes or fancy shapes; cook until soft in boiling salted water or stock. Drain, add an equal quantity of cooked green peas, and season with butter, salt, and pepper.

Carrots, Poulette Sauce

Wash, scrape, and cut carrots in strips, cubes, or fancy shapes, cover with boiling water, let stand five minutes; drain, and cook in boiling salted water, to which is added one-half tablespoon butter, until soft. Add to recipe for sauce given under *Macédoine of Vegetables à la Poulette* (see p. 308).

Cauliflower

Cauliflowers comprise the stalks and flowerets of a plant which belongs to the same family as Brussels sprouts and cabbage; they may be obtained throughout the year, but are cheapest and best in September and October. In selecting cauliflowers, choose those with white heads and fresh green leaves; if dark spots are on the heads, they are not fresh.

Creamed Cauliflower

Remove leaves, cut off stalk, and soak thirty minutes (head down) in cold water to cover. Cook (head up) twenty minutes or until soft in boiling salted water; drain, separate flowerets, and reheat in one and one-half cups White Sauce I.

Cauliflower À La Hollandaise

Prepare as for Creamed Cauliflower, using Hollandaise Sauce I instead of White Sauce.

Cauliflower Au Gratin

Place a whole cooked cauliflower on a dish for serving, cover with buttered crumbs, and place on oven grate to brown crumbs; remove from oven and pour one cup Thin White Sauce around cauliflower.

Cauliflower À La Parmesan

Prepare as Cauliflower au Gratin. Sprinkle with grated cheese before covering with crumbs.

Cauliflower À La Huntington

Prepare cauliflower as for boiled cauliflower, and steam until soft. Separate in pieces and pour over the following sauce:

Mix one and one-half teaspoons mustard, one and one-fourth teaspoons salt, one teaspoon powdered sugar, and one-fourth teaspoon paprika. Add yolks three eggs slightly beaten, one-fourth cup olive oil, and one-half cup vinegar in which one-half teaspoon finely chopped shallot has infused five minutes. Cook over hot water until mixture thickens. Remove from range, and add one-half tablespoon curry powder, two tablespoons melted butter, and one teaspoon finely chopped parsley.

Celery

Celery may be obtained from last of July until April. It is best and cheapest in December. Celery stalks are green while growing; but the white celery seen in market has been bleached, with the exception of Kalamazoo variety, which grows white. To prepare celery for table, cut off roots and leaves, separate stalks, wash, scrape, and chill in ice-water. By adding a slice of lemon to ice-water celery is kept white and made crisp. If tops of stalks are gashed several times before putting in water, they will curl back and make celery look more attractive.

Celery In White Sauce

Wash, scrape, and cut celery stalks in one-inch pieces; cook twenty minutes or until soft in boiling salted water; drain, and to two cups celery add one cup White Sauce I. This is a most satisfactory way of using the outer stalks of celery.

Fried Celery, Tomato Sauce

Wash and scrape celery, cut in three-inch pieces, dip in batter, fry in deep fat, and drain on brown paper. Serve with Tomato Sauce.

Batter. Mix one-half cup bread flour, one-fourth teaspoon salt, a few grains pepper, one-third cup milk, and one egg well beaten.

Chicory Or Endive

Chicory or endive may be obtained throughout the year, but during January, February, March, and April supply is imported. It is used only for salads.

Corn

Corn may be found in market from first of June to first of October. Until native corn appears it is the most unsatisfactory vegetable. Native corn is obtainable the last of July, but is most abundant and cheapest in August. Among the best varieties are Crosby for early corn and Evergreen for late corn.

Boiled Green Corn

Remove husks and silky threads. Cook ten to twenty minutes in boiling water. Place on platter covered with napkin; draw corners of napkin over corn; or cut from cob and season with butter and salt.

Succotash

Cut hot boiled corn from cob, add equal quantity of hot boiled shelled beans; season with butter and salt; reheat before serving.

Corn Oysters

Grate raw corn from cobs. To one cup pulp add one well-beaten egg, one-fourth cup flour, and season highly with salt and pepper. Drop by spoonfuls and fry in deep fat, or cook on a hot, well-greased griddle. They should be made about the size of large oysters.

Corn Fritters

- 1 can corn
- 1 cup flour
- 1 teaspoon baking powder
- 2 teaspoons salt
- 1/4 teaspoon paprika
- 2 eggs

Chop corn, and add dry ingredients mixed and sifted, then add yolks of eggs beaten until thick, and fold in whites of eggs beaten stiff. Cook in a frying-pan in fresh hot lard. Drain on paper.

Corn À La Southern

To one can chopped corn add two eggs slightly beaten, one teaspoon salt, one-eighth teaspoon pepper, one and one-half tablespoons melted butter, and one pint scalded milk; turn into a buttered pudding-dish and bake in slow oven until firm.

Chestnuts

French and Italian chestnuts are served in place of vegetables.

Chestnut Purée

Remove shells from chestnuts, cook until soft in boiling salted water; drain, mash, moisten with scalded milk, season with salt and pepper, and beat until light. Chestnuts are often boiled, riced, and piled lightly in centre of dish, then surrounded by meat.

Baked Chestnuts

Remove shells from one pint chestnuts, put in a baking-dish, cover with Chicken Stock highly seasoned with salt and cayenne, and bake until soft, keeping covered until nearly done. There should be a small quantity of stock in pan to serve with chestnuts.

Cucumbers

Cucumbers may be obtained throughout the year, and are generally served raw. During the latter part of the summer they are gathered and pickled for subsequent use. Small pickled cucumbers are called gherkins.

Sliced Cucumbers

Remove thick slices from both ends and cut off a thick paring, as the cucumber contains a bitter principle, a large quantity of which lies near the skin and stem end. Cut in thin slices and keep in cold water until ready to serve. Drain, and cover with crushed ice for serving.

Boiled Cucumbers

Old cucumbers may be pared, cut in pieces, cooked until soft in boiling salted water, drained, mashed, and seasoned, with butter, salt, and pepper.

Fried Cucumbers

Pare cucumbers and cut lengthwise in one-third inch slices. Dry between towels, sprinkle with salt and pepper, dip in crumbs, egg, and crumbs again, fry in deep fat, and drain.

Stuffed Cucumbers

Pare three cucumbers, cut in halves crosswise, remove seeds, and let stand in cold water thirty minutes. Drain, wipe, and fill with force-meat, using recipe for Chicken Force-meat I or II, substituting veal for chicken. Place upright on a trivet in a saucepan. Half surround with White Stock, cover, and cook forty minutes. Place on thin slices of dry toast, cut in circular shapes, and pour around one and one-half cups Béchamel Sauce. Serve as a vegetable course or an entrée.

Fried Eggplant I

Pare an eggplant and cut in very thin slices. Sprinkle slices with salt and pile on a plate. Cover with a weight to express the juice, and let stand one and one-half hours. Dredge with flour and sauté slowly in butter until crisp and brown. Eggplant is in season from September to February.

Fried Eggplant II

Pare an eggplant, cut in one-fourth inch slices, and soak over night in cold salted water. Drain, let stand in cold water one-half hour, drain again, and dry between towels. Sprinkle with salt and pepper, dip in batter, or dip in flour, egg, and crumbs, and fry in deep fat.

Stuffed Eggplant

Cook eggplant fifteen minutes in boiling salted water to cover. Cut a slice from top, and with a spoon remove pulp, taking care not to work too closely to skin. Chop pulp, and add one cup soft stale bread crumbs. Melt two tablespoons butter, add one-half tablespoon finely chopped onion, and cook five minutes, or try out three slices of bacon, using bacon fat in place of butter. Add to chopped pulp and bread, season with salt and pepper, and if necessary moisten with a little stock or water; cook five minutes, cool slightly, and add one beaten egg. Refill eggplant, cover with buttered bread crumbs, and bake twenty-five minutes in a hot oven.

Scalloped Eggplant

Pare an eggplant and cut in two-thirds inch cubes. Cook in a small quantity of boiling water until soft, then drain. Cook two tablespoons butter with one-half onion, finely chopped, until yellow, add three-fourths tablespoon finely chopped parsley and eggplant. Turn into a buttered baking-dish. Cover with buttered crumbs and bake until crumbs are brown.

Greens

Hothouse beet greens and dandelions appear in market the first of March, when they command a high price. Those grown out of doors are in season from middle of May to first of July.

Boiled Beet Greens

Wash thoroughly and scrape roots, cutting off ends. Drain, and cook one hour or until tender in a small quantity boiling salted water. Season with butter, salt, and pepper. Serve with vinegar.

Dandelions

Wash thoroughly, remove roots, drain, and cook one hour or until tender in boiling salted water. Allow two quarts water to one peck dandelions. Season with butter, salt, and pepper. Serve with vinegar.

Lettuce

Lettuce is obtainable all the year, and is especially valuable during the winter and spring, when other green vegetables in market command a high price. Although containing but little nutriment, it is useful for the large quantity of water and potash salts that it contains, and assists in stimulating the appetite. Curly lettuce is of less value than Tennis Ball, but makes an effective garnish.

Lettuce should be separated by removing leaves from stalk (discarding wilted outer leaves), washed, kept in cold water until crisp, drained, and so placed on a towel that water may drop from leaves. A bag made from white mosquito netting is useful for drying lettuce. Wash lettuce leaves, place in bag, and hang in lower part of ice-box to drain. Wire baskets are used for the same purpose. Arrange lettuce for serving in nearly its original shape.

Leeks On Toast

Wash and trim leeks, cook in boiling salted water until soft, and drain. Arrange on pieces of buttered toast and pour over melted butter, seasoned with salt and pepper.

Onions

The onion belongs to the same family (Lily) as do *shallot*, *garlic*, *leek*, and *chive*. Onions are cooked and served as a vegetable. They are wholesome, and contain considerable nutriment, but are objectionable on account of the strong odor they impart to the breath, due to volatile substances

absorbed by the blood, and by the blood carried to the lungs, where they are set free. The common garden onion is obtainable throughout the year, the new ones appearing in market about the first of June. In large centres Bermuda and Spanish onions are procurable from March 1st to June 1st, and are of delicate flavor.

Shallot, leek, garlic, and chive are principally used to give additional flavor to food. Shallot, garlic, and chive are used, to some extent, in making salads.

Boiled Onions

Put onions in cold water and remove skins while under water. Drain, put in a saucepan, and cover with boiling salted water; boil five minutes, drain, and again cover with boiling salted water. Cook one hour or until soft, but not broken. Drain, add a small quantity of milk, cook five minutes, and season with butter, salt, and pepper.

Onions In Cream

Prepare and cook as Boiled Onions, changing the water twice during boiling; drain, and cover with Cream or Thin White Sauce.

Scalloped Onions

Cut Boiled Onions in quarters. Put in a buttered baking-dish, cover with White Sauce I, sprinkle with buttered cracker crumbs, and place on centre grate in oven to brown crumbs.

Glazed Onions

Peel small silver skinned onions, and cook in boiling water fifteen minutes. Drain, dry on cheese-cloth, put in a buttered baking-dish, add highly seasoned brown stock to cover bottom of dish, sprinkle with sugar, and bake until soft, basting with stock in pan.

Fried Onions

Remove skins from four medium-sized onions. Cut in thin slices and put in a hot omelet pan with one and one-half tablespoons butter. Cook until brown, occasionally shaking pan that onions may not burn, or turn onions, using a fork. Sprinkle with salt one minute before taking from fire.

French Fried Onions

Peel onions, cut in one-fourth inch slices, and separate into rings. Dip in milk, drain, and dip in flour. Fry in deep fat, drain on brown paper, and sprinkle with salt.

Stuffed Onions

Remove skins from onions, and parboil ten minutes in boiling salted water to cover. Turn upside down to cool, and remove part of centres. Fill cavities with equal parts of finely chopped cooked

chicken, stale soft bread crumbs, and finely chopped onion which was removed, seasoned with salt and pepper, and moistened with cream or melted butter. Place in buttered shallow baking-pan, sprinkle with buttered crumbs, and bake in a moderate oven until onions are soft.

Creamed Oyster Plant (Salsify)

Wash, scrape, and put at once into cold acidulated water to prevent discoloration. Cut in inch slices, cook in boiling salted water until soft, drain, and add to White Sauce I. Oyster plant is in season from October to March.

Salsify Fritters

Cook oyster plant as for Creamed Oyster Plant. Mash, season with butter, salt, and pepper. Shape in small flat cakes, roll in flour, and sauté in butter.

Parsnips

Parsnips are not so commonly served as other vegetables; however, they often accompany a boiled dinner. They are raised mostly for feeding cattle. Unless young they contain a large amount of woody fibre, which extends through centre of roots and makes them undesirable as food.

Parsnips With Drawn Butter Sauce

Wash and scrape parsnips, and cut in pieces two inches long and one-half inch wide and thick. Cook five minutes in boiling salted water, or until soft. Drain, and to two cups add one cup Drawn Butter Sauce.

Parsnip Fritters

Wash parsnips and cook forty-five minutes in boiling salted water. Drain, plunge into cold water, when skins will be found to slip off easily. Mash, season with butter, salt, and pepper, shape in small flat round cakes, roll in flour, and sauté in butter.

Peas

Peas contain, next to beans, the largest percentage of protein of any of the vegetables, and when young are easy of digestion. They appear in market as early as April, coming from Florida and California, and although high in price are hardly worth buying, having been picked so long. Native peas may be obtained the middle of June, and last until the first of September. The early June are small peas, contained in a small pod. McLean, the best peas, are small peas in large flat pods. Champion peas are large, and the pods are well filled, but they lack sweetness. Marrowfat peas are the largest in the market, and are usually sweet.

Boiled Peas

Remove peas from pods, cover with cold water, and let stand one-half hour. Skim off undeveloped peas which rise to top of water, and drain remaining peas. Cook until soft in a small quantity of boiling water, adding salt the last fifteen minutes of cooking. (Consult Time Table for Cooking, p. 28). There should be but little, if any, water to drain from peas when they are cooked. Season with butter, salt, and pepper. If peas have lost much of their natural sweetness, they are improved by the addition of a small amount of sugar.

Creamed Peas

Drain Boiled Peas, and to two cups peas add three-fourths cup White Sauce II. Canned peas are often drained, rinsed, and reheated in this way.

Pea Timbales

Drain and rinse one can peas, and rub through a sieve. To one cup pea pulp add two beaten eggs, two tablespoons melted butter, two-thirds teaspoon salt, one-eighth teaspoon pepper, few grains cayenne, and few drops onion juice. Turn into buttered moulds, set in pan of hot water, cover with buttered paper, and bake until firm. Serve with one cup white sauce to which is added one-third cup canned peas drained and rinsed.

Stuffed Peppers I

- 6 green peppers
- 1 onion, finely chopped
- 2 tablespoons butter
- 4 tablespoons chopped mushrooms
- 1/3 cup Brown Sauce
- 3 tablespoons bread crumbs
- Salt and pepper
- Buttered bread crumbs
- 4 tablespoons lean raw ham, finely chopped

Cut a slice from stem end of each pepper, remove seeds, and parboil peppers, fifteen minutes.

Cook onion in butter three minutes; add mushrooms and ham, and cook one minute, then add Brown Sauce and bread crumbs. Cool mixture, sprinkle peppers with salt, fill with cooked mixture, cover with buttered bread crumbs and bake ten minutes. Serve on toast with Brown Sauce.

Stuffed Peppers II

Prepare peppers as for Stuffed Peppers I. Fill with equal parts of finely chopped cold cooked chicken or veal, and softened bread crumbs, seasoned with onion juice, salt, and pepper.

Pumpkins

Pumpkins are boiled or steamed same as squash, but require longer cooking. They are principally used for making pies.

Radishes

Radishes may be obtained throughout the year. There are round and long varieties, the small round ones being considered best. They are bought in bunches, six or seven constituting a bunch. Radishes are used merely for a relish, and are served uncooked. To prepare radishes for table, remove leaves, stems, and tip end of root, scrape roots, and serve on crushed ice. Round radishes look very attractive cut to imitate tulips, when they should not be scraped; to accomplish this, begin at root end and make six incisions through skin running three-fourths length of radish. Pass knife under sections of skin, and cut down as far as incisions extend. Place in cold water, and sections of skin will fold back, giving radish a tulip-like appearance.

Spinach

Spinach is cheapest and best in early summer, but is obtainable throughout the year. It gives variety to winter diet, when most green vegetables are expensive and of inferior quality.

Boiled Spinach

Remove roots, carefully pick over (discarding wilted leaves), and wash in several waters to be sure that it is free from all sand. When young and tender put in a stewpan, allow to heat gradually, and boil twenty-five minutes, or until tender, in its own juices. Old spinach is better cooked in boiling salted water, allowing two quarts water to one peck spinach. Drain thoroughly, chop finely, reheat, and season with butter, salt, and pepper. Mound on a serving dish and garnish with slices of “hard-boiled” eggs and toast points. The green color of spinach is better retained by cooking in a large quantity of water in an uncovered vessel.

Spinach À La Béchamel

Prepare one-half peck Boiled Spinach. Put three tablespoons butter in hot omelet pan; when melted, add chopped spinach, cook three minutes. Sprinkle with two tablespoons flour, stir thoroughly, and add gradually three-fourths cup milk; cook five minutes.

Purée Of Spinach

Wash and pick over one-half peck spinach. Cook in an uncovered vessel with a large quantity of boiling salted water to which is added one-third teaspoon soda and one-half teaspoon sugar. Drain, chop finely, and rub through a sieve. Reheat, add three tablespoons butter, one tablespoon flour, and one-half cup cream. Arrange on serving dish and garnish with yolk and white of “hard-boiled” egg and fried bread cut in fancy shapes.

Spinach (French Style)

Pick over and wash one peck spinach, and cook in boiling salted water twenty-five minutes. Drain, and finely chop. Reheat in hot pan with four tablespoons butter to which have been added three tablespoons flour and two-thirds cup Chicken Stock. Season with one teaspoon powdered sugar, salt, pepper, and a few gratings each of nutmeg and lemon rind.

Squash

Summer squash, which are in market during the summer months, should be young, tender, and thin skinned. The common varieties are the white round and yellow crook-neck. Some of the winter varieties appear in market as early as the middle of August; among the most common are Marrow, Turban, and Hubbard. Turban and Hubbard are usually drier than Marrow. Marrow and Turban have a thin shell, which may be pared off before cooking. Hubbard Squash has a very hard shell, which must be split in order to separate squash in pieces, and squash then cooked in the shell. In selecting winter squash, see that it is heavy in proportion to its size.

Boiled Summer Squash

Wash squash and cut in thick slices or quarters. Cook twenty minutes in boiling salted water, or until soft. Turn in a cheese-cloth placed over a colander, drain, and wring in cheese-cloth. Mash, and season with butter, salt, and pepper.

Fried Summer Squash I

Wash, and cut in one-half inch slices. Sprinkle with salt and pepper, dip in crumbs, egg, and crumbs again, fry in hot fat, and drain.

Fried Summer Squash II

Follow recipe for Fried Eggplant I.

Steamed Winter Squash

Cut in pieces, remove seeds and stringy portion, and pare. Place in a strainer and cook thirty minutes, or until soft, over boiling water. Mash, and season with butter, salt, and pepper. If lacking in sweetness, add a small quantity of sugar.

Boiled Winter Squash

Prepare as for Steamed Winter Squash. Cook in boiling salted water, drain, mash, and season. Unless squash is very dry, it is much better steamed than boiled.

Baked Winter Squash I

Cut in pieces two inches square, remove seeds and stringy portion, place in a dripping-pan, sprinkle with salt and pepper, and allow for each square one-half teaspoon molasses and one-half teaspoon melted butter. Bake fifty minutes, or until soft, in a moderate oven, keeping covered the first half-hour of cooking. Serve in the shell.

Baked Winter Squash II

Cut squash in halves, remove seeds and stringy portion, place in a dripping-pan, cover, and bake two hours, or until soft, in a slow oven. Remove from shell, mash, and season with butter, salt, and pepper.

Tomatoes

Tomatoes are obtainable throughout the year, but are cheapest and best in September. Hothouse tomatoes are in market during the winter, and command a very high price, sometimes retailing for one and one-half dollars a pound.

Southern tomatoes appear as early as May 1st, and although of good color, lack flavor. Of the many varieties of tomatoes, Acme is among the best.

Sliced Tomatoes

Wipe, and cover with boiling water; let stand one minute, when they may be easily skinned. Chill thoroughly, and cut in one-third inch slices.

Stewed Tomatoes

Wipe, pare, cut in pieces, put in stewpan, and cook slowly twenty minutes, stirring occasionally. Season with butter, salt, and pepper.

Scalloped Tomatoes

Remove contents from one can tomatoes and drain tomatoes from some of their liquor. Season with salt, pepper, a few drops of onion juice, and sugar if preferred sweet. Cover the bottom of a buttered baking-dish with buttered cracker crumbs, cover with tomatoes, and sprinkle top thickly with buttered crumbs. Bake in a hot oven until crumbs are brown.

Broiled Tomatoes

Wipe and cut in halves crosswise, cut off a thin slice from rounding part of each half. Sprinkle with salt and pepper, dip in crumbs, egg, and crumbs again, place in a well-buttered broiler, and broil six to eight minutes.

Tomatoes À La Crème

Wipe, peel, and slice three tomatoes. Sprinkle with salt and pepper, dredge with flour, and sauté in butter. Place on a hot platter and pour over them one cup White Sauce I.

Devilleed Tomatoes

- 3 tomatoes
- Salt and pepper
- Flour
- Butter for sautéing
- 4 tablespoons butter
- 2 teaspoons powdered sugar
- 1 teaspoon mustard
- 1/4 teaspoon salt
- Few grains cayenne
- Yolk 1 “hard-boiled” egg
- 1 egg
- 2 tablespoons vinegar

Wipe, peel, and cut tomatoes in slices. Sprinkle with salt and pepper, dredge with flour, and sauté in butter. Place on a hot platter and pour over the dressing made by creaming the butter, adding dry ingredients, yolk of egg rubbed to a paste, egg beaten slightly, and vinegar, then cooking over hot water, stirring constantly until it thickens.

Baked Tomatoes I

Wipe, and remove a thin slice from stem end of six smooth, medium-sized tomatoes. Take out seeds and pulp, and drain off most of the liquid. Add an equal quantity of cracker crumbs, season with salt, pepper, and a few drops onion juice, and refill tomatoes with mixture. Place in a buttered pan, sprinkle with buttered crumbs, and bake twenty minutes in a hot oven.

Baked Tomatoes II

Wipe six small, selected tomatoes and make two one-inch gashes on blossom end of each, having gashes cross each other at right angles. Place in granite-ware pan and bake until thoroughly heated. Serve with sauce for Devilled Tomatoes, adding, just before serving, one tablespoon heavy cream.

Stuffed Tomatoes

Potatoes

Composition	
Water	78.9%
Starch	18%
Protein	2.1%
Mineral matter	.9%
Fat	1%

Potatoes stand pre-eminent among the vegetables used for food. They are tubers belonging to the Nightshade family; their hardy growth renders them easy of cultivation in almost any soil or climate, and, resisting early frosts, they may be raised in a higher latitude than the cereals.

They give needed bulk to food rather than nutriment, and, lacking in protein, should be used in combination with meat, fish, or eggs.

Potatoes contain an acrid juice, the greater part of which lies near the skin; it passes into the water during boiling of potatoes, and escapes with the steam from a baked potato.

Potatoes are best in the fall, and keep well through the winter. By spring the starch is partially changed to dextrin, giving the potatoes a sweetness, and when cooked a waxiness. The same change takes place when potatoes are frozen. To prevent freezing, keep a pail of cold water standing near them.

Potatoes keep best in a cool dry cellar, in barrels or piled in a bin. When sprouts appear they should be removed; receiving their nourishment from the starch, they deteriorate the potato.

New potatoes may be compared to unripe fruit, the starch-grains not having reached maturity; therefore they should not be given to children or invalids.

Sweet Potatoes

Sweet potatoes, although analogous to white potatoes, are fleshy roots of the plant, belong to a different family (*Convolvulus*), and contain a much larger percentage of sugar. Our own country produces large quantities of sweet potatoes, which may be grown as far north as New Jersey and Southern Michigan. Kiln-dried sweet potatoes are the best, as they do not so quickly spoil.

Baked Potatoes

Select smooth, medium-sized potatoes. Wash, using a vegetable brush, and place in dripping-pan. Bake in hot oven forty minutes or until soft, remove from oven, and serve at once. If allowed to stand, unless the skin is ruptured for escape of steam, they become soggy. Properly baked potatoes are more easily digested than potatoes cooked in any other way, as some of the starch is changed to dextrin by the intense heat. They are better cooked in boiling water than baked in a slow oven.

Boiled Potatoes

Select potatoes of uniform size. Wash, pare, and drop at once in cold water to prevent discoloration; soak one-half hour in the fall, and one to two hours in winter and spring. Cook in boiling salted water until soft, which is easily determined by piercing with a skewer. For seven potatoes allow one tablespoon salt, and boiling water to cover. Drain from water, and keep uncovered in warm place until serving time. Avoid sending to table in a covered vegetable dish. In boiling large potatoes, it often happens that outside is soft, while centre is underdone. To finish cooking without potatoes breaking apart, add one pint cold water, which drives heat to centre, thus accomplishing the cooking.

Riced Potatoes

Force hot boiled potatoes through a potato ricer or coarse strainer. Serve lightly piled in a hot vegetable dish.

Salads And Salad Dressings

Salads, which constitute a course in almost every dinner, but a few years since seldom appeared on the table. They are now made in an endless variety of ways, and are composed of meat, fish, vegetables (alone or in combination) or fruits, with the addition of a dressing. The salad plants, lettuce, watercress, chicory, cucumbers, etc., contain but little nutriment, but are cooling, refreshing, and assist in stimulating the appetite. They are valuable for the water and potash salts they contain. The olive oil, which usually forms the largest part of the dressing, furnishes nutriment, and is of much value to the system.

Salads made of greens should always be served crisp and cold. The vegetables should be thoroughly washed, allowed to stand in cold or ice-water until crisp, then drained and spread on a towel and set aside in a cold place until serving time. See Lettuce, page 294. Dressing may be added at table or just before sending to table. If greens are allowed to stand in dressing they will soon wilt. It should be remembered that winter greens are raised under glass and should be treated as any other hothouse plant. Lettuce will be affected by a change of temperature and wilt just as quickly as delicate flowers.

Canned or cold cooked left-over vegetables are well utilized in salads, but are best mixed with French Dressing and allowed to stand in a cold place one hour before serving. Where several vegetables are used in the same salad they should be marinated separately, and arranged for serving just before sending to table.

Meat for salads should be freed from skin and gristle, cut in small cubes, and allowed to stand mixed with French Dressing before combining with vegetables. Fish should be flaked or cut in cubes.

Where salads are dressed at table, first sprinkle with salt and pepper, add oil, and lastly vinegar. If vinegar is added before oil, the greens will become wet, and oil will not cling, but settle to bottom of bowl.

A Chapon. Remove a small piece from end of French loaf and rub over with a clove of garlic, first dipped in salt. Place in bottom of salad bowl before arranging salad. A chapon is often used in vegetable salads, and gives an agreeable additional flavor.

To Marinate. The word marinate, as used in cookery, means to add salt, pepper, oil, and vinegar to a salad ingredient or mixture, then allow to let stand until well seasoned.

- Few grains cayenne
- 2 tablespoons oil
- 1/3 cup vinegar diluted with cold water to make one-half cup
- 2 eggs, slightly beaten

Mix dry ingredients, add egg and oil gradually, stirring constantly until thoroughly mixed; then add diluted vinegar. Cook over boiling water until mixture thickens; strain and cool.

Mayonnaise Dressing I

- 1 teaspoon mustard
- 1 teaspoon salt
- 1 teaspoon powdered sugar
- Few grains cayenne
- 4 egg yolks
- 2 tablespoons lemon juice
- 2 tablespoons vinegar
- 1 1/2 cups olive oil

Mix dry ingredients, add egg yolks, and when well mixed add one-half teaspoon of vinegar. Add oil gradually, at first drop by drop, and stir constantly. As mixture thickens, thin with vinegar or lemon juice. Add oil, and vinegar or lemon juice alternately, until all is used, stirring or beating constantly. If oil is added too rapidly, dressing will have a curdled appearance. A smooth consistency may be restored by taking yolk of another egg and adding curdled mixture slowly to it. It is desirable to have bowl containing mixture placed in a larger bowl of crushed ice, to which a small quantity of water has been added. Olive oil for making Mayonnaise should always be thoroughly chilled. A silver fork, wire whisk, small wooden spoon, or Dover Egg-beater may be used as preferred. If one has a Keystone Egg-beater, dressing may be made very quickly by its use. Mayonnaise should be stiff enough to hold its shape. It soon liquefies when added to meat or vegetables; therefore it should be added just before serving time.

Mayonnaise Dressing II

Use same ingredients as for Mayonnaise Dressing I, adding mashed yolk of a “hard-boiled” egg to dry ingredients.

French Chef

Cream Mayonnaise Dressing

To Mayonnaise Dressing I or II add one-third cup thick cream, beaten until stiff. This recipe should be used only when dressing is to be eaten the day it is made.

Green Mayonnaise

Color Mayonnaise Dressing 1 with juices expressed from parsley and watercress, using one-half as much parsley as watercress. To obtain coloring, break greens in pieces, pound in a mortar until thoroughly macerated, then squeeze through cheese-cloth. Lobster coral, rubbed through a fine sieve, added to Mayonnaise, makes *Red Mayonnaise*.

Potato Mayonnaise

- 1 Very small baked potato
- 1 teaspoon mustard
- 1 teaspoon salt
- 1 teaspoon powdered sugar
- 2 tablespoons vinegar
- 3/4 cup olive oil

Remove and mash the inside of potato. Add mustard, salt, and powdered sugar; add one tablespoon vinegar, and rub mixture through a fine sieve. Add slowly oil and remaining vinegar. By the taste one would hardly realize eggs were not used in the making.

- 1/2 cup milk
- 1 egg
- 1 tablespoon olive oil

Mix dry ingredients, add milk gradually, and beaten egg; then add olive oil. Shape, using a hot timbale iron, fry in deep fat until crisp and brown; take from iron and invert on brown paper to drain.

To Heat Timbale Iron. Heat fat until nearly hot enough to fry uncooked mixtures. Put iron into hot fat, having fat deep enough to more than cover it, and let stand until heated. The only way of knowing when iron is of right temperature is to take it from fat, shake what fat may drip from it, lower in batter to three-fourths its depth, raise from batter, then immerse in hot fat. If batter does not cling to iron, or drops from iron as soon as immersed in fat, it is either too hot or not sufficiently heated.

To Form Timbales. Turn timbale batter into a cup. Lower hot iron into cup, taking care that batter covers iron to only three-fourths its depth. When immersed in fat, mixture will rise to top of iron, and when crisp and brown may be easily slipped off. If too much batter is used, in cooking it will rise over top of iron, and in order to remove timbale it must be cut around with a sharp knife close to top of iron. If the cases are soft rather than crisp, batter is too thick and must be diluted with milk.

Fill cases with Creamed Oysters, Chicken, Sweetbreads, or Chicken and Sweetbreads in combination with Mushrooms.

Aspic Jelly

- 2 tablespoons carrot
- 2 tablespoons onion

- 2 tablespoons celery
- 2 sprigs parsley
- 2 sprigs thyme
- 1 sprig savory
- 2 cloves
- 1/2 teaspoon peppercorns
- 1 bay leaf
- 7/8 cup white wine
- 1 box gelatine
- 1 quart White Stock for vegetables and
- white meat, or
- 1 quart Brown Stock for dark meat
- Juice 1 lemon
- 3 egg whites

Aspic jelly is always made with meat stock, and is principally used in elaborate entrées where fish, chicken, game, or vegetables are to be served moulded in jelly. In making Aspic Jelly, use as much liquid as the pan which is to contain moulded dish will hold.

Put vegetables, seasonings, and wine (except two tablespoons) in a saucepan; cook eight minutes, and strain, reserving liquid. Add gelatine to stock, then add lemon juice. Heat to boiling-point and add strained liquid. Season with salt and cayenne. Beat whites of eggs slightly, add two tablespoons wine, and dilute with one cup hot mixture. Add slowly to remaining mixture, stirring constantly until boiling-point is reached. Place on back of range and let stand thirty minutes. Strain through a double cheese-cloth placed over a fine wire strainer, or through a jelly bag.

Tomatoes In Aspic

Peel six small firm tomatoes, and remove pulp, having opening in tops as small as possible. Sprinkle insides with salt, invert, and let stand thirty minutes. Fill with vegetable or chicken salad. Cover tops with Mayonnaise to which has been added a small quantity of dissolved gelatine, and garnish with capers and sliced pickles. Place a pan in ice-water, cover bottom with aspic jelly mixture, and let stand until jelly is firm. Arrange tomatoes on jelly garnished side down. Add more aspic jelly mixture, let stand until firm, and so continue until all is used. Chill thoroughly, turn on a serving dish, and garnish around base with parsley.

Stuffed Olives In Aspic

Stone olives, using an olive stoner, and fill cavities thus made with green butter. Place small Dario moulds in pan of ice-water, and pour in aspic jelly mixture (see p. 382) one-fourth inch deep. When firm put an olive in each mould (keeping olives in place by means of small wooden skewers) and add aspic by spoonfuls until moulds are filled. Chill thoroughly, remove to circular slices of liver sausage, garnish with green butter forced through a pastry bag and tube, yolks of “hard-boiled” eggs forced through a strainer, and red peppers cut in fancy shapes.

Green Butter. Mix yolk one “hard-boiled” egg, two tablespoons butter, one sprig parsley, one sprig tarragon, one small shallot, one-half teaspoon anchovy paste, one teaspoon capers, and one teaspoon chopped gherkins, and pound in a mortar; then rub through a very fine sieve. Season with salt and pepper, and add a few drops vinegar.

Tongue In Aspic

Cook a tongue according to directions on page 210. After removing skin and roots, run a skewer through tip of tongue and fleshy part, thus keeping tongue in shape. When cool, remove skewer. Put a round pan in ice-water, cover bottom with brown aspic, and when firm decorate with cooked carrot, turnip, beet cut in fancy shapes, and parsley. Cover with aspic jelly mixture, adding it by spoonfuls so as not to disarrange vegetables. When this layer of mixture is firm, put in tongue, adding gradually remaining mixture as in Tomatoes in Aspic.

Birds In Aspic

Clean, bone, stuff, and truss a bird, then steam over body bones or roast. If roasted, do not dredge with flour. Put a pan in ice-water, cover bottom with aspic jelly mixture, and when firm garnish with truffles and egg custard thinly sliced and cut in fancy shapes. The smaller the shapes the more elaborate may be the designs. When garnishing with small shapes, pieces are so difficult to handle that they should be taken on the pointed end of a larding-needle, and placed as desired on jelly. Add aspic mixture by spoonfuls, that designs may not be disturbed. When mixture is added, and firm to the depth of three-fourths inch, place in the bird, breast down. If sides of mould are to be decorated, dip pieces in jelly and they will cling to pan. Add remaining mixture gradually as in Tomatoes in Aspic. Small birds, chicken, capon, or turkey, may be put in aspic.

Egg Custard For Decorating

Separate yolks from whites of two eggs. Beat yolks slightly, add two tablespoons milk and few grains salt. Soak moss fifteen minutes in cold water to cover, drain, pick over, and add to milk; cook in double boiler thirty minutes; the milk will seem but little thicker than when put on to cook, but if cooked longer blanc-mange will be too stiff. Add salt, strain, flavor, re-strain, and fill individual moulds previously dipped in cold water; chill, turn on glass dish, surround with thin slices of banana, and place a slice on each mould. Serve with sugar and cream.

Beat eggs slightly, add sugar and salt; stir constantly while adding gradually hot milk. Cook in double boiler, continue stirring until mixture thickens and a coating is formed on the spoon, strain immediately; chill and flavor. If cooked too long the custard will curdle; should this happen, by using a Dover egg-beater it may be restored to a smooth consistency, but custard will not be as thick. Eggs should be beaten slightly for custard, that it may be of smooth, thick consistency. To prevent scum from forming, cover with a perforated tin. When eggs are scarce, use yolks two eggs and one-half tablespoon corn-starch.

Tipsy Pudding

Flavor Boiled Custard with Sherry wine, and pour over slices of stale sponge cake; cover with Cream Sauce I or II.

- 1/4 teaspoon salt
- Few gratings nutmeg

Beat eggs slightly, add sugar and salt, pour on slowly scalded milk; strain in buttered mould, set in pan of hot water. Sprinkle with nutmeg, and bake in slow oven until firm, which may be readily determined by running a silver knife through custard; if knife comes out clean, custard is done. During baking, care must be taken that water surrounding mould does not reach boiling-point, or custard will whey. Always bear in mind that eggs and milk in combination must be cooked at a low temperature. For *cup custards* allow four eggs to four cups milk; for large moulded custard, six eggs; if less eggs are used custard is liable to crack when turned on a serving dish.

- 1/2 teaspoon salt
- 1 teaspoon vanilla

As soon as sugar is melted in milk, add mixture gradually to eggs slightly beaten; add salt and flavoring, then strain in buttered mould. Bake as custard. Chill, and serve with Caramel Sauce.

To Whip Cream

Thin and heavy cream are both used in making and garnishing desserts.

Heavy cream is bought in half-pint, pint, and quart glass jars, and usually retails at sixty cents per quart; *thin* or *strawberry cream* comes in glass jars or may be bought in bulk, and usually retails for thirty cents per quart. Heavy cream is very rich; for which reason, when whipped without being diluted, it is employed as a garnish; even when so used, it is generally diluted with one-fourth to one-third its bulk in milk; when used in combination with other ingredients for making desserts, it is diluted from one-half to two-thirds its bulk in milk. Thin cream is whipped without being diluted. Cream should be thoroughly chilled for whipping. Turn cream to be whipped into a bowl (care being taken not to select too large a bowl), and set in pan of crushed ice, to which water is added that cream may be quickly chilled; without addition of water, cream will not be so thoroughly chilled.

For whipping heavy cream undiluted, or diluted with one-third or less its bulk in milk, use Dover egg-beater; undiluted heavy cream if beaten a moment too long will come to butter. Heavy cream diluted, whipped, sweetened, and flavored, is often served with puddings, and called Cream Sauce.

Thin cream is whipped by using a whip churn, as is heavy cream when diluted with one-half to two-thirds its bulk in milk. Place churn in bowl containing cream, hold down cover with left hand, with right hand work dasher with quick downward and slow upward motions; avoid raising dasher too high in cylinder, thus escaping spattering of cream. The first whip which appears should be stirred into cream, as air bubbles are too large and will break; second whip should be removed by spoonfuls to a strainer, strainer to be placed in a pan, as some cream will drain through. The first cream which drains through may be turned into bowl to be rewhipped, and continue whipping as long as possible.

There will be some cream left in bowl which does not come above perforations in whip churn, and cannot be whipped. Cream which remains may be scalded and used to dissolve gelatine when making desserts which require gelatine. Cream should treble its bulk in whipping. By following

these directions one need have no difficulty, if cream is of right consistency; always bearing in mind heavy cream must be whipped with a Dover egg-beater; thin cream must be whipped with a churn.

Ices, Ice Creams, And Other Frozen Desserts

Ices and other frozen dishes comprise the most popular desserts. Hygienically speaking, they cannot be recommended for the final course of a dinner, as cold mixtures reduce the temperature of the stomach, thus retarding digestion until the normal temperature is again reached. But how cooling, refreshing, and nourishing, when properly taken, and of what inestimable value in the sick room!

Frozen dishes include:—

Water ice,—fruit juice sweetened, diluted with water, and frozen.

Sherbet,—water ice to which is added a small quantity of dissolved gelatine or beaten whites of eggs.

Frappé,—water ice frozen to consistency of mush; in freezing, equal parts of salt and ice being used to make it granular.

Punch,—water ice to which is added spirit and spice.

Sorbet,—strictly speaking, frozen punch; the name is often given to a water ice where several kinds of fruit are used.

Philadelphia Ice Cream,—thin cream, sweetened, flavored, and frozen.

Plain Ice Cream,—custard foundation, thin cream, and flavoring.

Mousse,—heavy cream, beaten until stiff, sweetened, flavored, placed in a mould, packed in salt and ice (using two parts crushed ice to one part salt), and allowed to stand three hours; or whip from thin cream may be used folded into mixture containing small quantity of gelatine.

How To Freeze Desserts

The prejudice of thinking a frozen dessert difficult to prepare has long since been overcome. With ice cream freezer, burlap bag, wooden mallet or axe, small saucepan, sufficient ice and coarse rock salt, the process neither takes much time nor patience. Snow may be used instead of ice; if not readily acted on by salt, pour in one cup cold water. Crush ice finely by placing in bag and giving a few blows with mallet or broad side of axe; if there are any coarse pieces, remove them. Place can containing mixture to be frozen in wooden tub, cover, and adjust top. Turn crank to make sure can fits in socket. Allow three level measures ice to one of salt, and repeat until ice and salt come to top of can, packing solidly, using handle of mallet to force it down. If only small quantity is to be frozen, the ice and salt need come only a little higher in the tub than mixture to be frozen. These are found the best proportions of ice and salt to insure smooth, fine-grained cream, sherbet, or water ice, while equal parts of salt and ice are used for freezing frappé. If a larger proportion of salt is used, mixture will freeze in shorter time and be of granular consistency, which is desirable only for frappé.

The mixture increases in bulk during freezing, so the can should never be more than three-fourths filled; by overcrowding can, cream will be made coarse-grained. Turn the crank slowly and steadily to expose as large surface of mixture as possible to ice and salt. After frozen to a mush, the crank may be turned more rapidly, adding more ice and salt if needed; never draw off salt water until mixture is frozen, unless there is possibility of its getting into the can, for salt water is what effects freezing; until ice melts, no change will take place. After freezing is accomplished, draw off water, remove dasher, and with spoon pack solidly. Put cork in opening of cover, then put on cover. Re-pack

freezer, using four measures ice to one of salt. Place over top newspapers or piece of carpet; when serving time comes, remove can, wipe carefully, and place in vessel of cool water; let stand one minute, remove cover, and run a knife around edge of cream, invert can on serving dish, and frozen mixture will slip out. Should there be any difficulty, a cloth wrung out of hot water, passed over can, will aid in removing mixture.

To Line A Mould

Allow mould to stand in salt and ice until well chilled. Remove cover, put in mixture by spoonfuls, and spread with back of spoon or a case knife evenly three-quarters inch thick.

To Mould Frozen Mixtures

When frozen mixtures are to be bricked or moulded, avoid freezing too hard. Pack mixture solidly in moulds and cover with buttered paper, buttered side up. Have moulds so well filled that mixture is forced down sides of mould when cover is pressed down. Re-pack in salt and ice, using four parts ice to one part salt. If these directions are carefully followed, one may feel no fear that salt water will enter cream, even though moulds be immersed in salt water.

Pastry

Pastry cannot be easily excluded from the menu of the New Englander. Who can dream of a Thanksgiving dinner without a pie! The last decade has done much to remove pies from the *daily* bill of fare, and in their place are found delicate puddings and seasonable fruits.

If pastry is to be served, have it of the best,—light, flaky, and tender.

To pastry belongs, 1st, Puff Paste; 2d, Plain Paste.

Puff paste, which to many seems so difficult of preparation, is rarely attempted by any except professionals. As a matter of fact, one who has never handled a rolling-pin is less liable to fail, under the guidance of a good teacher, than an old cook, who finds it difficult to overcome the bad habit of using too much force in rolling. It is necessary to work rapidly and with a light touch. A cold room is of great advantage.

For making pastry, pastry flour and the best shortenings, thoroughly chilled, are essential. Its lightness depends on the amount of air enclosed and expansion of that air in baking. The flakiness depends upon kind and amount of shortening used. Lard makes more tender crust than butter, but lacks flavor which butter gives. Puff paste is usually shortened with butter, though some chefs prefer beef suet. Eggs and ice were formerly used, but are not essentials.

Butter should be washed if pastry is to be of the best, so as to remove salt and buttermilk, thus making it of a waxy consistency, easy to handle.

Rules for Washing Butter. Scald and chill an earthen bowl. Heat palms of hands in hot water, and chill in cold water. By following these directions, butter will not adhere to bowl nor hands. Wash butter in bowl by squeezing with hands until soft and waxy, placing bowl under a cold-water faucet and allowing water to run. A small amount of butter may be washed by using a wooden spoon in place of the hands.

For rolling paste, use a smooth wooden board, and wooden rolling-pin with handles.

Puff paste should be used for vol-au-vents, patties, rissoles, bouchées, cheese straws, tarts, etc. It may be used for rims and upper crusts of pies, but never for lower crusts. Plain paste may be used where pastry is needed, except for vol-au-vents and patties.

Puff Paste

- 1 pound butter
- 1 pound pastry flour
- Cold water

Wash the butter, pat and fold until no water flies. Reserve two tablespoons of butter, and shape remainder into a circular piece one-half inch thick, and put on floured board. Work two tablespoons of butter into flour with the tips of fingers of the right hand. Moisten to a dough with cold water, turn on slightly floured board, and knead one minute. Cover with towel, and let stand five minutes.

Pat and roll one-fourth inch thick, keeping paste a little wider than long, and corners square. If this cannot be accomplished with rolling-pin, draw into shape with fingers. Place butter on centre of

lower half of paste. Cover butter by folding upper half of paste over it. Press edges firmly, to enclose as much air as possible.

Fold right side of paste over enclosed butter, the left side under enclosed butter. Turn paste half-way round, cover, and let stand five minutes. Pat, and roll one-fourth inch thick, having paste longer than wide, lifting often to prevent paste from sticking, and dredging board slightly with flour when necessary. Fold from ends towards centre, making three layers. Cover, and let stand five minutes. Repeat twice, turning paste half-way round each time before rolling. After fourth rolling, fold from ends to centre, and double, making four layers. Put in cold place to chill; if outside temperature is not sufficiently cold, fold paste in a towel, put in a dripping-pan, and place between dripping pans of crushed ice. If paste is to be kept for several days, wrap in a napkin, put in tin pail and cover tightly, then put in cold place; if in ice box, do not allow pail to come in direct contact with ice.

To Bake Puff Paste

Baking of puff paste requires as much care and judgment as making. After shaping, chill thoroughly before baking. Puff paste requires hot oven, greatest heat coming from the bottom, that the paste may properly rise. While rising it is often necessary to decrease the heat by lifting covers or opening the check to stove. Turn frequently, that it may rise evenly. When it has risen its full height, slip a pan under the sheet on which paste is baking to prevent burning on the bottom. Puff paste should be baked on a tin sheet covered with a double thickness of brown paper, or dripping-pan may be used, lined with brown paper. The temperature for baking of patties should be about the same as for raised biscuit; vol-au-vents require less heat, and are covered for first half-hour to prevent scorching on top.

Patty Shells

Roll puff paste one-quarter inch thick, shape with a patty cutter, first dipped in flour; remove centres from one-half the rounds with smaller cutter. Brush over with cold water the larger pieces near the edge, and fit on rings, pressing lightly. Place in towel between pans of crushed ice, and chill until paste is stiff; if cold weather, chill out of doors. Place on iron or tin sheet covered with brown paper, and bake twenty-five minutes in hot oven. The shells should rise their full height and begin to brown in twelve to fifteen minutes; continue browning, and finish baking in twenty-five minutes. Pieces cut from centre of rings of patties may be baked and used for patty covers, or put together, rolled, and cut for unders. Trimmings from puff paste should be carefully laid on top of each other, patted, and rolled out.

Vol-Au-Vents

Roll puff paste one-third inch thick, mark an oval on paste with cutter or mould, and cut out with sharp knife, first dipped in flour. Brush over near the edge with cold water, put on a rim three-fourths inch wide, press lightly, chill, and bake. Vol-au-vents require for baking forty-five minutes to one hour. During the first half-hour they should be covered, watched carefully, and frequently turned. The paste cut from centre of rim should be rolled one-quarter inch thick, shaped same size as before rolling, chilled, baked, and used for cover to the Vol-au-vent.

Quick Puff Paste

- 1 cup bread flour
- 1 tablespoon lard
- Cold water
- 7/8 cup butter

Work lard into flour, first using knife then tips of fingers. Moisten to a dough with cold water, pat, and roll out same as Puff Paste. Dot paste with small pieces of butter, using one-third the quantity. Dredge with flour, fold from ends toward centre, then double, making four layers. Pat, and roll out. Repeat until butter is used. Roll, shape, chill, and bake in a hot oven.

Plain Paste

- 1 1/2 cups flour
- 1/4 cup lard
- 1/4 cup butter
- 1/2 teaspoon salt.
- Cold water

Wash butter, pat, and form in circular piece. Add salt to flour, and work in lard with tips of fingers or case knife. Moisten to dough with cold water; ice-water is not an essential, but is desirable in summer. Toss on board dredged sparingly with flour, pat, and roll out; fold in butter as for puff paste, pat, and roll out. Fold so as to make three layers, turn half-way round, pat, and roll out; repeat. The pastry may be used at once; if not, fold in cheese-cloth, put in covered tin, and keep in cold place, but never in direct contact with ice. Plain paste requires a moderate oven. This is superior paste and quickly made.

Chopped Paste

- 2 cups flour
- 2 tablespoons lard
- 2/3 cup butter
- 1/2 teaspoon salt
- Cold water

Wash butter. Mix salt with flour, put in chopping tray, add lard and butter, and chop until well mixed. Moisten to a dough with cold water. Toss on floured cloth (Magic Cover), pat, and roll out. Fold so as to make three layers, turn half-way round, pat, and roll out; repeat. Should the butter be too hard, it will not mix readily with the flour, in which case the result will be a tough crust. Omit lard, and use all butter, if preferred.

Quick Paste

- 1 1/2 cups flour
- 3/4 teaspoon salt
- 1/4 cup cottolene or cocoanut butter
- Cold water

Mix salt with flour, cut in shortening with knife. Moisten to dough with cold water. Toss on floured board, pat, roll out, and roll up like a jelly roll. Use one-third cup of shortening if a richer paste is desired.

Paste With Lard

- 1 1/2 cups flour
- 1/2 teaspoon salt
- 1/3 cup lard
- Cold water

Mix salt with flour. Reserve one and one-fourth tablespoons lard, work in remainder to flour, using tips of fingers or a case knife. Moisten to a dough with water. Toss on a floured board, pat, and roll out. Spread with one tablespoon reserved lard, dredge with flour, roll up like a jelly roll, pat, and roll out; again roll up. Cut from the end of roll a piece large enough to line a pie plate. Pat and roll out, keeping the paste as circular in form as possible. With care and experience there need be no trimmings. Worked-over pastry is never as satisfactory. The remaining one-fourth tablespoon lard is used to dot over upper crust of pie just before sending to oven; this gives the pie a flaky appearance. Ice-water has a similar effect. If milk is brushed over the pie it has a glazed appearance. This quantity of paste will make one pie with two crusts and a few puffs, or two pies with one crust where the rim is built up and fluted.

Entire Wheat Paste

- 1 cup fine Entire Wheat Flour
- 1/2 cup pastry flour
- 1 teaspoon salt
- 3 tablespoons lard
- 1/2 cup butter
- Cold water

Make same as Plain Paste. Roll to one-fourth inch in thickness, cut in finger-shaped pieces, bake, cool, brush over with slightly beaten white one egg diluted with one teaspoon cold water, and sprinkle with chopped nut meat seasoned with salt. Return to oven to slightly brown nut meats. Serve with salad course.

Pies

Paste for pies should be one-fourth inch thick and rolled a little larger than the plate to allow for shrinking. In dividing paste for pies, allow more for upper than under crusts. Always perforate upper crusts that steam may escape. Some make a design, others pierce with a large fork.

Flat rims for pies should be cut in strips three-fourths inch wide. Under crusts should be brushed with cold water before putting on rims, and rims slightly full, otherwise they will shrink from edge of plate. The pastry jagger, a simple device for cutting paste, makes rims with fluted edges.

Pies requiring two crusts sometimes have a rim between the crusts. This is mostly confined to mince pieces, where there is little danger of juice escaping. Sometimes a rim is placed over upper crust. Where two pieces of paste are put together, the under piece should always be brushed with cold water, the upper piece placed over, and the two pressed lightly together; otherwise they will separate during baking.

When juicy fruit is used for filling pies, some of the juices are apt to escape during baking. As a precaution, bind with a strip of cotton cloth wrung out of cold water and cut one inch wide and long enough to encircle the plate. Squash, pumpkin, and custard pies are much less care during baking when bound. Where cooked fruits are used for filling, it is desirable to bake crusts separately. This is best accomplished by covering an inverted deep pie plate with paste and baking for under crust. Prick with a fork before baking. Slip from plate, and fill. For upper crusts, roll a piece of paste a little larger than the pie plate, prick, and bake on a tin sheet.

For baking pies, perforated tin plates are used. They may be bought shallow or deep. By the use of such plates the under crust is well cooked. Pastry should be thoroughly baked and well browned. Pies require from thirty-five to forty-five minutes for baking. Never grease a pie plate; good pastry greases its own tin. Slip pies, when slightly cooled, to earthen plates.

Apple Pie I

- 4 or 5 sour apples
- 1/3 cup sugar
- 1/4 teaspoon grated nutmeg
- 1/8 teaspoon salt
- 1 teaspoon butter
- 1 teaspoon lemon juice
- Few gratings lemon rind

Line pie plate with paste. Pare, core, and cut the apples into eighths, put row around plate one-half inch from edge, and work towards centre until plate is covered; then pile on remainder. Mix sugar, nutmeg, salt, lemon juice, and grated rind, and sprinkle over apples. Dot over with butter. Wet edges of under crust, cover with upper crust, and press edges together.

Bake forty to forty-five minutes in moderate oven. A very good pie may be made without butter, lemon juice, and grated rind. Cinnamon may be substituted for nutmeg. Evaporated apples may be used in place of fresh fruit. If used, they should be soaked over night in cold water.

Apple Pie II

Use same ingredients as for Apple Pie I. Place in small earthen baking-dish and add hot water to prevent apples from burning. Cover closely, and bake three hours in very slow oven, when apples will be a dark red color. Brown sugar may be used instead of white sugar, a little more being required. Cool, and bake between two crusts.

Blackberry Pie

Pick over and wash one and one-half cups berries. Stew until soft with enough water to prevent burning. Add sugar to taste, and one-eighth teaspoon salt. Line plate with paste, put on a rim, fill with berries (which have been cooled); arrange six strips pastry across the top, cut same width as rim; put on an upper rim. Bake thirty minutes in moderate oven.

Blueberry Pie

- 2 1/2 cups berries
- Flour
- 1/2 cup sugar
- 1/8 teaspoon salt

Line a deep plate with Plain Paste, fill with berries slightly dredged with flour; sprinkle with sugar and salt, cover, and bake forty-five to fifty minutes in a moderate oven. For sweetening, some prefer to use one-third molasses, the remaining two-thirds to be sugar. Six green grapes (from which seeds have been removed) cut in small pieces much improve the flavor, particularly where huckleberries are used in place of blueberries.

Cranberry Pie

- 1 1/2 cups cranberries
- 1/2 cup water
- 3/4 cup sugar

Put ingredients in saucepan in order given, and cook ten minutes; cool, and bake in one crust, with a rim, and strips across the top.

Currant Pie

- 1 cup currants
- 1 cup sugar

- 1/4 cup flour
- 2 egg yolks
- 2 tablespoons water

Mix flour and sugar, add yolks of eggs slightly beaten and diluted with water. Wash currants, drain, remove stems, then measure; add to first mixture and bake in one crust; cool, and cover with Meringue I. Cook in slow oven until delicately browned.

Cream Pie

Bake three crusts on separate pie plates. Put together with Cream Filling and dust over with powdered sugar. If allowed to stand after filling for any length of time, the pastry will soften.

Custard Pie

- 2 eggs
- 3 tablespoons sugar
- 1/8 teaspoon salt
- 1 1/2 cups milk
- Few gratings nutmeg

Beat eggs slightly, add sugar, salt, and milk. Line plate with paste, and build up a fluted rim. Strain in the mixture and sprinkle with few gratings nutmeg. Bake in quick oven at first to set rim, decrease the heat afterwards, as egg and milk in combination need to be cooked at low temperature.

Date Pie

- 2 cups milk
- 1/3 pound sugar dates
- 2 eggs
- 1/4 teaspoon salt
- Few gratings nutmeg

Cook dates with milk twenty minutes in top of double boiler. Strain, and rub through sieve, then add eggs and salt. Bake same as Custard Pie.

Lemon Pie I

- 1/2 cup chopped apple
- 1 cup sugar
- 1 beaten egg
- 1/4 cup rolled common crackers

- 2 tablespoons lemon juice
- Grated rind 1 lemon
- 1 teaspoon melted butter

Mix ingredients in order given and bake with two crusts.

Lemon Pie II

- 3/4 cup sugar
- 3/4 cup boiling water
- 2 tablespoons corn-starch
- 2 tablespoons flour
- 2 egg yolks
- 3 tablespoons lemon juice
- Grated rind 1 lemon
- 1 teaspoon butter

Mix corn-starch, flour, and sugar, add boiling water, stirring constantly. Cook two minutes, add butter, egg yolks, and rind and juice of lemon. Line plate with paste same as for Custard Pie. Turn in mixture which has been cooled, and bake until pastry is well browned. Cool slightly, and cover with Meringue I; then return to oven and bake meringue.

Lemon Pie III

- 4 egg yolks
- 6 tablespoons sugar
- Few grains salt
- 1 1/4 cups milk
- 4 egg whites
- 7/8 cup powdered sugar
- 1 lemon

Beat yolks of eggs slightly, add sugar, salt, grated rind of lemon, and milk. Line plate with paste as for Custard Pie. Pour in mixture. Bake in moderate oven until set. Remove from oven, cool slightly, and cover with Meringue III (see p. 480) made of whites of eggs, powdered sugar, and lemon juice.

Lemon Pie IV

- 3 eggs
- 2/3 cup sugar

- 1/4 cup lemon juice
- Grated rind 1/2 lemon
- 2 tablespoons water

Beat eggs slightly, add sugar, lemon juice, grated rind, and water. Bake in one crust in a moderate oven. Cool slightly, cover with Meringue II, then return to oven and bake meringue.

Lemon Pie V

- 1 cup sugar
- 3 tablespoons flour
- 3 tablespoons lemon juice
- 4 egg yolks
- 1 cup milk
- 1 tablespoon melted butter
- 2 egg whites
- Few grains salt

Mix sugar and flour, add lemon juice, egg yolks slightly beaten, milk, butter, whites of eggs beaten stiff, and salt. Bake in one crust, and cover with meringue or not, as desired.

Mince Pies

Mince pies should be always baked with two crusts. For Thanksgiving and Christmas pies, Puff Paste is often used for rims and upper crusts, but is never satisfactory when used for under crusts.

Mince Pie Meat I

- 4 lbs. lean beef
- 2 lbs. beef suet
- Baldwin apples
- 3 quinces
- 3 lbs. sugar
- 2 cups molasses
- 2 quarts cider
- 4 lbs. raisins, seeded and cut in pieces
- 3 lbs. currants
- 1/2 lb. finely cut citron
- 1 quart cooking brandy
- 1 tablespoon cinnamon and mace

- 1 tablespoon powdered clove
- 2 grated nutmegs
- 1 teaspoon pepper
- Salt to taste

Cover meat and suet with boiling water and cook until tender, cool in water in which they are cooked; the suet will rise to top, forming a cake of fat, which may be easily removed. Finely chop meat, and add it to twice the amount of finely chopped apples. The apples should be quartered, cored, and pared, previous to chopping, or skins may be left on, which is not an objection if apples are finely chopped. Add quinces finely chopped, sugar, molasses, cider, raisins, currants, and citron; also suet, and stock in which meat and suet were cooked, reduced to one and one-half cups. Heat gradually, stir occasionally, and cook slowly two hours; then add brandy and spices.

Mince Pie Meat II

- 5 cups chopped cooked beef
- 2 1/2 cups chopped suet
- 7 1/2 cups chopped apples
- 3 cups cider
- 1/2 cup vinegar
- 1 cup molasses
- 5 cups sugar
- 3/4 lb. citron, finely chopped
- 2 1/2 cups whole raisins
- 1 1/2 cups raisins, finely chopped
- Salt
- Juice 2 lemons
- Juice 2 oranges
- 1 tablespoon mace
- 2 tablespoons cinnamon
- 2 tablespoons clove
- 2 tablespoons allspice
- 2 nutmegs grated
- 2 tablespoons lemon extract
- 1 teaspoon almond extract
- 1 1/2 cups brandy
- 3 cups liquor in which beef was cooked

Mix ingredients in the order given, except brandy, and let simmer one and one-half hours; then add brandy and shavings from the rind of the lemons and oranges.

English Mince Meat

- 5 lbs. raisins, seeded
- 5 lbs. currants
- 5 lbs. light brown sugar
- 1/2 teaspoon mace
- 1/2 teaspoon cinnamon
- 2 1/2 cups brandy

Cook raisins, suet, apples, citron, currants, and sugar slowly for one and one-half hours; then add almonds, spices, and brandy.

Mince Meat (Without Alcoholic Liquor)

Mix together one cup chopped apple, one-half cup raisins seeded and chopped, one-half cup currants, one-fourth cup butter, one tablespoon molasses, one tablespoon boiled cider, one cup sugar, one teaspoon cinnamon, one-half teaspoon cloves, one-half nutmeg grated, one salt-spoon of mace, and one teaspoon salt. Add enough stock in which meat was cooked to moisten; heat gradually to boiling-point, and simmer one hour; then add one cup chopped meat and two tablespoons Barberry Jelly. Cook fifteen minutes.

Mock Mince Pie

4 common crackers, rolled

- 1 1/2 cups sugar
- 1 cup molasses
- 1/3 cup lemon juice or vinegar
- 1 cup raisins, seeded and chopped
- 1/2 cup butter
- 2 eggs well beaten
- Spices

Mix ingredients in order given, adding spices to taste. Bake between crusts. This quantity will make two pies.

Mock Cherry Pie

Mix one cup cranberries cut in halves, one-half cup raisins seeded and cut in pieces, three-fourths cup sugar, and one tablespoon flour. Dot over with one teaspoon butter. Bake between crusts.

Peach Pie

Remove skins from peaches. This may be done easily after allowing peaches to stand in boiling water one minute. Cut in eighths, cook until soft with enough water to prevent burning; sweeten to taste. Cool, and fill crust previously baked. Cover with whipped cream, sweetened and flavored. Fresh strawberries, cut in halves, slightly mashed and sweetened, are attractively served in a pastry case.

Prune Pie

- 1/2 lb. prunes
- 1/2 cup sugar (scant)
- 1 tablespoon lemon juice
- 1 1/2 teaspoons butter
- 1 tablespoon flour

Wash prunes and soak in enough cold water to cover. Cook in same water until soft. Remove stones, cut prunes in quarters, and mix with sugar and lemon juice. Reduce liquor to one and one-half tablespoons. Line plate with paste, cover with prunes, pour over liquor, dot over with butter, and dredge with flour. Put on an upper crust and bake in a moderate oven.

Rhubarb Pie

- 1 1/2 cups rhubarb
- 7/8 cup sugar
- 1 egg
- 2 tablespoons flour

Skin and cut stalks of rhubarb in half-inch pieces before measuring. Mix sugar, flour, and egg; add to rhubarb and bake between crusts. Many prefer to scald rhubarb before using; if so prepared, losing some of its acidity, less sugar is required.

Squash Pie I

- 1 1/4 cups steamed and strained squash
- 1/4 cup sugar
- 1/2 teaspoon salt
- 1/4 teaspoon cinnamon, ginger, nutmeg, or
- 1/2 teaspoon lemon extract
- 1 egg
- 7/8 cup milk

Mix sugar, salt, and spice or extract, add squash, egg slightly beaten, and milk gradually. Bake in one crust, following directions for Custard Pie. If a richer pie is desired, use one cup squash, one-half cup each of milk and cream, and an additional egg yolk.

Squash Pie II

- 1 cup squash, steamed and strained
- 1 cup heavy cream
- 1 cup sugar
- 3 eggs, slightly beaten
- 4 tablespoons brandy
- 1 teaspoon cinnamon
- 1 teaspoon nutmeg
- Ginger |3/4 teaspoon each
- Salt |
- Clove |1/2 tablespoon each
- Nutmeg|
- Nutmeg |3/4 teaspoon each
- Allspice|
- Mace |
- Whole cloves |1/4 cup each
- Stick cinnamon|
